Mr. Editor: Not very log ago I made a very feeble effort through your column to remind the tobacco growers of Calvert county of what a licking we had taken in the price of our tobacco since 1935. I stated at that time that the crop marketed in 1935, was quite inferior, yet the best grade of that crop sold up to 55 cents per pound The crop marketed in 1936, was very much better, but the top price was only 40 cents. A difference of 15 cents per pound. In 1937 we marketed what was considered the finest crop that ever went to the Baltimore market in a generation. About 70 per cent of that crop was cigarette type. The tobacco trade tried to impress us with the fact that they could not pay more, than 40 cents for the top of that fine crop. That is just what we got—40 cents, for perhaps the finest crop that was ever grown in Maryland—another licking! The price of cigarettes is the same as when they paid 55 cents for the top of a much inferior crop. I think it should be perfectly clear to any mind where the 15 cents per pound went that the grower should have had.

The Tobacco Weekly Trade Journal reports the net profits of three of the cigarette manufacturers for 1937. The first had a net profit of $27,000,000. More than four times as much as the entire Maryland crop sold for. The next had a net profit of $21,000,000, and the third had a net profit of $20,000,000

According to my calculation the net profit of one manufacturer was more than four times as much as the gross earnings of five thousand growers. The conditions mentioned have been going on for the past hundred years and will continue to go on as long as we have a competitive system of selling. If we could sell all of our crop through one channel, we would have no trouble protecting our interest.

In conclusion, may I suggest that all attend the tobacco growers meeting to be held in the Court House, Prince Frederick, on Tuesday, April 26. If we fail to look after our own business, we need not expect others to do it for us.

Respectfully,
T NEWTON GIBSON.

March Weather.

The highest temperature was 86 degrees at Cumberland on the 22nd and the lowest 9 degrees at Elkton and Fallston on the 4th. The average precipitation was 2.80 inches, which is 0.74 inches below normal and 79 per cent of the normal. The greatest monthly amount was 3.96 inches at Oakland and the least 1.73 inches at Perryville. The greatest 24-hour amount was 1.15 inches at Crisfield on the 10th. The average snowfall was 4.0 inches and the greatest monthly amount was 8.0 inches at Clear Spring and Hall. The greatest 24-hour amount was 6.0 inches at Rock Hall on the 10th.
