Champion Binders and Mowers
the Old, Strong and Reliable.
I am better prepared to do all kinds of REPAIR WORK than ever before.
JOS. C. WATERS.

SPRING OF 1894.
After a successful experience of 19 years in the manufacture of Fertilizers, we confidently refer you to our record, and earnestly solicit your patronage. An article that has been sold 38 seasons in succession, with an increased sale each spring and fall, and our sales the past year larger than ever before, ought to convince the most skeptical as to the merits of our goods, and that they must have superior quality and absolute uniformity and purity.
PEERLESS!
Our CORN and TOMATO Phosphate
The leading farmers and canners throughout New Jersey, Delaware and Maryland, speak in its highest praise, declaring it to be positively THE CHEAPEST, THE SAFEST and THE BEST in use. Once a trial, always a patron. Wouldn't it be a good idea for you to try them? Farmers who have not tried our Tomato Phosphate will consult their interest by doing so upon their next crop. Many farmers think that all Phosphates are alike, but a fertilizer apparently the same by analysis on paper may show a vast difference when tested on the soil.

CHESTERTOWN, MD., 1893.
T. R. HUBBARD & SON—GENTLEMEN:—Yes, the ton of your Tomato Phosphate purchased of you and used last year, did well. I had my tomatoes in a young pear orchard of one-year-old trees. I applied the Phosphate by sowing broadcast and cultivating it in. The fruit was large, smooth and perfect, and whilst it is almost incredible, feel sure that my yield was 16 tons to the acre, but I know that Lamotte paid me for over 15 tons per acre. I know it did splendidly for me.
R. S. EMORY.

CHESTERTOWN, MD., Jan. 2, 1894.
GENTS:—In reply to your question as to my opinion in regard to your Tomato Goods, must say it is a good goods from the fact the finest Tomatoes grown and brought to my cannery were grown with your Phosphate. I remember one of my growers would bring some loads that were particularly fine, while others were not. I asked what made the difference, and he replied Hubbard's was used on the best, while another that cost more money, on the others. I believe your Tomato Phosphate to be an excellent article.
JOSEPH DOWNEY.

FOR POTATOES.
Our "Special Potato Manure" has been used for years in competition with Mapes, Yarnell's and Baughs, in fact, all the high grade goods on the market.
For General Truck
We make a Special Truck Phosphate that contains all the required elements of plant food. One fair and impartial trial, will convince the most skeptical as to its merits.
FOR OATS,
Use our Special Oat Fertilizer, which has stood the test now for years. One patron claims to have grown 61½ bushels per acre with it.
FOR GRASS.
As a top dressing for grass, our Phosphate has no equal, but it should be applied in February or March if possible.

There Are Your Peach Trees.
As the world grows older and its people wiser, there is a growing demand for better and more perfect quality of goods of all kinds. The people to-day are not content with the manner in which their ancestors fertilized their orchards, but are striving to reach the heights of perfection. Finally, T. R. Hubbard & Son offered O. B. Guano, a natural bird manure found in the West Indies, and introduced here after their senior's return from that place in 1882. This goods is the base of their Fruit Grower. In appearance it looks like old peruvian. In analysis it runs higher than dissolved animal bone. In action has eclipsed all competitors. In sales more than any other Peach manure in the world. Then taking into consideration the quality, price, guarantee, our success, satisfied patrons, increased trade, our reputation, together with the fact that you have this season the prospect of a crop, we think further comment from us unnecessary, as a trial will convince you that the goods speak for themselves.
T. R. HUBBARD & SON.,
Chestertown, Md., Manufacturers of Standard Bone Fertilizers.

Poultribina.
Poultribina,
The great Poultry remedy.
Poultribina,
The great Preventative of disease in poultry.
Poultribina,
The great Powder that will make your Chickens grow large, your Hens lay better and your Little Chicks bring better market prices—all this for 25c.
We can produce testimonials from the best poultry raisers in Kent to prove the truth of our statement.
COLIN F. STAM,
April 20, 1893. PROPRIETOR.

THE EQUITABLE
Life Assurance Society

SUNSHINE.

BY CLARA THWAITES.

Open your heart to the sunshine,
Waft your cares to the wind,
The sorrows of winter are over,
Its storms and tempest behind.

The glittering tide is rippling
Into each creek and bay,
The fresh sea-breeze is blowing,
And the earth is glad to-day.

Rejoice, as the flower rejoiceth
In her chrism of morning dew;
Rejoice, as the bird that soareth
Into the infinite blue.

Let not the tears of to-morrow
Trouble to-day's sweet calm,
Open your heart to the sunshine,
Drink in its blessed balm.

Listen to spring's gay rapture,
Blithe are her songs without words,
The earth is yours in its gladness,
The heavens and the songs of birds!

THE STRAWBERRY.

How to Prepare the Queen of Berries for the Table.

SPONGE CAKE WITH STRAWBERRY FILLING.

Bake a plain sponge cake in two tins. Mash one coffee cup fine berries with one cup powdered sugar and the white of one fresh egg beaten stiff. Beat all together fifteen minutes and put between the layers and on top.

Slices of any plain cake may be utilized in this way by placing one piece flat on a saucer or fancy plate and spreading with filling, put another slice on this and spread as before. If the cake is very dry use another white of egg in a spoonful of thick, sweet cream.

PRESERVED STRAWBERRIES IN JELLY.

One quart red currant jdice; two pounds granulated sugar; boil slowly twenty minutes, then drop in, one at a time, a pint of ripe wild strawberries, which are clean and unbroken. Boil gently four minutes, then pour into glasses, carefully distributing the berries. The next day cover with a thin layer of melted paraffine, or tie over thick paper wet in white of egg. Store in a cool, dry place.

STRAWBERRY DUMPLINGS.

Make a fine paste as for pies, and cut out rounds with a saucer. Do not have the paste too thin, about one-third of an inch. Put on each piece one-half cup strawberries and one teaspoonful sugar. Fold over the paste and fasten together like a turnover. Bake in a dripping pan and serve with

STRAWBERRY MOUND.

Put a quart of berries and a pint of sugar in a dish and let stand in the sun all day to extract the juice. Mash and strain off this juice of which there should be three cups full, and put on to boil; then add one-half box gelatine soaked for two hours in one pint cold water and the juice of a lemon. Let this mixture boil up once, and then strain twice through a flannel bag. Pour in a two-quart mold enough of the jelly to make a half inch. When cold set in this mold another a size smaller, and pour in sufficient jelley to fill the the space between. Set on ice till firm, and then fill the inner mold with warm water so it can be removed. Fill the cavity with large berries, well sweetened, and pour over them in the remainder of the jelly. This must be set in the ice box over night to cool and grow firm. Pour a little warm water over the mold, and turn out in a suitable dish; garnish with whipped cream and a wreath of some green leaves.

STRAWBERRY TART.

Line with paste two deep, medium-sized pie plates, fill with strawberries and sweeten. Put on the cover as usual but do not fasten down the edge. Bake carefully. When done lift the top crust, which must be somewhat thicker than usual and spread over the following mixture: One cup nice, new milk heated to boiling; whites of two eggs beaten light and stirred into the boiling milk; one tablespoonful white sugar mixed with one scant teaspoonful corn starch wet in three tablespoonfuls cold milk. Boil all together a few minutes, and when cold spread over the tarts before replacing the crust. Dust with sugar before serving.

STRAWBERRY PUDDING SAUCE.

One box strawberries; one and one-third cups powdered sugar; one and one-half tablespoonfuls of butter. Beat sugar and butter to a cream. Add the berries, a few at a time, and beat till well mixed. This is excellent with any light pudding.

STRAWBERRY SHRUB.

Over nine pounds fresh berries pour three quarts best cider vinegar; let it stand twenty-four hours, bring to a boil and strain. To every pint of juice add a pint and a half of granulated sugar. Boil together for five minutes and strain. Put in self-sealing pint cans. To use add a tablespoonful or two to a glass of ice water. This drink is very grateful to the sick, and the well seldom refuse it.

BAKED BANANAS.

Pull off one side of husk. Loosen the fruit from the husk. In a groove scraped on top of the bananas put chopped almonds or candied fruit. Pour over it a syrup of sugar and water flavored with lemon and orange juice. Bake and serve in husks.

Some Large Figures.

St. Peter's Church in Rome will contain 54,000 persons.

It would take about 1,200 globes as large as our earth to make one equal in size to Jupiter.

The extreme breadth of Texas is 760 miles and its extreme length 620.

The Sierra Nevada range of California is nearly 500 miles long, 70 wide and from 7,000 to nearly 15,000 feet high.

It is said that a frigate bird can fly at the rate of 100 miles an hour, and live in the air a week at a time, day and night, without touching a roost.

Neptune takes 165 years in making its journey around the sun, so that more than a century would have passed away on our earth before it had completed one year.

The aerial space within the limit of our vision is calculated to have a diameter of 420,000,000,000 miles, and a circumference of 1,329,000,000,000 miles. And this is only a fragment of the immensity of space.

Misplaced.

It is a curious fact that success is sometimes won by those who have no enthusiasm for the profession they follow. Fanny Kemble was by no means fond of acting, and would gladly have left the stage earlier, had not circumstances bound her there.

A brilliant young violinist played one day for Mrs. Gladstone, and the latter said to her:

"Is there anything you care more for than your Stradivarius?"

The young lady colored a little. "The violin is not an absorbing passion with me," she replied, modestly.

"Perhaps you have artistic talent?" the hostess suggested.

"Indeed, I have not," was the honest response. "But, Mrs. Gladstone, I love to cook. I really believe I could make a chef, if I had the opportunity to practice!"

THE summer days that are to come!
Oh, what a precious boon!
The maiden in her outing suit
Will have her inning soon.

A $35,000 Fee.

The Shah of Persia has sent for Dr. Galezowski, the celebrated oculist, who has consequently left Paris for Teheran, where he will reside for three months. The Shah has twice profitably consulted the doctor, and now desires him to attend the heir to the throne, who is suffering from opthalmia. The Shah pays the oculist $35,000, likewise all the expenses of his journey out and home, also his maintenance during his stay in the Persian capital.—*Paris letter in the London Court Journal.*

A RESOLUTE, determined look
The good wife's face now wears,
She's fully bent on cleaning house,
However much "he" swears.

The White Ape.

Herbert Ward, the African explorer, tells a story, the point of which is rather against himself. He had been chaffing some of the natives, declaring that they were direct descendents from monkeys, alleging their dark color as one of the evidences. "One old fellow went quietly over to a captive ape," says Mr. Ward, "and tunred back the ape's fur. Then he looked quizzically at me. The ape's skin was white."
