The man wiped the sweat from his forehead and looked at the clergyman. "Do you think I'd be doin' this all day if I had any brains?" said he, and then he gave the handle another turn.

M. E. S. S. Picnic.—The members of the M. E. Sunday School were taken to the Villa grounds last Wednesday where they enjoyed themselves in various ways. The day was a pronounced success and the spacious groves and park-like grounds were made merry with happy voices. Some enjoyed target practice, others boating, bathing and ball playing, and others—generally couples, enjoyed the more quiet diversion of being seated in an inviting and unfrequented spot where was held a "speak easy" for an hour or two.

The committee and all present felt very grateful to Mr. and Mrs. Brady, who own the Villa, for the generous courtesy extended, and cordiality in showing such large numbers through the private apartments of their mansion.

Lecture on Temperance.—The Court House was creditably filled on Tuesday evening at the occasion of the lecture of John J. Cornell of New York. The members of the W. C. T. U. were there and quite a handsome turn out of the young men of the town. [illegible]aker was introduced by Walter H. Thompson, who prefaced his introduction with a few well chosen words and invited all to sing the familiar doxology of praise. Mrs. Bush, president of the W. C. T. U., led in prayer, after which the speaker began. For more than one and a half hours he held his audience in rapt attention. Nor did they waver or appear restless. Words of force, argument of high degree were as toys in the hands of a giant—so well did the speaker understand his subject. He took every conceivable stand of argument urged by the believer in the unrestricted or partially restricted trafic in rum, and melted those arguments as icicles before a summer's sun. Absolute prohibition was the only extermination, and that must be supplanted by legal enactment to be effective.

Special Bulletin to the Gazette.

Prevention and Restriction of Cholera.

To Town Authorities, Local Boards of Health and the Public.

Asiatic cholera is advancing rapidly along the great commercial highways of the East, and has already reached Western Europe. There is yet plenty of time for the disease to visit our shores before cold weather, and it therefore becomes the duty of the State Board of Health to call attention to the best methods of preventing its invasion.

By reason of the tide of immigration, cholera may at any time be brought into the larger cities of this country, and it is not improbable that it may be introduced into any island town by some traveler, immigrant, or returning tourist, even before it appears on the seaboard. No locality can be regarded as safe from manace so long as we receive travelers and immigrants from infected districts.

Experience has demonstrated the fact that clenliness is the best protection against cholera. When once introduced into a community its ravages are most severe and most fatal in the unsanitary localities, while the maintanance of good hygienic conditions contributes to lessen its fatality. But even if there were no dangers from cholera, it should be remembered that every thing which is done in the direction of sanitary improvement benefits the general health, reduces the amount of sickness and lessens the death rate.

An obvious duty rests at all times, but most urgently at present, upon those charged with the administration of public health affairs to take such steps as may be necessary to remedy any defects in existing sanitary conditions. With a pure water supply, a great outbreak of cholera would be next to impossible; with a reasonably mode of sewage disposal, the risk from the disease would be greatly lessened, while with pure water, complete clenliness and proper disinfection only isolated cases could occur. To enforce cleanliness only when the danger is present is a false and dangerous proceeding, and has much the appearance of the comedy after the tragedy.

The most prolific medium for the spread of cholera is, undoubtedly, the water supply. All public supplies should be carefully looked after by town and health authorities, especially in localities where imperfect sewerage and drainage render such sources liable to contamination. Private springs and wells should be protected against pollution, by cleanliness of surroundings and by promptly and properly taking care of all the waste matter of the household. The powers of local health officers to prevent the pollution of water supplies are clearly defined, and if any resistance is offered immediate steps should be taken to show the offenders that the public good is paramount to individual notions.

Within the domain of the household the opportunity for doing much for both public and private protection is very great. Good ventilation, pure water, substantial and healthful food, scrupulous neatness about the premises, personal cleanliness, regular hours and habits, in fact, every factor which contributes towards perfect health are the strongest barriers against cholera. If the disease should unhapily reach our shores and become prevalent in our midst, it is important for every one to remember that he is responsible for doing his share in warding off the common enemy. *Cleanliness and courage are the strongest weapons against cholera; filth and fear are the very worst.*

Avoid panic. Fewer persons fall victims to cholera, than to either typhoid fever, diptheria or cholera infantum. If we did our best to prevent these diseases there would be little danger from Asiatic cholera. With popular co-operation to diminish the constant slaughter from other zymotic diseases, there would be no occasion for popular alarm about cholera, though it were already at the threshold. But if the disease should get a foothold, what then? The first step would be to isolate the cases and make sure that all discharges are instantly disinfected. During the initiatory diarrhœa prompt medical treatment is important. Avoid improper food and drinks. Tranquility of mind and body are almost certain guarantees against the assaults of the disease and disarm the pestilence of its malignity. Every preparation should be made by public authorities, so that aid may be promptly administered to all requiring it, the moment of attack.

The room in which there has been a case of cholera, whether fatal or not, should, with all its contents, be thoroughly disinfected by exposure for several hours to strong fumes of burning sulphur, and then it should, if possible for several days, be exposed to currents of fresh air. It is best to burn all articles which have been soiled by a person sick with the cholera. Cotton, linens, flannels, blankets, etc, if not burned should be treated by boiling them in a solution of chloride of zinc, four ounces to the gallon of water. No article of food which has been once in a sick room should be used by any other person, and the cups, plates, forks, spoons, etc, which have been used by the patient should be thoroughly cleansed with boiling water before being taken into use by the other members of the family.

The bodies of those dead from cholera should be wrapped in a cloth or sheet wet with a solution of zinc, eight ounces to the gallon of water, and should be buried with as little delay as possible. Public funerals should be prohibited. The pains taken and the cost incurred for the purpose to which these instructions refer connot in any event be regarded as wasted. They will save both money and life. *It is important the work of inspection, and the remedy of sanitary evils and defects, be begun at the earliest moment practicable.*

Should cholera appear at any point within this State or adjacent States the fact should be telegraphed immediately to this office. As far as posible the State Board of Health will aid the local authorities in enforcing isolation and establishing quarantine, and will exercise such other authorities as may be deemed necessary to protect the people of the State.

"GOD'S ANGELS" IN STATE PRISON.

One day last fall the convicts in Auburn prison were marching in lock step around the prison yard. In the ranks was the writer; immediately behind him was a young man who had had an eventful life. As we were marching near the prison door there came out a long procession of lady visitors to the prison; the young man behind me, Willie, whispered in my ear, "There comes God's angels." At first I thought he was joking, but presently a gust of wind blew the lapel of a lady's unbuttoned sack aside and there I saw pinned to her dress a bit of white ribbon and the cross. They were holding the New York W. C. T. U. Convention. The earnest manner in which Willie called them "God's Angels" impressed my mind. I asked permission of the keeper when we returned to our cells to visit Willie; when I looked in the bars of his door he was sitting on his cot sobbing as if his heart would break. I said, "Willie what did you mean by saying the ladies were God's angels?" "Well Sam, I do not mind telling you; now you know they used to say I was the biggist tough that ever came into prison, but you see how changed I am. The change came about in this way. I am only twenty eight years old yet I have spent sixteen years of my life behind the bars. I never knew who my father was, my mother was a confirmed drunkard, and the earliest recollections I have was being sent into the streets to beg. If I came home without enough money to buy half a pint of whiskey I would be beaten most unmercifully. Starving is such a wretched home I ran away to New York City. I slept in vans, or under lumber piles on the docks; all I had to eat was what I could pick up around Fulton market. I have been so hungry I have eaten fish heads thrown into the ash barrels. One day I stole a coat and was sent to Randall's Island House of Refuge. Ever since I have been hounded by the police; no sooner out of jail than I would be landed back; nobody ever spoke a kind word to me.

"Two years ago in the prison hospital I lay ill; I thought that I was dying, when one morning a kind lady of the W. C. T. U. came and knelt by my bedside and prayed for me; she told me tenderly all about Jesus and gave me some fruit; her kind manner broke me all up. I tell you, that moment I began to mend in body and soul. I got fresh hope of being a better man. Do you wonder then that I call them God's angels? If my mother had been one of these angels I would have led a better life and probably never have been in prison."

'Tis strange but true that the convicts as a class lack faith in "the cloth;" they look upon many chaplains as George Elliott in Adam Bede says: "Jail Chaplains are the fag end of the clergy." But the earnest loving way in which women work to tell the story of how "Christ receiveth sinful men" and their readiness to write to friends, interceeding for reconciliation to the "black sheep of the family—seeing such devotion on the part of the refined, cultured women without any pecuniary recompense, has produced in the minds of the convicts unbounded confidence in the W. C. T. T. We would urge "God's angels" to go on in their noble work of rescuing men, who like poor Willie have been more sinned against than sinning." I know many cases where the W. C. T. U. have been the instrument in God's hand of saving men from going to perdition, men who now have respected places in the world. I have talked with some of the abandoned who have become so depraved that it seemed impossible to find one good thing in their hearts, and yet I never knew one who was not amenable to the loving hand and heart and voice that spoke words of comfort, did acts of kindness and felt with them human infirmity. In the name of hundreds of poor fallen humanity we would send words of gratitude and blessing to "God's angels."

Piles! Piles! Itching Piles!

SYMPTOMS—Moisture; intense itchin and stinging; most at night; worse by scratching. If allowed to continue tumors form, which often bleed and ulcerate, becoming very sore. SWAYNE'S OINTMENT stops the itching and bleeding, heals ulceration, and in most cases removes the tumors. At druggists, or by mail, for 50 cts. Dr. Swayne & Son, Philadelphia.

Friends' Quarterly Meeting.—The Friends held their usual Quarterly Meeting this week and were favored with the presence of John J. Cornell a minister from Genesee, N. Y. The meeting on Thursday was well attended by members from other congregations and the speaker was particularly favored to present in most forcible manner the true Christian life. He showed how religion as taught by Jesus was eminently practical and suited to one's every day needs, and enlarged upon the text which gives the reply of Jesus to the young man who asked what he should do to inherit eternal life. Those who listened expressed themselves as being fed at a spiritual feast.

Cuffs at 5 cents per pair, collars at 2 for 5 cents, undershirts at 8 cents, handkerchiefs at 2 cents, stockings at 3 cents, silk handkerchiefs at 3 cents, white ties at 3 cents, white vests at 25 cents.

For Over Fifty Years

Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays all pain, cures wind colic, and is the best remedy for Diarrœa. It will relieve the poor little sufferer immediately. Sold by Druggists in every part of the world. Twenty-five cents a bottle. Be sure and ask for "Mrs. Winslow's Soothing Syrup," and take no other kind.

Some Things which Happen in Town.—It is not unfrequently the case that a dashing and charming select few wander to Meintzer's ice cream parlors and there partake liberally of ice cream and cake and—strange to relate, of balls with rubber strings attached, which they dangle in each others faces. This is indeed a novel diversion and a pleasant substitute for "more cream."

Another way to spend a gala evening is to seek some noted conveyance to the Point, generally a large wagon drawn by a noble gray, and there to partake of peaches liberally, or surround the tables of Mr. Pfeifferling and make the oysters weep. Returning to town they are usually in good trim for serenading and their voices make the dust-laden atmosphere vibrate with hilariousness.

Ostensibly to procure picnic grounds, a gay young party started out on a drive the other day. The grounds were not secured, but they had their picnic all the same. Don't mention it.

Licensing Engineers.—The question of licensing engineers is being so agitated in every state in the Union that within a short time, for the protection of human lives, it will be impossible for any one intrusted with steam to hold or secure a situation without passing a rigid examination and obtaining a license. Stephenson's Illustrated Practical Test has been published to aid engineers preparing to pass such examination; and as it embraces all the questions asked on the boiler, Pump, Engine, Dynamo, Corliss Engine, etc., it has already met with such a demand that it is now in its fourth edition. This work, which only costs one dollar, can be obtained of the publisher, Walter C. Kraft, 70 La Salle Street, Chicago.

Sixty Million Bushels of Wheat—A Bushel for Every Inhabitant of the United States. The Kansas Crop of '92.

Never in the history of Kansas has that state had such bountiful crops as this year. The farmers cannot get enough hands to harvest the great crop, and the Santa Fe Railroad has made special rates from Kansas City and other Missouri River towns, to induce harvest hands to go into the state. The wheat crop of the state will be from sixty to sixty-five million bushels, and the quality is high. The grass crop is made and is a very large one; the early potatoes, rye, barley and oat crops are made, and are all large. The weather has been propitious for corn, and it is the cleanest, best looking corn to be found in the country to-day. Cheap rates will be made from Chicago, St. Louis and all points on the Santa Fe east of the Missouri River to all Kansas points, on August 30 and September 27, and these excursions will give a chance for the eastern farmers to see what the great Sunflower State can do. A good map of Kansas will be mailed free upon application to Jno. J. Byrne, 723 Monadnock Block, Chicago Ill., together with reliable statistics and information about Kansas lands.

They were seen by several persons during their rampages, and one yonng man was brave enough to fire at them with a cat rifle from a window.

THE PUZZLER

No. 262.—Numericals.

Far up in the mountains, where all things are jumbled,
As if Nature's book into 1, 2, had tumbled,
Like Jill in the legend, a mountaineer's daughter
Went up to the spring for a jugful of water.
She knew each steep cliff, and each deep 1, 2, 3.
But while gleaning 1, 2, 3, 4, 5, from a tree
Overhanging a precipice, shocking to tell,
With a sudden 1, 2, 3, 4, 5, down she fell;
By a fortunate chance saving 5, 6, 7, neck;
But the 1, 2, 3, 4, 5, 6, 7, was a wreck.

No. 263.—Pictorial Puzzle.

The first two letters of the names of the above objects, placed in their proper order, will form the name of one kind of steam engine.

No. 264.—Decapitations.

I am something eatable, something not eatable that makes a noise to amuse small boys, and sometimes people give my name to a burglar. Catch this burglar and cut off his head, and he will be one who twists or distorts things. Again behead and take out his heart, and he will become a genus of noble forest trees, some of which furnish very desirable food to be eaten with the first mentioned article.

No. 265.—Crossword Enigma.

My first is in careful, but not in save;
My second in water, and also in wave;
My third is in table, but not in chair;
My fourth is in lovely, but not in fair;
My fifth is in ringing, but not in bell;
My sixth is in pitcher, but not in well;
My seventh is in sovereign, but not in gold;
My eighth is in youthful, and also in old;
My ninth is in doleful, but not in sad;
My tenth is in happy, and also in glad;
My eleventh in reaping, but not in sow;
My whole, the grub of an insect, is ugly and slow.

No. 266.—Historical Scene.

I see a man riding as a captive through a grand city. He was a great chieftain in Britain, and as he rides through he exclaims, "How is it that you, possessed of so much magnificence, envy me my humble hovel in Britain?" What was the name of the chieftain? What city did he ride through?

No. 267.—Missing Letter Puzzle.

When the missing letters have been supplied the whole will form a verse from a well known poem by Longfellow:

N-t-n-o-m-n-,a-d-o-s-r-o-,
I-o-r-e-t-n-d-n-o-w-y-;
B-t-o-c-,t-a-c-e-t-m-r-o-
F-n-u-f-r-h-r-h-n-o-a-.

No. 268.—Curtailments.

1. Curtail to despair and leave a covering.
2. Wicked and leave a musical note.
3. In need and leave pale.
4. To reason and leave poor.
5. To frighten and leave a mark.
6. A substance resembling hemp and leave to stand out.
7. A large basin and leave to bathe.

Puniana.

"I would knot harm thee," sang the buzz saw to the log.

Census Taker—Any of the family religious? Head of House—You might put down one. My brother lives on a prairie.

"Are any of the colors discernible to the touch?" asked the school teacher. "I have often felt blue," replied the boy at the head of the class.

"Time's up," as the workman announced when he fixed the hanging clock.

The man at the masthead has a tiptop berth.

Living in the garret may be said to be a rheumatic difficulty.

The lumberman will "split" with his best friend.

A Feeling Reflection.

"Dogs may have their day, if they want it; but the night is plenty good enough for me," said Tommy Ticklemouse, feline his way carefully along the backyard fence.

WONDERFUL

The cures which are being effected by Drs. Starkey & Palen, 1529 Arch St., Philadelphia, Pa., in Consumption, Catarrh, Neuralgia, Bronchitis, Rheumatism, and all chronic diseases, by their Compound Oxygen Treatment, are indeed marvelous.

If you are a sufferer from any disease which your physician has failed to cure, write for information about this treatment, and their book of 200 pages, giving a history of Compound Oxygen, its nature and effects, with numerous testimonials from patients, to whom you may refer for still further information, will be promptly sent, without charge.

This book, aside from its great merit as a medical work, giving, as it does, the result of years of study and experience, you will find a very interesting one.

HE Missed his Opportunity! DON'T Miss Yours, Reader. The majority neglect their opportunities, and from that cause live in poverty and die in obscurity! Harrowing despair is the lot of many, as they look back on lost, forever lost, opportunity. Life is passing! Reach out. Be up and doing. Improve your opportunity, and secure prosperity, prominence, peace. It was said by a philosopher, that "the Goddess of Fortune offers a golden opportunity to each person at some period of life; embrace the chance, and she pours out her riches; fail to do so and she departs, never to return." How shall you find the GOLDEN opportunity? Investigate every chance that appears worthy, and of fair promise; that is what all successful men do. Here is an opportunity, such as is not often within the reach of laboring people. Improved, it will give, at least, a grand start in life. The GOLDEN opportunity for many is here. Money to be made rapidly and honorably by any industrious person of either sex. All ages. You can do the work and live at home, wherever you are. Even beginners are easily earning from $5 to $10 per day. You can do as well if you will work, not too hard, but industriously; and you can increase your income as you go on. You can give spare time only, or all your time to the work. Easy to learn. Capital not required. We start you. All is comparatively new and really wonderful. We instruct and show you how, free. Failure unknown among our workers. No room to explain here. Write and learn all free, by return mail. Unwise to delay. Address at once, H. Hallett & Co., Box 880, Portland, Maine.

PERFUMERY.—All kinds of perfumery at the drug store of W. C. HUGHES.
