WILSON M. TYLOR & BRO., Editors.

ELLIOTT SHANNAHAN, Local Reporter and Foreman

Easton, Maryland, June 4th, 1898.

SCHLEY says by his cannon's mouth, "do not put off Fort' Morro what can be done today," and he didn't."

SENATOR GORMAN exploded a few bombs in the ranks of the anti-bond silverites in the Senate in a patriotic speech he made in favor of upholding the hands of the government by authorizing the issue of bonds, and opposing the issue of either silver certificates or greenbacks. After calling attention to the fact that no war had ever been fought without an issue of bonds, and expressing the opinion that none was ever likely to be, Mr. Gorman exploded his heaviest bomb by saying that if the Senate refused to authorize bonds, the President would be compelled to issue them, as soon as he was bound to have money, under the law of 1875.

WE think the time has come to lay aside all names and emblems which savor of selectionalism, and substitute therefor fitting titles of unity and brotherhood.

We would suggest that Memorial Day be hereafter designated as "Heroes' Day," and that the decoration of the graves and national cemeteries be as copiously made upon those who fell the vanquished, as well as upon those who fell the victors.

We would like to see the fraternities known as the G. A. R. and U. C. V., united in one brotherhood representing loyalty to principle, having respect each for the other.

The further we are removed from the conflict of the civil war, do we realize that there was honor and truth upon both sides; and while loyalty to the flag summoned the volunteers from New Hampshire, loyalty to the homes in the fair and beautiful South summoned its heroes in defense.

The North has learned today after thirty years of observation that theory and the results of practice do not always harmonize in the strictest sense. The race question is as much of a problem today as it was a generation ago, and the solution to that question has not rested entirely with those who saved the Union.

The Southern people are magnanimous and chivalrous and are extending to the North outstretched arms of welcome, and it becomes the duty of the Nation and the States of the North to return to the South every flag sacred to her heart, and thus coalesce the two sections in eternal union, in sentiment no less than in fact.

WHAT is treason? This question becomes of the greatest importance when the country is engaged in war. It is a serious matter to accuse men of being traitors, but black doesn't become white because it isn't called black. In times of peace it was all right for men to oppose the annexation of Hawaii because they did not personally believe that this country would be benefited thereby; but, now that the President, his entire Cabinet, and every officer in the army and navy whose opinion has been asked, have declared that the immediate annexation of Hawaii is a military necessity, without which our attempting to hold the Philippine Islands may be turned into a disastrous failure and all of the fruits of Dewey's great victory be lost, it is not all right. On the contrary, it is all wrong. That free speech may at times become dangerous is shown by the activity of the sugar trust lobby to prevent Congress providing for annexation of Hawaii, notwithstanding that the administration, a large majority of Congress, and an overwhelming majority of people were strongly in favor of annexation even before it was declared to have become a military necessity. If this lobby isn't guilty of treason, it is dangerously near to being guilty. From the day that the President declared annexation to be a military necessity it has been the patriotic duty of Congress to annex, without regard to personal opinions of individuals.

AND, now, we are told that the sun is not hot, and we are most ready to believe it. What are we to expect from Science, when she demonstrates to us that the icicle is red-hot compared with liquid air and plunged into the latter, will cause it to boil and steam as though red-hot iron were plunged into water. Almost simultaneous with this unexpected discovery, comes the startling one from a Professor Holcomb, of Texas, that the sun is not hot, but that the luminous ray becomes heat only when that ray is impinged upon matter. He accurately calculates that the temperature of a ray from the sun coming the distance it does in order to have 100 degrees of heat upon the surface of the earth, must have nearly four and a half millions of degrees upon leaving the sun, which would be a thousand times hotter than necessary to convert into gas all the substances which the spectroscope shows the sun to contain. The argument is, that if the sun be so hot, it would cease to be a ball of luminous gas, since the well-known law of expansion of gases would dissolve the sun through all space.

While the argument seems clear, it is not likely that it is correct beyond the degree of solidified heat. It must be remembered that no test has ever been made of the caloric quality of the sun's ray beyond the point of the earth's atmosphere, and that all calculations independent of atmospheric influence, are mere speculations.

Fresh Air Society.

Some interested citizens met at the counting room of Mr. M. B. Nichols on Thursday evening last, obedient to a call, to devise means and arrange for the forming of a Fresh Air Society in Easton. Mr. W. H. Thompson was made Chairman and Mr. W. M. Tylor, secretary. The object is not one with which the public is unfamiliar, as much has been done in this direction by private sources for a number of years. But to give the same more substantial recognition a better system is desired.

As all know, the city of Baltimore, our neighbor, contains thousands of children cooped up in suffocating alleys during the Summer months, who never see an open play ground much less the broad scope of the country, or hear the birds sing in leafy tree. Their parents usually live in but one room and are too poor to give themselves or children the needed comforts.

This Society is to be a branch of the Baltimore society, and will be asked simply to find a country home for two weeks only for some child, and the Baltimore branch will find that worthy, healthy and anxious child.

When fifty or more children can be provided for, they will be consigned to the care of this society and distributed among country homes, then returned with rosy cheeks and brown faces to their city homes.

It is one of the most laudable charities that can be conceived and is yearly doing great good.

A meeting at the business office of Mr. Walter H. Thompson is called for next Tuesday evening at 8 o'clock, to which all interested citizens are invited.

To Cure Constipation Forever.

Take Cascarets Candy Cathartic. 10c or 25c. If C. C. C. fail to cure, druggists refund money.

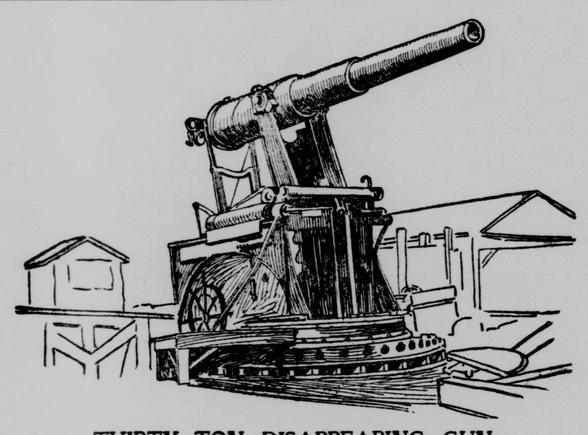

The Crescent Wears the Crown.

A wagon was seen going down Washington Street on Saturday containing six Crescent Bicycles, and upon inquiry we learned they were all for Mr. John Elliott. This speaks volumes for the high quality of the Crescent Bicycle, as Mr. Elliott had thoroughly investigated the whole market and convinced himself there was none better than the Crescent. These wheels came out of the large stock on sale by Shannahan & Wrightson Hardware Co.

Who Will Get It?

There will be three disappointed men after the regular monthly meeting of the Town Commissioners on Monday. The collector of taxes will be appointed, and the aspirants are Messrs. D. R. D. Cheezum, Robert T. Savage, Charles E. Nicols and A. G. Pascault. The two last named have held the office before.

Hundreds of thousands have been induced to try Chamberlain's Cough Remedy, by reading what it has done for others, and having tested its merits for themselves are to-day its warmest friends. For sale by H. Roberts, Druggist.

THIRTY TON DISAPPEARING GUN.

Nearly every important seaport now has one or more 30 ton disappearing guns of 10 inch caliber for its defense. Each gun fires a 575 pound projectile, and the recoil sends the cannon back out of sight into its pit.

PHILADELPHIA, Monday, May 30, 1898.

The Humber-Continental-Monarch Club

A WHEEL NOTICE EXTRAORDINARY

It is the purpose and duty of the Wanamaker stores to serve the public. The public demands—we comply. There is a popular demand for an economical and satisfactory system of purchasing wheels on easy payments. Our relations to the wheel manufacturers have

enabled us to take this step in the interest of our public. Our conferences with the manufacturers whose wheels we handle in our stores have resulted in their consenting to allow us to distribute A LIMITED NUMBER of their wheels on the system that has proven so satisfactory in the Wanamaker Century and History Clubs.

We are accordingly prepared to deliver to members of the Wanamaker Wheel Club these wheels, on the following terms—

1100 HUMBERS, 1898 MODEL, AT $73
ON MONTHLY PAYMENTS OF $10

2200 CONTINENTALS, 1898 MODEL, AT $40
ON MONTHLY PAYMENTS OF $5

300 MONARCHS, 1898 MODEL, AT $50
ON MONTHLY PAYMENTS OF $8.33

The extra charges heretofore established for brake and mud-guards will be continued in effect.

An initial fee of $5 will be required to cover book-keeping and other expenses of the club. On payment of this amount, and on the furnishing of satisfactory references as conditions of membership, the wheel will be immediately delivered, the monthly payments to begin thirty days after enrolling in club.

The number of wheels is definitely and irrevocably fixed as above and cannot be increased.

The wheels are not prepared especially for this Club, but are the regular $100 Humbers, $50 Continentals and $60 Monarchs heretofore on sale by us, and are covered by our strong guarantee in addition to that given by the manufacturer.

JOHN WANAMAKER

Notice to Dairymen.

Be it enacted by the General Assembly of Maryland:

It shall be the duty of all dairymen or herdsmen or private individuals supplying milk to cities, towns or villages to register their herds or cattle with the Live Stock Sanitary Board, in violation of which the parties offending shall be fined not less than one dollar nor more than twenty dollars for each offence. Registration may be made within thirty days by application either in person or by letter to C. W. MELVILLE, Secy.
