

The Farmers' Column.

Greasing Wagons.

This is of more importance than many wagon owners imagine. The following, from an unknown source, is valuable information on the subject, which we trust will be duly heeded:

"Few people are aware that they do wagons and carriages more injury by greasing too plentiful than in any other way. A well made wheel will endure common wear from ten to twenty-five years, if care is taken to use the right kind and proper amount of grease; but if this matter is not attended to, they will be used up in five or six years. Lard should never be used on a wagon, for it will penetrate the hub, and work its way out around the tenons of the spokes, and spoil the wheel. Tallow is the best lubricator for wood axle trees, and castor oil for iron. Just grease enough should be applied to the spindle of a wagon to give it a light coating; this is better than more, for the surplus put on will work out at the ends, and be forced by the shoulder bands and nut washers into the hub around the outside of the boxes. To oil an iron axletree, first wipe the spindle clean with a cloth wet with spirits of turpentine, and then apply a few drops of castor oil near the shoulder and end. One teaspoonful is sufficient for the whole."

We would add that for journals on which there is a heavy pressure, it is a good plan to mix with the oil some lampblack or common soot; powdered plumbago or black lead is also employed for the same purpose.

Hand Threshed Wheat for Sowing.

S. C. Pattee, of Warner, N. H., in a communication to the New England Farmer, gives the result of an experiment in sowing seed threshed with a machine along side of some threshed by hand. If his conclusions are correct, it stands the farmers in hand to be careful about their seed for sowing.

"There is no trouble in raising good wheat in New Hampshire if we sow good seed and sow it early. Three bushels of my seed were threshed with a flail, the other six with a machine. From careful estimates the part of the field sown with seed threshed by hand yielded 33 per cent. more to the acre than the machine-threshed, being earlier, thicker and better in every way. In threshing for seed, I thresh the tops of the bundle lightly without opening. In this way I get the earliest and best kernels for seed. The late imperfect and short heads are in the middle of the bundle, and of course are not threshed. I run these bundles through the machine, and allow the threshers for what I thresh off."

Cattle and Corn Smut.

The following extract is taken from a letter to the Prairie Farmer. It has reference to the effect of corn smut on cattle, and whether that was the cause of the death of cattle who died after being turned into corn fields:

It is nearly sixty years since I first witnessed a *post mortem* examination of an animal that died under such circumstances, and have witnessed such examinations frequently since—probably, in all, of more than one hundred cases, and in every instance the condition of the internal organs was the same, and such as to leave no doubt as to the cause of death.

The second stomach, commonly called the "manifold," was in every instance packed with the masticated corn husks, so dry and hard that the point of a common butcher's knife could only, with considerable effort, be made to penetrate its substance, where the coats of the stomach were disorganized and separated, showing that a violent and fatal inflammation had supervened. The cause evidently, is too rapacious and full feeding of the dry material, without sufficient water. So well was this understood in New England in my boyhood, that before turning cattle into a corn field they were salted and watered, and, in addition, full fed of necessary precaution, and even then they were allowed to remain only an hour or two at a time until after the first day or two. Thus treated, I never knew any injury to follow.

The common practice is to keep cattle on the short fall feed, or with light feeding, till the corn field is cleared, when they were turned in with empty stomachs and ravenous appetites. There is generally a scarcity of water, and the fatal results follow.

Practical Hints.

A coating of three parts of lard and one part rosin, applied to farm tools of iron and steel will effectually prevent rust. Common nails heated red hot and dropped into cold water will clinch and answer the purpose of wrought nails. The sharp corner of a common Indian arrow-head or flint will cut glass effectually. A good wagon jack may be made of boards two or more feet long. Place the board in front of the wheel, one end on the ground and the other just under one of the spokes, close up to the felloe; then take hold of the spoke on the opposite side of the wheel and lift it, at the same time placing the second board under the axle. In this way a loaded wagon may be lifted with ease. Rusty nails may be drawn from wood without difficulty, by first giving them a blow hard enough to start them a little. A gun will not need cleaning for five years, if the muzzle is tightly corked and a piece of rubber kept on the tube under the hammer.

Milch Cows.

PARTICULAR attention should now be paid to milch cows, and, indeed, to all kinds of farm stock. With the approach of spring comes a growing distaste for dry provender, and a yearning for something green and esculent. Roots and slops and mashes will now be found peculiarly beneficial, and of these they ought to have a mess at least once a day.

Touch Those Thrilling Chords Again.

Oh! touch those thrilling chords again,
And sing that song once more,
'Tis one I loved in other days,
And used to sing of yore.
When this heart was sunlight all and bloom,
And free as wild bird's wing:
'Twas then I loved to hear the song
That now I bid thee sing.

Thou say'st it is a simple thing,
And has no charm for thee;
Oh! thou can'st never, never know,
How dear it is to me.
Thou can'st not know the memories
That wake in every strain:
Then smile not at my earnestness,
But sing it o'er again.

It was the first, the first sweet song
Of one who cared for me;
I learned it from the lips of love
When stars were on the sea.
But the minstrel hand is cold and mute,
And silent is that lute,
And the hallowed lips whence flowed that song,
Are now forever mute.

Oh! many fond remembrances,
Are blended in that lay,
And each soft tone wafts my full heart
To scenes in life's young day.
Then touch the silver chorded lute,
And sing that song once more,
'Twas sung to me by my beloved,
In happy days of yore.

On Inciting Emulation Among Pupils.

AN ESSAY READ BEFORE THE TEACHERS' NORMAL ASSOCIATION OF CECIL COUNTY.

All who have given the subject any thought, no doubt have a definition of Emulation formed in their own minds. And any one else, by referring to our standard works on language, may find a definition ready manufactured. But in these remarks we shall not dwell upon the definition, but upon the means of inciting the proper spirit, and of preventing the improper manifestation of it.

A generous rivalry, which exerts its utmost powers to secure success, will not place the slightest obstruction in the path of competitors, but stands ready to give assistance to overcome difficulties, is the proper spirit to be cultivated. Such a spirit fostered and encouraged through childhood, and carried into later life, would give to the world many more generous, noble-hearted men and women.

Among the many incentives which may be brought to bear upon our pupils, and by experience have been found effectual, may be mentioned the following, viz: class criticisms, personal appeals to our pupils, by referring to the more industrious of our pupils as examples; by repeated and continued solicitations of the school as a body. Many other methods will doubtless suggest themselves to the teachers.

Class criticisms upon the exercises of each other, have been found a powerful means of exciting this spirit. It keeps the attention of the class on the alert, and greatly assists the teacher in conveying an intelligible explanation of the subject under consideration. Let them correct anything they may fancy wrong in the matter or the manner of the recitation. But do not allow these corrections to degenerate into an exhibition of envious or angry feelings, by uncalled for remarks, calculated to wound the feelings of some sensitive pupil.

Personal appeals to each pupil, as opportunity offers, often assist in producing a greater interest in study, showing to the child the advantage which will result from increased application. They will gain the smile of their teacher, the approbation of their parents, and the approval of their own conscience. Numerous other motives can be adduced to produce the desire result, and very dull or vicious must be the pupil who cannot influenced by some motive set forth by the earnest teacher.

By referring as examples to the more industrious of the pupils, and thus induce others to imitate them. But caution must be exercised in this, as pride may be fostered in one pupil, and envy engendered in the other, by such references. Unless a teacher can be sure those evil passions will not be aroused, this motive to emulation should not be urged. There is too much evil already in the world, for teachers to increase the amount, by any method of instruction or discipline.

By repeated and continuous solicitations of the school as a body: pointing out their failures, and correcting their mistakes; showing them the folly of continuing as laggards and drones in the busy hive of school; impressing upon them the fact that we are placed here to do good; that one means of doing our duty is to improve our minds and increase our knowledge, that we may have greater opportunities of doing good.

Our characters are, in a measure, formed in childhood; and the predominant characteristic of the child will usually be found in the adult, and if youth can be made to understand this, it will influence many of them to build upon a sure foundation, to curb what is wrong and cultivate what is right.

Children, properly treated, are amenable to wise counsels and judicious advice. They are not the almost savages impatient parents and teachers would have us believe. They can be made to love their teachers as well as—ay! better than some parents. While then their natures are pliant and susceptible of impressions, does it not behoove us to see that those impressions, are not made wrongly. Now is the time to plant good seed. Perhaps it will root and grow—often it will die. But suppose our efforts in directing the youthful minds to the proper motives of action are often unsuccessful; do not be discouraged. You will often fail, and your pupils will follow their own headstrong desires, and all your labors will be for naught. These things are incidental to our profession. We must learn to labor and to wait. It is not often that we see immediate results to our labors. But we will sometimes witness those who have recieved our instruction grow up to be ornaments to society, and a benefit to those around them.

Few of us are so constituted as to be indifferent to censure or praise. We may affect to despise it, and hold our course in assumed contempt of the opinions of others, but censure will send the hot tide of shame or anger rushing to the cheek, and praise will call a beaming smile to the face. Children benig subject to the same passions with ourselves, will be affected in the same way, and undeserved censure, as many teachers often give, will produce angry feelings towards the censurer. Praise properly bestowed, will cause an increased effort to merit it again.

In conclusion, let us, by persistent, continuous appeals, as the smith by repeated blows forges the iron, impress on our pupils that unintermitted exertion is requisite in their school duties. That by each one striving to be first, will be the best method for all to be good, and this will insure the success of both teacher and pupil. Q.

TO PHYSICIANS

—:o:—

NEW YORK, August 15th, 1868.

Allow me to call your attention to my

PREPARATION
OF
Compound Extract Buchu.

The component parts are BUCHU, LONG LEAF, CUBEBS, JUNIPER BERRIES.

MODE OF PREPARATION.

Buchu, in vacuo. Juniper Berries, by distillation, to form a fine gin. Cubebs extracted by displacement with spirits obtained from Juniper Berries; very little sugar is used, and a small proportion of spirit. It is more palatable than any now in use.

Buchu, as prepared by Druggists, is of a dark color. It is a plant that emits its fragrance; the action of a flame destroys this, (its active principle), leaving a dark and glutinous decoction. Mine is the color of ingredients. The Buchu in my preparation predominates; the smallest quantity of the other ingredients are added, to prevent fermentation; upon inspection, it will be found not to be a Tincture, as made in Pharmacopœa, nor is it a Syrup—and therefore can be used in cases where fever in inflammation exist. In this, you have the knowledge of the ingredients and the mode of preparation.

Hoping that you will favor it with a trial, and that upon inspection it will meet with your approbation,

With a feeling of confidence,
I am, very respectfully,
H. T. HELMBOLD,
Chemist and Druggist,
of Sixteen Years' Experience.

—:o:—

[From the Largest Manufacturing Chemists in the World.]

NOVEMBER 4, 1854.

"I am acquainted with Mr. H. T. HELMBOLD; he occupied the Drug Store opposite my residence, and was successful in conducting the business where others had not been equally so before him. I have been favorably impressed with his character and enterprise."

WILLIAM WEIGHTMAN,
Firm of Powers & Weightman,
Manufacturing Chemists,
Ninth and Brown streets, Philadelphia

—:o:—

Helmbold's Fluid Extract Buchu

Is the great specific for Universal Lassitude, Prostration, &c.

The constitution, once affected with Organic Weakness, requires the aid of Medicine to strengthen and invigorate the system, which HELMBOLD'S EXTRACT BUCHU invariably does. If no treatment is submitted to, Consumption or insanity ensues.

Helmbold's Fluid Extract of Buchu

In affections peculiar to Females, is unequalled by any other preparation, as in Chlorosis, or Retention, Painfulness, or Suppression of Customary Evacuations, Ulcerated or Schirrus State of the Uterus, and all complaints incident to the sex, or the decline or change of life.

Helmbold's Fluid Extract Buchu and Improved Rose Wash

Will radically exterminate from the system diseases arising from habits of dissipation, at little expense, little or no change in diet, no inconvenience or exposure; completely superceding those unpleasant and dangerous remedies, Copaiva and Mercury, in all these diseases.

USE

Helmbold's Fluid Extract Buchu

In all diseases of these organs, whether existing in male or female, from whatever cause originating, and no matter of how long standing. It is pleasant in taste and odor, "immediate" in action, and more strengthening than any of the preparations of Bark or Iron.

Those suffering from broken-down or delicate constitutions, procure the remedy at once.

The reader must be aware that, however slight may be the attack of the above diseases, it is certain to affect the bodily health and mental powers.

All the above diseases require the aid of a Diuretic. HELMBOLD'S EXTRACT BUCHU is the great Diuretic.

Sold by Druggists everywhere. PRICE—$1.25 per bottle, or 6 bottles for $6.50. Delivered to any address. Describe symptoms in all communications.

Address

H. T. HELMBOLD,
Drug and Chemical Warehouse,
594 BROADWAY, New York.

READ! READ!!

THE
OLDEST ESTABLISHED
Clothing House
ON THE
EASTERN SHORE.

JOS. A. CATLIN,

After an experience of years, a thorough acquaintance with the City Markets, and a knowledge of the wants of the trade in this locality, offers to the citizens of this, and the adjoining Counties, a complete and carefully selected Stock of Seasonable Clothing.

MEN'S, YOUTH'S and BOY'S CLOTHING,
of all kinds and at all prices!

Furnishing Goods!
Furnishing Goods!

HATS AND CAPS.

PARTICULAR ATTENTION PAID TO CLOTHING MADE TO ORDER, IN THE BEST STYLES AND FINISH.

I have secured the assistance of Mr. Wm. J. McFeely, an experienced Salesman, late of Centreville.

☞ DETERMINED, NOT ONLY TO SUSTAIN THE OLD REPUTATION OF THIS HOUSE, BUT TO EXTEND ITS PATRONAGE BY KEEPING, AT REASONABLE PRICES, A STOCK OF GOODS TO MEET THE WANTS OF THE PEOPLE, A CALL AND EXAMINATION OF MY GOGDS IS RESPECTFULLY SOLICITED.

JOS. A. CATLIN,
CHESTERTOWN, MD.

The Great Medical Discovery!
Dr. WALKER'S CALIFORNIA
VINEGAR BITTERS,

Hundreds of Thousands Bear testimony to their wonderful Curative Effects.

WHAT ARE THEY?

THEY ARE NOT A VILE
FANCY DRINK,

Made of Poor Rum, Whiskey, Proof Spirits, and Refuse Liquors, doctored, spiced, and sweetened to please the taste, called "Tonics" "Appetizers," "Restorers," &c., that lead the tippler on to drunkenness and ruin, but are a true Medicine, made from the Native Roots and Herbs of California, free from all Alcoholic Stimulants. They are the GREAT BLOOD PURIFIER and LIFE GIVING PRINCIPLE, a perfect Renovator and Invigorator of the System, carrying off all poisonous matter, and restoring the blood to a healthy condition. No person can take these Bitters, according to directions, and remain long unwell.

$100 will be given for an incurable case, providing the bones are not destroyed by mineral poisons or other means, and the vital organs wasted beyond the point of repair.

For Inflammatory and Chronic Rheumatism, and Gout, Dyspepsia, or Indigestion, Bilious, Remittent, and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys, and Bladder, these Bitters have been most successful. Such Diseases are caused by Vitiated Blood, which is generally produced by derangement of the Digestive Organs.

They invigorate the stomach, and stimulate the torpid liver and bowels, which render them of unequalled efficacy in cleansing the blood of all impurities, and imparting new life and vigor to the whole system.

Dyspepsia or Indigestion, Headache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Copious Discharges of Urine, Pain in the regions of the Kidneys, and a hundred other painful symptoms which are the offsprings of Dyspepsia, are cured by these Bitters.

Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions, or Sores; cleanse it when it is foul, and your feelings will tell you when. Keep the blood pure and the health of the system will follow.

PIN, TAPE, and other WORMS, lurking in the system of so many thousands, are effectually destroyed and removed.

For full directions, read carefully the circular around each bottle, printed in four languages—English, German, French, and Spanish.

J. WALKER, 32 & 34 Commerce Street, N. Y. Proprietor. R. H. McDONALD & CO., Druggists and General Agents.

San Francisco, California, and 32 and 34 Commerce Street, N. Y.

☞ SOLD BY ALL DRUGGISTS AND DEALERS.

For Female Complaints, whether in young or old, married or single, at the dawn of womanhood or the turn of life, these Tonic Bitters have no equal; are safe and reliable in all forms of disease.

They are a Gentle Purgative as well as a Tonic, possessing in combination the power of acting as a Purgative or Tonic, as the case requires. Being composed in part of Aromatics, they are pleasant to the taste, prevent nausea, relieve Faint and Sick Headache, and are the best remedy in the world for Drunkenness, Nervousness, Derangement of the Digestive Organs, and Liver Complaint.

August 20, 1870—6m.
