HAVE you turned over that "new leaf"? If so did you notice how clean it was alongside of the one which you started fresh and bright a year ago?

AFTER all, it appears that the banks are dandy things to have around when the Government is hard pressed for money.

FOR genuine, first class weather that would make a resident of balmy Italy, sunny France, blooming Florida or ...ical California green with envy ...o Talbot to see it. Nothing ...al—always just so.

THE contest for State Senator will ...gin on the fourteenth of this ...month. There are no positive changes ...in the situation. Wellington still remains stubborn and his large army of ...opposers are equally so. It is thought that the voting will be sharp and decisive without much skirmishing.

GOV. BROWN sent a brief and well directed message to the House on Wednesday, but through courtesy to the incoming Governor, did not elaborate very much. Gov. Brown has had his honors and feels that his political luster is at present eclipsed by Lowndes luminary whom the people are more interested in hearing.

GOV.-ELECT LOWNDES will be inaugurated at Annapolis next Wednesday. There will be more made of the day throughout the State than has been on such an occasion for a long time. The Governor has a host of personal friends in each county who expect to be present, and the Annapolitans will be taxed to their utmost to accommodate the people.

Two species of native birds are becoming quite rare in South Carolina, the showy red bird and the mocking bird. The threatened extermination of these birds is said to be due to the demand for them in the North, and in the case of the red bird the introduction of the English sparrow is to blame. The mocking bird, however, is quite capable of holding its own against the pugnacious foreigner.

MANY prominent Republicans from all sections of the State were at Annapolis at the opening of the Legislature, Attorney-General Clabaugh held a large reception in the library, where his advice on party matters was frequently sought during the progress of the caucus on Tuesday night. Mr. George R. Gather, Jr., Chairman Wm. F. Stone of the City Committee, and Ex-Congressman Henry Stockbridge were with Mr. Clabaugh for some time, and these four young men were looked upon as the leaders on the ground managing affairs. They will probably be often at Annapolis during the session. They proved a decided and favorable contrast to the crowd that used to be on hand on similar occasions "bossing the job" for the ring.

A BOND issue seems certain, although, says a New York correspondent, it is denied in Wall street that the Morgan syndicate is acting upon instructions from President Cleveland. Bankers say that Mr. J. Pierpont Morgan, on his own responsibility, has organized a syndicate to purchase the bonds if the President determines to sell. It also appears that some other Wall Street gentlemen have organized one, and perhaps two additional syndicates for the purchase of bonds, the desire being, of course, to help the government out of a dilemma, and to help the wall street financiers to a million or ten millions of profit for their trouble, according to the premium at which the bonds will sell in the open market.

THE Venezuela Commission has been completed by the appointment of Justice Brewer, of the Supreme Court, as its third member. The findings of such a commission ought to command respect even in England. The two ex-Ministers to Great Britain, Edward J. Phelps and Robert T. Lincoln, now during their terms of service the esteem and confidence of the people to whom they were sent. President Cleveland could not go higher than to the Supreme Court for the third member of the commission. The country will rest satisfied in the confident assurance that this commission will make a thorough investigation into the boundry question and decide impartially, conscientiously and, as nearly as any judges can do so, correctly on this issue. Their finding will be accepted in this country as fact and it is hoped and believed that even the Government of Great Britain will see that it is bound to respect and regard a judgement rendered by such a commission.—Philadelphia Press.

THESE cuckoo politicians may deceive themselves into a belief that the Gorman-Wilson law has suddenly developed into a revenue-producing measure, but they cannot hope to deceive the people into such a belief. Official statistics speak in terms whose meaning cannot be misapprehended. The present Democratic revenue law has now been in operation sixteen sixteen months, and, in spite of the systematic practice of Treasury tricksters in withholding moneys due to public creditors, the expenditures of the Government during this period have outstripped receipts by the enormous sum of $70,000,000, an average monthly deficiency of nearly $15,000,000, or three times as much as the sham surplus for simply December. Even for December, the receipts were $4,000,000 less than the average monthly expenditures, and in January the usual expenditures will in all likelihood go up with a bound. It is absurd in the face of such circumstances to claim that the new tariff is now providing the Government with adequate revenue.

PRES. WILLIAM CABELL BRUCE, has been made Speaker of the House. In speaking of the formation of his committees, said:

"I shall take great care in making up all the committees, and shall be especially particular in the selection of members of those committees which will have charge of all bills providing for reform legislation. There are certain reforms which the intelligent people desire to see enacted, and I intend to do all in my power to bring about the passage of those bills for reform as early in the session as possible. My experience has taught me that the members generally are more favorable to reform early in the session than they are later on, and the sooner the reform bills are pushed through, the better it will be. Later on in the season, the zeal for reform may become cool, owing to the press of business.

"The Senate generally is composed of ex cellent men, and there are some members of exceptional ability. I have no doubt that as far as the upper chamber is concerned, all the reform measures will be pushed through early in the session and the responsibility for the completion of the work placed on the House. I have every reason to believe that the House also will do its duty."

TELLING TIME IN THE DARK.

It Needs Only a Little Calculation and Regular Habits.

"What time is it?"

"I think I can tell you without looking."

He drew out his watch and held it up close to his ear and slowly turned the stem winder. "One, two, three, four, five, six, seven, eight," he counted, and then he said: "That means 72 minutes. I wound the watch up tightly at 3 o'clock, and so the time ought to be about 12 minutes past 4. Let's see how near I came to it. Well, it's 4:18. I was only six minutes off."

The other was regarding him with amazement. "Do you mean to say that you can tell the time of day by winding up your watch?"

"Not exactly, but I can come mighty near it—usually within ten minutes—and it's very simple too. All you have to know is how long one tick in winding up will run the watch. I'll explain to you. Suppose that at 3 o'clock I wind up my watch until it is tight, as we say—that is, until another turn of the winder would apparently break a spring. At 5 o'clock I wind the watch again and find that the winder clicks 12 times before the watch is wound up to the place where it sticks. Then you know that 12 ticks will run the watch 120 minutes, and that one click represents ten minutes of time."

"What good is it to know that?"

"Well, suppose you go to bed at 11 o'clock tonight, and on retiring wind up your watch and put it under your pillow. During the night you wake up and wonder what time it is. You don't want to get up and light the gas. All you have to do is to pull that watch out from under the pillow, hold it to your ear and count the ticks as you wind. If you count 18, then you know that the watch has run down 180 minutes since 11 o'clock, and that the time must be very near 2 o'clock. To be sure, you can't tell the exact time, but you can generally get within a quarter of an hour of it."

"Wouldn't the same rule hold good for a clock or a watch which is wound with a key?"

"I dare say it would, but I never tried it on anything except a stem winding watch. I know a blind man who always tells time by winding his watch and counting the ticks. His sense of touch is quite delicate, and he can wind up his watch three or four times a day and then calculate within ten minutes of the correct time."—Chicago Record.

DOORS MADE OF GLASS.

But They Have Every Appearance of Highly Polished Wood.

Two Boston inventors have secured a patent for a process of making glass veneers which have many peculiar properties. This invention relates primarily to the production of ornamental glass, which may be either semitransparent or opaque and is made to represent highly polished wood of any description. It is intended to be applicable for veneering wherever required and is particularly adapted for vestibule and other doors, the exterior of the glass having the appearance of highly polished wood, while in the interior of the house it will appear semitransparent.

In carrying the invention into practice a sheet of ground or plain glass is taken of any desired size and clouded the same on one side with a liquid dye of the proper color to represent any desired wood, which dye is applied by means of a sponge for delineating the grain of the wood so as to appear upon the surface of the glass. The shading is softened by means of a badger brush. Photographers' varnish is then caused to flow on the glass and leaves the grain clear and fast without the necessity of using any gelatinous substance, which would render it liable to crack and spoil the effect.

To complete the operation the glass is then slightly heated, and the varied shades of dyes required for the particular wood to be represented are caused to flow over it by means of a syringe. The glass is heated in order to prevent the shadings from merging into each other. The whole is then made semitransparent by applying another coat of photographers' varnish, so as to prevent the dyes from being effaced, while the exterior surface presents the appearance of a highly polished solid wood finish.—Exchange.

His Prophecy.

The Chief Baron Pollock is very fond of telling the following story about himself:

When he left St. Paul's school somewhat unexpectedly and in a way which gave some offense to the high master the latter personage gave it as his opinion that he would live to be hanged.

After a brilliant career at Cambridge Pollock came out senior wrangler and was elected fellow of Trinity. On hearing this his old master said:

"I always foretold that he would fill a very exalted station."—London Standard.

Nervous

People should realize that the only sure and permanent cure for their condition is to be found in having

Pure Blood

Because the health of every organ and tissue of the body depends upon the purity of the blood. The whole world knows the standard blood purifier is

Hood's Sarsaparilla

And therefore it is the only true and reliable medicine for nervous people. It makes the blood pure and healthy, and thus cures nervousness, makes the nerves firm and strong, gives sweet sleep, mental vigor, a good appetite, perfect digestion. It does all this, and cures Scrofula, Eczema, or Salt Rheum and all other blood diseases, because it

Makes Pure Blood

Results prove every word we have said. Thousands of voluntary testimonials fully establish the fact that

WANAMAKER'S.

PHILADELPHIA, December 30, 1895.

Great movements of merchandise are planned for January. This one-time sleepy month among stores has been changed by progressive methods into a season of money-saving activity.

Thursday, Jan. 2, starts the half-yearly sale of Muslin Underwear—looked forward to with interest by women far

and near. It has become a sheer waste of time to drudge at home over the making of muslin and cambric garments, for machines driven by electricity and guided by experts produce garments more luxuriously finished than home-work at prices no greater than the cost of materials to individual buyers.

Then January brings unusual values to those who need Carpets, Upholstery Goods and other things of home use and adornment.

Dress Stuffs also join the forced march and though prices during the past season have been marvelously low, sweeping reductions are made for good business reasons. Already new stuffs for the unborn Spring are coming in—ahead of the usual time simply because Our Public demands them.

This great, helpful store—made by you and us—grows constantly more helpful through the added power you give us to handle goods to best possible advantage and with least cost and waste in the gathering.

Buyers have already been started on their European trips—more will follow as the weeks go by. More than twenty are scheduled for this service—many of them making two voyages a year. Take, for instance, the head of this Linen business. Half of each year he spends among the loom folks of Ireland, Scotland and Germany—our Handkerchief orders in Beltast making us the largest buyers of pure linen goods for retail in the world.

Most of the details of these mid-Winter sales must necessarily be found in the daily papers, each day bringing developments that are told of in our columns of store news.

We insure the fulfillment of our wish of

A Happy New Year

to the friends of the old store by perfecting plans that must add to the prosperity of all who share in the results.

1896 PLAIDS

Made beforehand, like fruit cake and calendars. These designs were chosen and ordered produced for delivery in February next, but you took so nearly all the plaid stuffs we had that it was necessary to hurry them along. Third lot is here—and will likely go as quickly as the other shipments.

It is a special feast for plaid lovers.

38 inch Taffeta Plaids, overplaided with silk, 85c.
44 inch silk-and-wool Plaids at $1.25. The same quality that has been $1.50.

FLANNELETTE WRAPPERS

Think of getting fairly well made Flannelette Wrappers, with lined waist, for 85c! They are made with round yoke front and back; ruffle over shoulder; watteau back.

Others at $1 and $1.50—just as cheap!

Think how foolish and wasteful home sewing is when such values as these come your way.

EIDERDOWN SACQUES

Even the Sacques at 75c are made of the pretty mottled eiderdowns and have crocheted edge and ribbon at neck.

Others, prettier, 95c and $1.25.

This Underwear Store, where some other things than underwear are sold, is the helpfulest acre of store in all Philadelphia. This statement will keep—it is getting more overwhelmingly true all the time.

RIBBONS

Satin and gros grain Ribbons; all silk and all colors; next to nothing a yard, or to be more exact—

No. 5 Ribbons at 5c a yard
7 Ribbons at 7c a yard
9 Ribbons at 9c a yard
12 Ribbons at 11c a yard
16 Ribbons at 13c a yard
22 Ribbons at 15c a yard
80 Ribbons at 20c a yard

THE IMPROVED AMERICAN ROUND WASHER,

IT IS IMPORTANT

That every purchaser of a Washing Machine should note carefully the many points of superiority these washers have over others similarly designed.

WHY USE THIS MACHINE?

IT WORKS EASY, having good leverage and small gears.

IT WASHES CLEAN having large rubbing surface over entire circumference and bottom, with no ends or corners to catch dirt, and garments can drift and escape rubbing.

IT CANNOT WEAR OR TEAR THE CLOTHES OR PULL OFF BUTTONS, as the entire inside surface of the tub is smoothly corrugated.

IT HOLDS NO TWO-THIRD LESS WATER than most washers, having no useless room in corners and ends to be filled with water.

ITS CHIEF EXCELLENCY, holding from one-fourth to one-third more than other machines.

IT HAS IMPROVED WRINGER, it being tightened as a wash tub, and requiring no calking, which is the only remedy for leakage in most washers, and the large rollers being down the hoops cannot drop off.

NO SLOPPING OF WATER, and no ESCAPING OF steam, it having a tight cover on the tub, the lady to do her washing standing on the floor, protected her from the steaming suds, besides forming the best drying water which is the secret of quick and easy cleansing of soiled garments.

CONVENIENT TO EMPTY AND RINSE, it standing with its out support when tipped onto an ordinary wooden pail.

WILL LAST A LIFE TIME, being made of the best yellow pine, thoroughly seasoned, and the inside wood work is made of the best white oak.
