HINTS TO FARMERS.

Cows and Butter.

Cows should have daily exercise and a neverfailing supply of fresh water at the barn if possible. They should have a small quantity of salt daily. When they are kept in the barn, they should have all the feed they will eat up clean twice a day, and should be fed from six to eight o'clock in the morning and from three to five in the afternoon. They should have all the water they will drink after each foddering, but they should never be allowed to drink ice water. Good, early cut, upland hay should form the basis of their food, supplemented with silage, corn fodder, or any other good, sweet fodder. They should have grain twice a day while giving milk. One quart of corn meal, one quart of cotton-seed meal and two quarts of shorts make an excellent ration. If one objects to silage, a good supply of roots should be furnished, and of these carrots and parsnips are best. Cows should be thoroughly cleaned every day with a card and stiff brush; the brush should be used most. Milk just before feeding in the morning and just after watering in the evening, dividing the time as nearly as possible. 'Regularity' should be written in a conspicuous place and strictly adhered to, as cows are very sensitive about being fed, watered, and milked at regular intervals. No one who is not gentle and kind should ever be allowed to handle the cows. They should have a steady milker. Their udders should be thoroughly wiped with a cloth before being milked. Do not brush them immediately before milking, as the operation would fill the air with dust, which in settling would get into the milk. Never use a wooden pail for milk; tin is much better. As soon as possible after it has been drawn strain the milk through a fine wire and a cloth strainer, and cool it at once. Never allow the cows to be run or hurried. Each cow's milk should be thoroughly tested, to ascertain her value as a butter cow. One will be apt to find that some of his best looking cows that give a good flow of milk are nearly worthless as butter producers. If a cow will not make at least 250 pounds per year with the above treatment she should be discarded at once. Cows should go dry from four to eight weeks, as they need a rest, and their milk should not be used when nearing the time of parturition. Most butter should be made in winter, as the demand is then greater and the price higher. By using a thoroughbred male of whatever breed one prefers, and raising the heifer calves from the best cows, the herd can be improved to a great extent, and the butter production be largely increased.

Eggs and Hens.

It must be borne in mind that the most profitable system of keeping fowls involves four things, viz.:—1. Crowding in winter for the sake of warmth. 2. Plenty of room or fewer fowls in summer. 3. Very early hatched pullets for winter layers. 4. Constant attention as to regularity of food, cleanliness, pure water, the dust bath, etc.

People who have hens, must be distinguished from those who keep fowls. Most of what is written is intended for the latter class, and these are encouraged to become fanciers—a poor plan, as a rule. The beginner should learn to keep fowls with profit; then he may adopt a breed which he likes and become a fancier, but in nine cases out of ten there will be no profit in it.

Our supply of eggs in winter is very limited, and it may be safely predicted that the demand for fresh eggs will be insatiable for years to come. The people who should raise eggs in winter are those who do not and who will not; for there is no duller class of people in the community, with reference to matters which require thought and change of plan, or any plan at all, than farmers—that is, those who have hens.

The difference between an egg laid by a plump, healthy hen, fed with good, fresh food daily, and an egg laid by a thin, poorly fed hen is as great as the difference between good beef and poor. A fowl fed on garbage and weak slops, with very little grain of any kind, may lay eggs, to be sure, but when those eggs are broken to be used for cake, pies, etc., they will spread in a weak watery way over your dish, or look a milky white instead of having a rich, slightly yellow tinge. A 'rich egg' retains it shape as far as possible and yields to the beating of the knife or spoon with more resistance and gives you the conviction that you are really beating something thicker than water or diluted milk.

Keeping Sheep.

There are but few farms where it will not pay to keep at least a few sheep, and the smaller the flock, as a rule, the greater the proportion of profit realized therefrom. If it will pay to raise common sheep it will surely pay to raise thoroughbred ones, and what breed it will be best to have depends entirely on circumstances and surrounding, such as location, soil, nature of the land, nearness to market, &c. When the land is rough and hilly, and where it is also comparatively cheap and distant from market, the famous Merinos will be sure to do well, as they are hardy, vigorous, prolific and produce good salable fleece. Where heavy weights, both of carcass and fleece, is desirable we recommend the Cotswold, though they are not so sturdy as the Merinos.—*New York Herald.*

BULLS need exercise in order to attain their best development. They are commonly kept inactive and without training, and so become vicious and dangerous, as well as losing in part the power to get strong and vigorous calves. A bull that is worked in the yoke, or is trained in some other way, is seldom ugly or dangerous, and is likely to beget calves of greater vitality than when made sluggish by confinement. Valuable thoroughbred bulls sometimes receive necessary training and exercise, but lower grades seldom have any attention of the kind, though they need it in an equal degree.

THE tenacity with which people able by their early faith in Ayer's Sarasparilla can only be explained by the fact that it is the best blood medicine ever used, and is not approached by any new candidate for public favor.

ST. JACOBS OIL

E. FERRETT, 372 Pearl St., N.Y.

WARREN LELAND,

whom everybody knows as the successful manager of the

Largest Hotel Enterprises

of America, says that while a passenger from New York on board a ship going around Cape Horn, in the early days of emigration to California, he learned that one of the officers of the vessel had cured himself, during the voyage, of an obstinate disease by the use of

Ayer's Sarsaparilla.

Since then Mr. LELAND has recommended AYER'S SARSAPARILLA in many similar cases, and he has never yet heard of its failure to effect a radical cure.

Some years ago one of Mr. LELAND'S farm laborers bruised his leg. Owing to the bad state of his blood, an ugly scrofulous swelling or lump appeared on the injured limb. Horrible itching of the skin, with burning and darting pains through the lump, made life almost intolerable. The leg became enormously enlarged, and running ulcers formed, discharging great quantities of extremely offensive matter. No treatment was of any avail until the man, by Mr. LELAND'S direction, was supplied with AYER'S SARSAPARILLA, which allayed the pain and irritation, healed the sores, removed the swelling, and completely restored the limb to use.

Mr. LELAND has personally used

Ayer's Sarsaparilla

for Rheumatism, with entire success; and, after careful observation, declares that, in his belief, there is no medicine in the world equal to it for the cure of Liver Disorders, Gout, the effects of high living, Salt Rheum, Sores, Eruptions, and all the various forms of blood diseases.

We have Mr. LELAND'S permission to invite all who may desire further evidence in regard to the extraordinary curative powers of AYER'S SARSAPARILLA to see him personally either at his mammoth Ocean Hotel, Long Branch, or at the popular Leland Hotel, Broadway, 27th and 28th Streets, New York.

Mr. LELAND'S extensive knowledge of the good done by this unequalled eradicator of blood poisons enables him to give inquirers much valuable information.

Blooded Stock.

For sale by E. J. Plummer, Worton Md., as agent for the well-known importers and breeders, N. P. Boyer & Co., of Chester county Penn

Seventy-five head of Jersey Heifers in calf, for Sale Cheap.

To make room for new importations we will sell sevensy-five head of pure blood Jersey Heifers in calf, at $85 to $125 each, as to age, style and cariiness in calving. They are all very large and handsome, good colors and finely developed in all points that go to make up a first-class dairy cow, for butter or milk. Are all from first-class thoroughbred Jersey cows, making 14 to 17½ pounds of butter per week, and are served by solid colored Herd Registered Jersey bulls. Due to calve in March, April, May and June.

These heifers are all sired by the celebrated Herd Registered Jersey Bulls, Lord Darnley No. 3730 Lowrie No. 2484, and Earl of Willow Glen No. 2843; all solid color, full black points. They have been served by Imported Devon bull No. 7910 (of the celebrated Cocmassie strain), one of the best young Jersey Bulls that ever left the Island. Rapier No. 3743, Winsome Boy No. 5496, Maurus No. 4639, and Hercy Douglas No. 3769. These bulls are all from the very deepest milking strains, and from the very best butter families. Solid colors, full black points. They cannot fail to produce very fine calves.

Carefully boxed, delivered on board the cars, free, with feed, &c., for their trip, warranted to reach purchasers safe. Also, for sale, thoroughbred and imported sheep; thoroughbred and imported hogs; improved breeds of poultry. Full information as to prices may be had upon inquiry of

ALABASTINE

A Superior Substitute for Kalsomine, etc.

Alabastine is the *first* and *only* preparation made from calcined gypsum rock, for application to walls with a brush, and is fully covered by patents and perfected by many years of experiments. It is the only permanent wall finish, and admits of applying as many coats as desired, one over another, to any hard surface, without danger of scaling, or noticeably adding to the thickness of the wall, which is strengthened and improved by each additional coat, from time to time. It is the only material for the purpose not dependent upon glue for its adhesiveness. Alabastine is hardened on the wall by age, moisture, etc., while all kalsomines or whitening preparations have inert soft chalks and glue for their base, which are rendered soft or scaled in a very short time.

In addition to the above advantages, Alabastine is less expensive, as it requires but one-half the number of pounds to cover the same amount of surface with two coats, is ready for use by adding water, and easily applied by any one.

For sale by your Paint Dealer. Ask for Circular containing Samples of 12 tints, manufactured only by the ALABASTINE Co., M. B. CHURCH, Manager, Grand Rapids, Mich.

MAY 22. 1884.

Elliott & Gemmill's

Farmers' Agency

Will furnish at short notice and Bottom Prices, any Implement manufactured in the United States.

We make a specialty of the Iron Turbine Wind Mill, manufactured by Mast, Foos & Co.; also, the Buckeye Force Pump, especially adapted to deep wells and forcing water.

Any one needing a Wind Mill we say try a Turbine. They are strength and durability itself. We control this Mill for the county, and have no sub-agents. Will make prompt estimates for any one desiring a Mill.

We would also call the attention of Farmers to our

NEW BUCKEYE GLASS FEED FERTILIZER DRILL,

which we pronounce, after thorough testing it last season, to be the best combined Grain and Fertilizer Drill ever offered to the trade. Our reasons are—

First, It is a perfect Wheat Seeder

Second, You have no cog wheels to take off or put on to chance quantities.

Third, With the Glass Feed for Phosphate you can sow any quantity of Fertilizer without clogging, gumming or pasting, from 100 to 500 lbs., and can make the changes while walking along.

Fourth, Both wheat and phosphate are distributed within plain view of the operator.

Fifth, It has double force feed for wheat, which makes it sow regular in whatever position it may be placed, especially when seeding side hills. All other drills will seed more or less according to position.

Call and examine it before buying, it will pay you.

Farmers clubbing together can make it pay.

Remember we have no sub-agents Save money by giving us your orders direct.

We have in use in Queen Anne's county eighty-three of the Buckeye Drills. In 1882 we sold there 28; in 1883 we sold 55.

WM. A. ELLIOTT,
Chestertown, Md., Agent for Kent county.
