Special Notices.

SCHENCK'S SEAWEED TONIC.

This medicine, invented by Dr. J. H. Schenck, of Philadelphia, is intended to dissolve the food and make it into chyme, the first process of digestion. By cleansing the stomach with Schenck's Mandrake Pills, the Tonic soon restores the appetite, and food that could not be eaten before using it will be easily digested.

Consumption cannot be cured by Schenck's Pulmonic Syrup unless the stomach and liver is made healthy and the appetite restored, hence the Tonic and Pills are required in nearly every case of consumption. A half dozen bottles of the SEAWEED TONIC and three or four boxes of the MANDRAKE PILLS will cure any ordinary case of dyspepsia.

Dr. Schenck makes professional visits in New York, Boston, and at his principal Office in Philadelphia every week. See daily papers of each place, or his pamphlet on consumption for his days for visitation.

Please observe, when purchasing, that the two likenesses of the Doctor, one when in the last stage of Consumption, and the other as he now is, in perfect health, are on the Government stamp.

Sold by all Druggists and Dealers, price $1.50 per bottle, or $7.50 the half-dozen. All letters for advice should be addressed to Dr. Schenck's Principal Office, No. 15 North 6th Street, Philadelphia, Pa.

TO CONSUMPTIVES.

The advertiser, having been restored to health in a few weeks by a very simple remedy, after having suffered for several years with a severe lung affection, and that dread disease Consumption—is anxious to make known to his fellow-sufferers the means of cure.

o all who desire it, he will send a copy of the prescription used (free of charge), with the directions for preparing and using the same, which they will find a sure cure for Consumption, Asthama, Bronchitis, Coughs, Colds, and all Throat and Lung Affections. The only object of the advertiser in sending the Prescription is to benefit the afflicted, and spread information which he conceives to be invaluable, and he hopes every sufferer will try his remedy, as it will cost them nothing, and may prove a blessing. Parties wishing the prescription, free, by return mail, will please address REV. EDWARD A. WILSON, Williamsburg, Kings Co., New York.

IN offering to the public a new remedy, which has cost time and various experiments, I deem it but justice to state, my Liniment contains more curative powers, and yet is more simple and harmless than any such medicine known which is used for similar purposes.

The price is placed within the reach of all, convinced as I am the present diseased condition of mankind makes its extensive circulation a paramount necessity. It is indeed a remedy every one should possess and which no family can do without. Besides being invaluable for Bruises, Cuts, Strains, Galls, Stiffness of the Joints, Swellings, &c., in horses, it is a household medicine, as will be seen by reference to my Show Cards, for Sore Throat, Toothache, Bee Stings, Sprains, Bruises, Rheumatic Pains, Pains in the Face, Back, Joints, Limbs, Bowels, &c. Try a bottle and be convinced. Ask for Sylvan's Veterinary Liniment. It is for sale at Wm. J. Vannort's Store, Chestertown, A. L. Vannort's, Hanesville, and nearly all the Stores in the country. Also, at the

ATTENTION IS CALLED TO THE AMERICAN

Fruit Drying House!

IN presenting this new and most useful invention to the public, we feel satisfied that we are supplying a want which all Fruit Growers have long experienced. It is a means of preserving in the most perfect manner all Fruits or Vegetables, such as PEACHES, APPLES, Pears, Plums, Cherries, Berries of all kinds, Green Corn, String Beans, Green Peas, &c.

It is a house, with a furnace attached in such manner as to cause a constant and rapid circulation of heated air within, or passing regularly through and out at the top of the house by two valves to turn off or on the heat as the drying process may require, carrying off immediately all the watery elements of the Fruits, and preserving all the aromatic properties without the least fermentation or decomposition.

The Fruits are not discolored but remain perfectly fair and pure, free from all manner of dirt, flies or wet weather. It only requires about six to eight hours (just as you give attention) to dry them perfectly. Fruits thus dried are of double the value of those dried in the ordinary way.

See handbills for testimonials. The following, from a well known citizen of Kent county, is all that is deemed necessary to give here:

Mr. P. McN. Thomas,—*Dear Sir:* The fruit drying House, that I bought of J. W. Patterson, agent for Jasper Billings, patentee, I am very much pleased with, and recommend it to all Fruit Growers as a means of saving much of their fruit. Fruit dried in it is much superior to that dried in the ordinary way. It gave entire satisfaction last season.

JOHN GALE.

Worton Manor, July 1st, 1867.

Price of House, drying from 10 to 15 bushels per day.............................. $40.00
Do. Do. Drying more..........50.00

You are aware that enough fruit is lost from falling off trees in all orchards, if saved, to pay for several of these houses. Houses manufactured by Stewart & Bro., Chestertown, and by Harbourd & Clinton, Still Pond.

PHILADELPHIA UNIVERSITY OF MEDICINE AND SURGERY.

The Philadelphia University of Medicine and Surgery was organized in 1848. Chartered by the Legislature, February 26, 1853. Name changed by a legislative enactment to the Eclectic Medical College of Philadelphia in 1860. In 1863 it purchased the Pennsylvania Medical College, established in 1842, and the Philadelphia Medical College, which had previously been merged into the Pennsylvania Medical College. In 1864 it purchased the Penn Medical University. The Trustees of the separate schools united, petitioned, and obtained a special act of the Legislature, consolidating these institutions and changing their names to that of the Philadelphia University of Medicine and Surgery, March 15, 1865. All these various acts are published in the statutes of Pennsylvania. The cost of the building and museum was over one hundred thousand dollars. It will be observed that the University, as now organized, is the legal representative of the four medical Colleges that it has absorbed. It is a liberal school of medicine, confined to no dogma, nor attached to any medical clique; but embraces in its teachings everything of value to the profession.

Sessions.—It has two full sessions each year, commencing on the 1st of October, and continuing until the 1st of January as its first session, and from the 1st of January to the 1st of April as its second; the two constituting one full course of lectures. It has also a summer session, commencing the 1st of April and continuing until August, for the preparatory branches, such as Latin, Greek, Mathematics, Botany, Zoology, Chemistry, Anatomy, Physiology, etc.

Tickets.—Tickets to the full course of lectures $120, or $60 for each session. For the summer or preparatory course $25. Graduating fee $30. To aid *young men of moderate means,* the University has issued *five hundred scholarships,* which are sold to first-course students, for $75, and to second-course students and clergymen for $50, each constituting the holder a life member, with the perpetual privileges of the lectures, and all the teachings of the school. The only additional fees are a yearly dissecting and matriculating ticket, each of which is $5.

The Advantages of Scholarships.—The student holding a scholarship can enter the College at any time during the year, attend as long as he chooses, and re-enter the institution as frequently as desired.

It requires no previous reading or study to enter the University on scholarships, hence, all private tuition fees are saved.

Students, by holding scholarships, can prosecute other business a part of the time.

The candidate for graduation can present himself at any time, and receive his degree as soon as qualified.

In case a student should hold a scholarship and not be able to attend lectures, it can be transferred to another, thus preventing any loss.

Parents, guardians, or friends of students wishing to purchase scholarships for them a year or more before their attendance at the University, can secure them by advancing one-half the price, and paying the balance when the student enters. Physicians and benevolent men can bestow great benefit upon poor young men, by presenting them a scholarship, and thus enabling them to obtain an honorable profession.

The Faculty embraces seventeen eminent physicians and surgeons. The University has associated with it a large hospital clinic, where every form of medical and surgical disease is operated on and treated in the presence of the class.

College Building.—The College building, located in Ninth Street, south of Walnut, is the finest in the city. Its front is collegiate gothic, and is adorned with embattlements and embrasures, presenting a novel, bold, and beautiful appearance. The facade is of brown stone, ornamented by two towers, rising to the elevation of eighty feet, and crowned with an embattled parapet. The building contains between fifty and sixty rooms, all supplied with water, gas, and every other convenience that modern improvement can contribute to facilitate medical instruction. Only five hundred scholarships will be issued, and as two hundred and fifty are now sold, those who wish to secure one should do so at once. Money can be remitted by express, or a draft or check sent on any National bank in the United States, when the scholarship will be returned by mail, signed by the President of the Board of Trustees, Jos. S. Fisher, Esq., and the Dean of the Faculty, W. Paine, M. D. All orders for scholarships or other business of the University, should be addressed to Professor W. Paine, M. D, Philadelphia, Pa. THE

SCIENTIFIC AMERICAN FOR 1865!

VOLUME X.—NEW SERIES.

A NEW Volume of this popular Journal commenced on the first of January. It is published weekly, and every number contains sixteen pages of useful information, and from five to ten original engravings of new inventions and discoveries, all of which are prepared expressly for its columns.

TO THE MECHANIC AND MANUFACTURER.

No person engaged in any of the mechanical or manufacturing pursuits should think of "doing without" the Scientific American. It costs but six cents per week; every number contains from six to ten engravings of new machines and inventions, which can not be found in any other publication.

TO THE INVENTOR.

The 'Scientific American' is indispensable to every inventor, as it not only contains illustrated descriptions of nearly all the best inventions as they come out, but each number contains an Official List of the claims of all the Patents issued from the United States Patent Office during the week previous; thus giving a correct history of the progress of inventions in this country. We are also receiving, every week, the best scientific journals of Great Britain, France, and Germany; thus placing in our possession all that is transpiring in mechanical science and art in these old countries. We shall continue to transfer to our columns copious extracts from these journals of whatever we may deem of interest to our readers.

A pamphlet of instruction as to the best mode of obtaining Letters Patent on new inventions, is furnished free on application.

Messrs. MUNN & CO. have acted as Patent Solicitors for more than seventeen years, in connection with the publication of the Scientific American, and they refer to 20,000 patentees for whom they have done business.

No charge is made for examining sketches and models of new inventions and for advising inventors as to their patentability.

Chemists, Architects, Millwrights and Farmers.

The Scientific American will be found a most useful journal to them. All the new discoveries in the science of chemistry, are given in its columns, and the interests of the architect and carpenter are not overlooked; all the new inventions and discoveries appertaining to these pursuits being published from week to week. Useful and practical information pertaining to the interests of millwrights and mill owners will be found in the Scientific American, which information they can not possibly obtain from any other source. Subjects in which farmers are interested will be found discussed in the Scientific American; most of the improvements in agricultural implements being illustrated in its columns.

TERMS.

To mail subscribers:—Three Dollars a year or One Dollar for four months. The volumes commence on the first of January and July. Specimen copies will be sent gratis to any part of the country.
