Highgate Tell Farmers

To Use Time-Table

A right schedule for summer choice time on the dairy farm means more milk in the pail and bigger checks on pay day. Maryland Extension Experiment Floyd L. Arnold advised.

The dairy cow is a creature of habit, he concluded the dairymen, and she gives down more milk if she is milked at a regular hour in the summer as well as in the winter.

Too many farmers, rushed by some new field work, put off the chore hour in the evening until it is inconvenient.

With present high feed and labor costs, Mr. Arnold pointed out that the dairy farmer needs to figure every angle on his farm business to cut costs and increase production.

A business-like schedule for milking in the summer and of the dairy cow means a real cash benefit to the farmer every month.
