THE
EUREKA
FANNING MILL.
The Greatest Invention
OF THE 19th CENTURY!
FARMERS, LOOK TO YOUR INTEREST.

THE attention of Farmers and Mechanics is particularly directed to the combined economy, utility and practicability of the Eureka Mill, and to the many other advantages it possesses over every other Fanning Mill which has been introduced to the public. It is the fruit of long and patient investigation by the inventor, who has made it his constant study for over twenty years. He has secured several patents for Mills, and has always been rewarded with the best of success. But not feeling satisfied with his former attainments, he determined to reach the climax, and he now believes that his new invention will warrant him in exclaiming in the joy of his heart, like the philosopher, Phythagoras, EUREKA, signifying in the Grecian language, "I have found it." This has given the name to this new Mill.

In this Mill are all the former improvements, to which have been added several more, adding still greater advantages than were at first anticipated, or even thought possible by the inventor himself. It embraces the three great essentials necessary in every invention.

It combines Utility, Economy and Practicability!

THE EUREKA MILL

Is small and lighter, and is capable of doing more and better work in a given time than any other Mill ever invented. It is the only Mill that will successfully remove from wheat such pests as Cockle, Garlic, Oats, Rye, &c.

Should an extra quality of grain for seed or gristing purposes be required, it can be so arranged as to catch in one box perfect grain, and in the other, grain fit for market or mill. Here is made a great saving usually lost sight of; for nearly one-quarter of the grain cleaned in the common Mills is lost when sown, on account of shrunken kernels and inferior grain. The Eureka Mill saves all this, and gives seed every kernel of which will grow when put into the ground, and this saving will, in a short time, pay for the Mill.

HINES & BURCHINAL,
Chestertown, Md.,

Owners of the Mill, are having them manufactured at the Sash Factory and Planing Mill of NOLAND & Co., Port Deposit, Md., which is a guarantee they will be put up in the very best manner.
