The World Looks Down On Discomfited Whiner

The expression "yellow streak" epitomizes the human characteristic that is found in the person who is unable to accept without sobbing the ordinary misadventures that are liable to overtake anyone, or the well deserved discomforts that follow ill-advised

conduct. You hear the expression, "It wasn't my fault," and it may be true. But as a rule it usually is disclosed that poor judgment, mismanagement or carelessness is at the bottom of the much bewailed misfortune. In any case, weeping and wailing are of no wailing.

Hasty Secret Marriage Solves No Problems. but Makes Many.

PEAR MISS DENE: What do you think of this problem: The girl is eighteen, the boy is twenty-two. The boy is not in a position to marry yet although he has steady work. The girl feels that he must marry her soon in order that she may be happy. The danger is that he is very high-strung and if she turns away from the one she loves, there is a whole crowd of other men waiting to snap her up. Would it be possible for these two young people to marry without their parents' consent?-F. E. L.

ANSWER—Tell the girl that if she wants to be happily married, she must certainly wait until her hero is able to support her in ordinary comfort. However much she thinks she can endure, herself, in the way of poverty, she can have no idea of what an effect the situation will have on her husband.

No man is capable of loving a woman romantically and tenderly if she is a handicap to him from the moment he marries her. However heroically he strives to be understanding, and just, he is bound to feel resentful, after a while, over the fact that he was persuaded into matrimony when his salary was not yet equal to the job.

Tell the boy that if his lady is so highly strung that his opposition to marriage plans will send her off on wild jewel in the Irish sea. parties with a crowd of other fellows, then she isn't yet ready for marriage. You can't hold a flighty young thing by making her repeat the marriage lines. No girl the hope of changing her ideas.

As for a marriage without the Germantown—it works up just parents' consent—that has never tants are just as strange as those right and makes a set as warm | been a practical plan of procedure. | concerning Finn MacCool. FARM TOLICO

SHORTAGE OF SEED PREDICTED FOR '38

Caution Urged in Alfalfa, Red Clover Purchases.

Supplied by the College of Agriculture. University of Illinois-WNU Service. Faced with another shortage of adapted legume seed, farmers will need to be cautious in their purchases of alfalfa and red clover for 1938 plantings.

The carryover of alfalfa seed is unusually small, and the 1937 production of seed adapted to the corn belt was short, the report stated. On the other hand production in the Southwest, which produces seed not well adapted to the corn belt, is reported to be 50 per cent above 1936. and the heaviest importation of foreign unadapted alfalfa seed in ten years was made in 1936-37. Supplies of red clover seed are

also short for 1938. United States production in 1937 is estimated at 30,000,000 pounds—only half the average annual consumption and the smallest crop since 1926. Greatest decreases occurred in the corn belt states, where the seed is grown. Although there is little if any carry- indicate. You can sew over of domestic red clover seed from the 1936 crop, approximately 3,000,000 pounds of imported seed not adapted to the corn belt are
