A Visit to a Marble Quarry.

It has been said of Massachusetts that she owes a large share of her prosperity to her supplies of granite and ice. It might with equal truth be said of Vermont, that much of her material wealth consists in her apparently inexhaustible supplies of marble and slate.

When the Vermont quarries were first opened, it was the aim to obtain very white marble and a kind easily worked. Many of the quarries were near trap dikes, where the whitest marble lies, and the quarrying was greatly facilitated by numerous joints that occur, running parallel with the dikes, but time has proved that marble from such localities contains numerous hidden joints, which upon exposure disfigure the slab, and it often breaks at these joints. Now, beds of fine, close-grained, compact marble, are far the most valuable, but in order to reach such beds a good deal of capital and labor must be expended in removing the overlaying portions that have been injured by atmospheric and other causes. The Vermont quarries produce sound marble of good quality that finds a ready market all over the country.

What is termed "Vermont marble" is principally found in Rutland and Bennington Counties, the most extensive works in the State being at West Rutland. One quarry is roofed over, which prevents rain and snow from interfering with the work.

The beds of all these quarries are so compact, that the marble is obtained by channeling through the blocks. This is done by machines and by hand. To break these channeled blocks the marble is drilled, sometimes by a machine, sometimes by hand. Then wedges are driven in.—This is technically termed "gadding up." Blasting is resorted to, principally for "uncovering"—removing useless overlying material. The detached blocks are hoisted out of the quarry by derricks that are moved by machinery driven by horse-power. The sweep to which the horses are attached is connected with machinery in the building, which moves a wire rope running underground to the derrick. The waste material is hoisted out by the same means and removed to the "dump" in carts.

Until 1804 marble was not sawed in New England, but "sheets" were split off and worked smooth by the chisel. In that year was adopted the plan of ancient marble workers, and marble sawed with a smooth strip of iron with the help of sand and water, a method now universally adopted. In the Rutland mills the saws are worked by steam. They are set in "gangs," and adjusted to saw the blocks into slabs of the required thickness. They work down to the block as fast as cut by a regular feed-motion. The top is kept covered with sand, upon which water continually drips. When the block is sawed it is washed down by the aid of hose. If desired the slabs are turned flatwise, and sawed again to the required width. It takes about forty-eight hours to saw a five-ton block. The saws are of soft iron, and last to do the work upon about two blocks.

The sorting and breaking up of the slabs is termed "coping." The "coper" nicks the two edges, and then breaks the slab across by a slight blow of the hammer. Down in the quarry blacksmiths are kept continually at work mending and sharpening the tools.—*Hearth and Home.*

Horace Greeley Forty Years Ago.

LETTER FROM MR. J. S REDFIELD ON THE WHITE HEADED, SANKY BOY WHO SET TYPE FOR HIM.

From 1831 to 1841, I was carrying on the business of stereotyping at 216 William street, and most of the time was employing a great many compositors. It was in 1832 or '33, I think that being at one time much in need of mere compositors, I asked those in the office to let the fact be known at their respective boarding houses. Among those who applied for work in response to this call was a queerlooking chap brought in by one of the hands in the office. He was of rather more than medium height; his hair was almost white, his face quite so, and entirely beardless, and he walked with a shuffling and uncertain gait. He wore a very old white hat and fustian pantaloons which did not come down for his boots and these completed a personality which I had never before met with in a compositor, and turning to Seymour, who brought him in, I inquired if that fellow was a compositor. He replied, "He's a queer-looking fellow, but they say he's a good workman." Being too much in want of help to be particular about the personal appearance of a compositor, I gave him a case and copy, and you may judge of my surprise when I tell you that his weekly bills exceeded by from 30 to 50 per cent. those of the other compositors by his side who were on the same work. And what was equally remarkable, no matter how rapidly he picked up the type with his fingers, the stream of talk that rolled off his tongue was never interrupted. He talked incessantly. When I made out his first bill I learned that his name was Horace Greeley.

In those days he was a compositor, and he was a good one. When he was a young man he did his work well, and now that he is an old one, and there is a big "take" ahead to give out, I propose that we give it to him.

J. S. REDFIELD.

☞ In Japan the marriage ceremony is very simple. A man and a woman drink wine from the same cup, and the thing is done. Divorce is not a much more elaborate affair. The husband who is dissatisfied with his wife gives her a piece of paper on which a few characters are traced. Being translated, they are about as follows: "I no likee you. I thinkee you likee other man more better. I give you piece a paper. You can go. Goodee-by."

☞ The recent eruption of Vesuvius is said to have completely changed the topography of the mountain. Hills have appeared where, but a short time ago, stones stood for visitors to rest upon.—Precipices have been formed which almost prevent further advance. All is altered; the very shape of the mountain has lost its well-known outlines, and the view is appalling.

VINEGAR BITTERS

VEGETABLE — FREE FROM — PURELY — DE WALKERS — CALIFORNIA — ALCOHOL — EUREKA — VINEGAR BITTERS

J. WALKER, Proprietor. R. H. McDONALD & Co., Druggists & Gen. Agents, San Francisco, Cal. and 32 Commerce St., N.Y.

MILLIONS Bear Testimony to their Wonderful Curative Effects.

Vinegar Bitters are not a vile **Fancy Drink,** Made of **Poor Rum, Whiskey, Proof Spirits and Refuse Liquors,** doctored, spiced and sweetened to please the taste, called "Tonics," "Appetizers," "Restorers," &c., that lead the tippler on to drunkenness and ruin, but are a true Medicine, made from the Native Roots and Herbs of California, **free from all Alcoholic Stimulants.** They are the **GREAT BLOOD PURIFIER and A LIFE GIVING PRINCIPLE,** a perfect Renovator and Invigorator of the System, carrying off all poisonous matter and restoring the blood to a healthy condition. No person can take these Bitters according to directions and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and the vital organs wasted beyond the point of repair.

They are a Gentle Purgative as well as a Tonic, possessing, also, the peculiar merit of acting as a powerful agent in relieving Congestion or Inflammation of the Liver, and of all the Visceral Organs.

FOR FEMALE COMPLAINTS, whether in young or old, married or single, at the dawn of womanhood or at the turn of life, these Tonic Bitters have no equal.

For Inflammatory and Chronic Rheumatism and Gout, Dyspepsia or Indigestion, Bilious, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys and Bladder, these **Bitters** have been most successful. **Such Diseases** are caused by **Vitiated Blood,** which is generally produced by derangement of the **Digestive Organs.**

DYSPEPSIA OR INDIGESTION, Headache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour Eructations of the Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the regions of the Kidneys, and a hundred other painful symptoms are the offsprings of Dyspepsia.

They invigorate the Stomach and stimulate the torpid Liver and Bowels, which render them of unequalled efficacy in cleansing the blood of all impurities, and imparting new life and vigor to the whole system.

FOR SKIN DISEASES, Eruptions, Tetter, Salt Rheum, Blotches, Spots, Pimples, Pustules, Boils, Carbuncles, Ring-Worms, Scald Head, Sore Eyes, Erysipelas, Itch, Scurfs, Discolorations of the Skin, Humors and Diseases of the skin, of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of these Bitters. One bottle in such cases will convince the most incredulous of their curative effect.

Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions or Sores; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul, and your feelings will tell you when. Keep the blood pure, and the health of the system will follow.

PIN, TAPE, and other **WORMS,** lurking in the system of so many thousands, are effectually destroyed and removed.

SOLD BY ALL DRUGGISTS AND DEALERS.

J. WALKER, Proprietor. R. H. McDONALD & CO., Druggists and Gen. Agents, San Francisco, Cal., and 32 and 34 Commerce Street, New York.

Ayer's

Cherry Pectoral,

For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Bronchitis, Asthma, and Consumption.

Among the great discoveries of modern science, few are of more real value to mankind than this effectual remedy for all diseases of the Throat and Lungs. A vast trial of its virtues, throughout this and other countries, has shown that it does surely and effectually control them. The testimony of our best citizens, of all classes, establishes the fact, that CHERRY PECTORAL will and does relieve and cure the afflicting disorders of the Throat and Lungs beyond any other medicine. The most dangerous affections of the Pulmonary Organs yield to its power; and cases of **Consumption,** cured by this preparation, are publicly known, so remarkable as hardly to be believed, were they not proven beyond dispute. As a remedy it is adequate, on which the public may rely for full protection. By curing **Coughs,** the forerunners of more serious disease, it saves unnumbered lives, and an amount of suffering not to be computed. It challenges trial, and convinces the most sceptical. Every family should keep it on hand as a protection against the early and unperceived attack of Pulmonary Affections, which are easily met at first, but which become incurable, and too often fatal, if neglected. Tender lungs need this defence; and it is unwise to be without it. As a safeguard to children, amid the distressing diseases which beset the Throat and Chest of Childhood, CHERRY PECTORAL is invaluable; for, by its timely use, multitudes are rescued from premature graves, and saved to the love and affection centred on them. It acts speedily and surely against ordinary colds, securing sound and health-restoring sleep. No one will suffer troublesome **Influenza** and painful **Bronchitis,** when they know how easily they can be cured.

Originally the product of long, laborious, and successful chemical investigation, no cost or toil is spared in making every bottle in the utmost possible perfection. It may be confidently relied upon as possessing all the virtues it has ever exhibited, and capable of producing cures as memorable as the greatest it has ever effected.

Practical and Analytical Chemists,

SOLD BY ALL DRUGGISTS EVERYWHERE.

Ayer's

Hair Vigor,

For restoring to Gray Hair its natural Vitality and Color.

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. *It soon restores faded or gray hair to its original color, with the gloss and freshness of youth.* Thin hair is thickened, fallen hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed; but such as remain can be saved by this application, and stimulated into activity, so that a new growth of hair is produced. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning grey or falling off, and consequently prevent baldness. The restoration of vitality it gives to the scalp arrests and prevents the formation of dandruff, which is often so uncleanly and offensive. Free from those deleterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a HAIR DRESSING, nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich, glossy lustre, and a grateful perfume.

Prepared by Dr. J. C. Ayer & Co.,

Practical and Analytical Chemists,

THE

EUREKA

FANNING MILL.

The Greatest Invention OF THE 19th CENTURY!

FARMERS, LOOK TO YOUR INTEREST.

THE attention of Farmers and Mechanics is particularly directed to the combined economy, utility and practicability of the Eureka Mill, and to the many other advantages it possesses over every other Fanning Mill which has been introduced to the public. It is the fruit of long and patient investigation by the inventor, who has made it his constant study for over twenty years. He has secured several patents for Mills, and has always been rewarded with the best of success. But not feeling satisfied with his former attainments, he determined to reach the climax, and he now believes that his new invention will warrant him in exclaiming in the joy of his heart, like the philosopher, Plythagoras, EUREKA, signifying in the Grecian language, "I have found it." This has given the name to this new Mill.

In this Mill are all the former improvements, to which have been added several more, adding still greater advantages than were at first anticipated, or even thought possible by the inventor himself. It embraces the three great essentials necessary in every invention.

It combines Utility, Economy and Practicability!

THE EUREKA MILL

Is small and lighter, and is capable of doing more and better work in a given time than any other Mill ever invented. It is the only Mill that will successfully remove from wheat such pests as Cockle, Garlic, Oats, Rye, &c.

Should an extra quality of grain for seed or gristing purposes be required, it can be so arranged as to catch in one box perfect grain, and in the other, grain fit for market or mill. Here is made a great saving usually lost sight of; for nearly one-quarter of the grain cleaned in the common Mills is lost when sown, on account of shrunken kernels and inferior grain. The Eureka Mill saves all this, and gives seed every kernel of which will grow when put into the ground, and this saving will, in a short time, pay for the Mill.

HINES & BURCHINAL,

Chestertown, Md.,

Owners of the Mill, are having them manufactured at the Sash Factory and Planing Mill of NOLAND & Co., Port Deposit, Md., which is a guarantee they will be put up in the very best manner.

June 17, 1871—tf.
