Tydings Has Been Peeping Sees No Cure for Strikes

Answering to how passed by Congress would and strikes, Senator Tydings in a broadcast address on the problem and it is not nearly so bad as it seems.

Instead, he declared that public opinion will in time settle both sides in a labor-management controversy, in making a decision. But, he added, public opinion should be careful not to exert its pressure on such matters to attack all the facts on both sides before it reaches a conclusion.

"When it does reach such a conclusion it can then be brought into the balance for generally the public is the fairest arbitrator of them all," declared Tydings.

Whether strikes are right or wrong, whether lockouts are right or wrong, in a democracy they are "must" decisions. In exchange for some of the privileges," he added, "That is something we must not forget in our consideration of these management-labor disputes."

Continued: "At once we can see how the pattern of labor or management and use the constitutional right of either side. For my part I would rather see labor win, if I have to do it, than impose on this Government the methods of labor, in which case, many of our fine young people have lately died."
