Scotch Lawns.....4c. "
We have also some pretty Dress Patterns in higher grade Organdies, Lawns, Dimities, Percales, etc., that are great bargains for the money. All of the above named articles are offered by
MRS. S. A. HURLOCK,
Cor. High and Queen Streets.

A DISSERTATION ON TOMATOES.

Before the death of the renowned Chemist, Dr. G. A. Liebig, (we having had a large trade among the Harford county canners) our Mr. Hubbard went to see the doctor to know how to make a good Fertilizer for Tomatoes. He started out by saying: "Eighty seven per cent. of a Tomato is water, and in the event of dry weather, when your Tomatoes are croping unless you have a goods that is adapted to the crop, you cannot expect a large yield. Whilst an ordinarily compounded Phosphate would do some good, a specially compounded Phosphate would do a great deal more good, and it is the easiest thing in the world to make a difference of several tons per acre by proper fertilization and cultivation. Tomatoes are apt to blight unless the Phosphate is all right. What causes blight is the insect in the soil, either from a former crop, or is there naturally, and if the plant does not move off at once as soon as planted, the insect comes up, attacks the underneath leaves, they drop off, they go on up the vine and consequently permanently injured. Whereas, if you had a Phosphate like our Tomato goods, with three sources of ammonia. 1st. Nitrate of Soda, which is crystalized ammonia, acts at once. Then next in order the acidulated fine ground fish, and last the animal matter on the animal matter, ammonia by decomposition, which furnishes plant food while your patch is cropping. The Phosphoric Acid is largely from Dissolved Animal Bone. And the Potash, well—it is from two sources of Sulphate, one double Sulphate 90 per cent., the very nature of which is to attract moisture as well as be the finest form of plant food in the world, and the Tomatoes do not have a chance to blight."
We replied to the doctor that we were sure that his advice was good, and that the goods would be O. K., but it would cost money to make a goods like that, and he said: "Hubbard, what's that to a farmer if he puts a dollar or two more on an acre and gets $12 or $15 more in return?" Well, we took his advice and are making our Tomato Phosphate as above described, and it has an enviable reputation.
Yes, we have heard some unsatisfactory reports, but have never heard of one but what upon investigation found the goods had been improperly applied. The ground not adapted, the seed not good, or something.
We do know, however, of a fact that many of our competitors would like to get the proportions of our formula. Making a Tomato Phosphate is like many ladies trying to make Maryland biscuit. You can have the flour, lard, salt, etc., but unless you know the proportions and how to knead the batch and have your oven the proper temperature, the biscuit will not be a success.
You need, however, soil adapted, humus in the soil, either in the form of barnyard or good vegetable matter turned under ahead and decomposed, and the Phosphate applied ahead. If you are going to grow Tomatoes and have not received one of our Leatherette Pocket Diaries for 1899, containing calendar, memoranda, useful tables, how to plant and grow Tomatoes, write us, and we will send you one.

What Some of Our Patros Say.

Capt. C. R. Dashiel says: Peerless would be cheap at $50.00 per ton on Tomatoes.
Messrs. Chas. Ross and C. Weedman, near Sudlersville, says: Their Tomatoes last year were splendid, big crop, good fruit, and that, too, on poor land.
Senator Wm. T. Hepbron, says: Your Tomato Phosphate is the best I ever saw. I have used it now for a number of years and always have a crop; even last year I had from 11 to 12 tons per acre all over. I want more.
Capt. R. S. Emory says: On one occasion he grew over 16 tons per acre with it.
Mr. Geo. W. Collins, of Magnolia, Del., says: It beats the world, used our goods on three farms. On one he got 12 tons, on another 15 and another 16 tons per acre in 1897; said his tenants got tired picking and hauling, they had so many. The above is his address. Write him.
Baker & Morgan, the great canned goods people purchased over $1000 worth last spring.
J. R. Leager, Chesw ld, Del., got at the rate of 13 tons per acre last year and year before.
We also refer you with pleasure to Dr. F. N. Sheppard and J. W. Boggs, of Crumpton, who have used it with success.
Mr. Zac. T. Gilbert grew over 19 tons per acre with our goods.
Mr. Clay Stevens, near Crumpton, says: He has tested it with others and has always done splendidly for him; he realized $50.00 an acre in 1897, and last year had the best in the neighborhood.
Joseph Downey, Rock Hall, says: He could actually tell the difference in the Tomatoes grown and brought to his cannery that were grown with Peerless.
D. F. Loose, Cheswold, Del., got 3 tons more per acre than from another goods costing $5.00 more per ton.
S. M. Taylor, (the representative) of Kenton, Del, says: He not only had a big crop, but his Tomatoes did not blight and all his neighbors did.

☞ If you are going to grow Potatoes, Fertilize your Corn, Feed your Peach and Pear Trees, Ton Dress your Grass, Sow Oats or anything that will require Phosphates, SEE OR CORRESPOND WITH US, and we will save you money.
T. R. HUBBARD & SON,
WILBUR W. HUBBARD,
MANUFACTURERS, CHESTERTOWN, MD.

FARMERS AND LAND OWNERS
Why not Look to Your Interest
In the Improvement of your lands, while grain is a good price and the indications have an upward tendency. Does it pay to let your land sour and degenerate for want of a stimulant? We answer no. The question arises how are we to get the best results from our crops and at the same time raise the standard of our land? We answer by the use of lime. Well, what Lime do you think will give the best results? We think
The Celebrated Kerr's Wrightsville Lime,
which has stood the test for many years by our oldest and most prosperous land owners. We can furnish you with other limes as you may wish, all of which will be delivered to any station on the Balto. & Del. Bay R. R. at short notice on reasonable terms. Last but not least is the well known
Standard Lime and Stone Company's Lime,
which has been the greatest selling Lime on the market; this Lime runs 97 per cent. of pure Carbonate of Lime. We can deliver this Lime by water to any point on the Chesapeake Bay or tributaries on reasonable notice. We would be pleased to have you call on or write us before placing your orders.
COAL AND WOOD.
Building and White Wash Lime, Cements, Baled Hay, Roofing Felt and Terra Cotta Piping, all of which will be sold at city price. Hoping you may favor us with your orders and we will promise to try and please you. Thanking you for past favors, I remain, yours for business,
J. D. BACCHUS,
March 3, 1898. CHESTERTOWN, MD.

W. A. HYLAND,
GALENA, MD.,
Manufacturer and Dealer in
FARM IMPLEMENTS,
has to present to his friends and patrons a full line of such goods as are seasonable to supply the trade at all times of the year. We have
PLOWS
of the best and most popular make, and
PLOW CASTINGS
to fit all the leading Plows in use.
Disc, Spring and Peg-Tooth Harrows
which we guarantee equal to any, and at prices which will greatly interest you. We make a specialty of
The Celebrated Hyland Roller,
which is manufactured at our own works under our personal supervision, and we warrant them well made of good material. The design of the Roller has never been improved upon, and we think we are justified in our claims that this is the best Roller built to-day.
Save Time, for Time is Money.
One of the most tiresome jobs on the farm in former days can now be done while riding pleasantly along in a comfortable seat. We refer to the cultivation of the corn crop. By the use of the
Improved SULKY CULTIVATOR
One man can accomplish more work than two with the old 5-tooth, and can do it far better. We have secured a new style Spring-Tooth Sulky which excels anything now on the market, and which we are selling, to introduce them, at a very low price. Come and examine this tool and get our quotations. We can also furnish you the well-known "Iron Age" Sulky Cultivator from our stock at rock bottom prices.
The Deering Binders, Mowers, Rakes
AND TWINE
are the leaders in this line throughout the world, and we have represented them here for the past 19 years with the greatest satisfaction to ourselves and patrons. These goods for 1899 are better than ever before, and although steel, and all material has advanced 25 per cent. or more, we can still fill your orders at the most moderate prices, and give you better service than any agent in the county, for we have the BEST EQUIPED REPAIR SHOPS, and can do all kinds of Repairing at the shortest notice, and in the most satisfactory manner. Having one of the
BEST HORSE SHOERS
in the State, we will give your horse careful attention if brought to us. We have been established in Galena for
OVER THIRTY YEARS,
which is an assurance that we are here to stay, and if you will call here we will supply your wants in our line at short notice, and at the lowest prices. Your patronage of the years past has been greatly appreciated, and hoping that you will continue with us, thank you in advance for same.
Yours respectfully,
W. A. HYLAND, Galena, Md.

The Falling Leaves Give Warning of Winter
So the falling of the hair tells of the approach of age and declining power.
No matter how barren the tree nor how leafless it may seem, you confidently expect leaves again. And why?
Because there is life at the roots.
So you need not worry about the falling of your hair, the threatened departure of youth and beauty. And why?
Because if there is a spark of life remaining in the roots of the hair
AYER'S HAIR VIGOR
will arouse it into healthy activity. The hair ceases to come out: it begins to grow: and the glory of your youth is restored to you.
We have a book on the Hair and its Diseases. It is free.
The Best Advice Free.
If you do not obtain all the benefits you expected from the use of the Vigor, write the doctor about it. Probably there is some difficulty with your general system which may be easily removed. Address,
DR. J. C. AYER, Lowell, Mass.

USEFUL SUGGESTIONS.

When a Person Faints—The Ideal Way to Drink Milk.

First of all, loosen every tight thing round the neck and abdomen—that is, unfasten the collar and undo the corsets. Allow all the fresh air possible, do not crowd round, and, if in a crowded place, carry the patient into the open air or to an open window. A fainting person should always be laid down flat upon the back, and it greatly aids recovery if the head can be placed lower than the body, so that blood goes readily to the brain. The principal cause of fainting is that the brain is deprived of sufficient blood, and if the head is placed low the brain can get its share again and so resume its workings. Cold water sprinkled over the face or the sensatory nerves excited by the application of smelling salts or strong vinegar to the nose help to restore consciousness. The face may be also gently fanned.

In an ordinary case consciousness returns in a moment or two. The custom of giving brandy or other spirits is quite unnecessary. Allow the patient to come to and then let her slowly drink a cupful of cold water. Those who are subject to fainting attacks must keep away from close, hot, unventilated places either of devotion or amusement. They should not take Turkish baths or even hot baths. In place of the latter they may have a sponge all over with hot water. Heavy and indigestible foods must be avoided and also all mental or physical strain.

In taking milk sip it slowly. Allow four minutes at least to finish a tumblerful and take only a good teaspoonful at one sip. This is the ideal way in which to drink milk. When milk finds its way into the stomach, it is instantly curdled. If you drink a large quantity at once, it is curdled into one big mass, on only the outside of which the juices of the stomach can work. If you drink it in little sips, each sip is curdled up by itself, and the whole glassful finally finds itself in a loose lump, made up of little lumps, through, around and among which the stomach's juices may percolate and dissolve the whole speedily and simultaneously. Many people who like milk and know its value as a strength giver think they cannot use it because it gives them indigestion. Most of them could use it freely if they would drink it in the way I have described, says a writer who makes these suggestions with the air of authority.

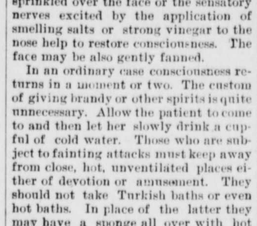

Knitted Lace For Trimming.

This pretty open pattern given by The Designer, is effective as a trimming for underclothing when made of very fine cotton or linen thread. Cast on 18 st.

Notes From the Jewelers' Circular.

The newest cutting of fine large diamonds for rings is in the likeness of a plump, many faceted, sparkling heart. The shank of the ring on either side of the gem is incrusted with brilliants so that no gold shows anywhere, and the whole effect becomes light and elegant in the extreme.

Sets of sleeve links, collar button and three studs, all matching, are designed for the summer shirt waist. One set noted was in round balls of pink coral, in each of which was imbedded a small brilliant; another was of jade mounted en cabochon and a third of carbuncles.

Jeweled walking sticks bid fair to appear with the presence of spring. London has approved of them, and already women here are using the jeweled umbrellas so tightly rolled as to resemble a cane.

Quite the latest thing in lace pins are bars in scroll, key and other conventional patterns set with numerous small diamonds.

The tiniest of stick pins show elongated pear shaped heads.

Why Wood Crackles.

Wood crackles when it is ignited because the air expanded by heat forces its way through the pores of the wood with a crackling noise. Green wood makes less snapping than dry because the pores contain less air, being filled with sap and moisture, which extinguish the flame, whereas the pores of dry wood are filled with air, which supports combustion.

Very Different.

"Snaggs and I have quarreled," said Squildig to McSwilligen.

"Then when you separated of course you did not exchange assurances of distinguished consideration?"

"On the contrary, we exchanged assurances of extinguished consideration."—Pittsburg Chronicle-Telegraph

An Enterprising Druggist.

There are few men more wide awake and enterprising than M. A. Toulson, who spares no pains to secure the best of everything in his line for his many customers. They now have the valuable agency for Dr. King's New Discovery for Consumption, Coughs and Colds. A SHOOTING STAR.

What It Really Is and Where It Comes From.

Sir Robert Ball, who is the world's greatest living astronomer, told a London audience recently some interesting facts about meteorites and shooting stars. In describing the origin of meteorites he said that millions of years ago, when the earth was an infant at play and volcanoes were giants, the meteors were thrown upward in infant convulsions. Some of the earth's discarded rocks returned at once, but those which were flung upward at a rate greater than seven miles a second passed beyond the earth's gravitating influence and sought paths of their own, no one could tell whither.

And then, after millions of years, they once more came within the reach of the world, and old Mother Earth resumed her sway, took back the rocks to her bosom and the astronomers said a meteorite had fallen.

Sir Robert asked his hearers to imagine a wrapping of some hundreds of miles of air round the earth's surface. Now just in the same way that a gimlet, boring its way into wood, becomes warm, so a bullet going 20 miles a minute would become extremely warm in boring its way through 20 miles of air.

And in the same way that a bullet became warm, so a meteorite traveling 10,000 times as fast as a bullet, traveling at this speed perhaps for hundreds of years through realms of space where paralyzing cold was indescribable and finding itself at last plunging through the warm bath of the air, became hotter and hotter and hotter.

It glowed, it became white hot, it melted, it dissolved in a burst of gaseous splendor, and observers on the earth cried, "Why, there's a shooting star!"

AN ARCHITECTURAL PUZZLE.

Monasteries Built in a Wildly Inaccessible Locality.

The famous monasteries of Meteora crown the summits of vast rock pinnacles rising from the plain of Thessaly.

By what strange means the first cunning architects of these airy perches succeeded in reaching the scene of their labors is a matter wreathed in mystery. The cliffs are far too smooth and perpendicular for any man to climb by hand and foot, and history guards jealously the secret of the monasteries. All that is known about them is that the monks and wandering friars of the middle ages found sanctuary here when first the crescent and scimiter ran red with Christian blood. Visitors to the monks' abode announce their presence by shouting until some one far above looks out and lets the net, which is worked by a windlass, come down.

The sensation of the ascent is distinctly novel. Seated on the ground in the center of the net, the meshes are one by one looped on to a large iron hood. As the rope becomes taut the cords press uncomfortably hard upon various points of one's body, and with a strong wind blowing it swings to and fro and bumps its human load against the cliff. The rope, as it slowly winds on the drum up in the monastery, kinks occasionally, and the jerk gives one the impression that the rickety concern is giving way.

The journey, however, ends safely 170 feet above the ground, where the monks promptly extricate the visitor and give him a pleasant welcome.

The Caroline Islanders.

As a rule the Caroline islander is fairly honest. Once lay his suspicions to rest and win his confidence, and he will prove himself a faithful friend and an excellent host, courteous and just in all his dealings, as I have very good cause to know. On the other hand, when dealing with his enemies, he calls into play a talent for intrigue, lying and chicanery that would delight a Machiavelli.

In his private life he is unselfish, frugal and economical, a man of careful, small habits. Like all folk of Melanesian admixture, he is liable to fits of dangerous sullenness when he considers himself slighted in any way. He is inclined to be revengeful and will bide his time patiently until his opportunity comes. Yet he is not implacable and counts reconciliation a noble and princely thing. There is a form of etiquette to be observed on these occasions—a present (katom) is made, an apology offered, a piece of sugar cane accepted by the aggrieved party, honor is satisfied, and the matter ends.

The Ponapean is a stout warrior, a hardy and skillful navigator, fisherman, carpenter and boatbuilder, somewhat of an astronomer and herbalist, but a very second class planter and gardener.—Geographical Review.

UPSET BY AN UMBRELLA.

It Came Very Handy, but Made Three Men Miserable.

"Talking about stealing umbrellas," said a New Orleans business man. "I had a whimsical experience last week. One afternoon, when it was raining, I happened to see a very good umbrella in the hall, and—well, I annexed it, or rather I established a protectorate, intending to return it before night to the gentleman in the adjoining office, who, I supposed of course, was the owner.

"But somehow or other I didn't, and for several days I dodged him in and out of the building, feeling particularly uncomfortable and guilty. Finally he dropped in and, seeing the umbrella in the front office, walked off with it. I witnessed the incident unobserved from the rear room and naturally said nothing. Next day we encountered in the elevator, and he handed me the umbrella.

"'Here's your parachute,' he said. 'I'll have to own up that I appropriated it yesterday, but it was raining, and the temptation was too strong for my morals.'

"I took it rather gingerly and refrained from offering any explanation. That afternoon I set it just outside my door and had the satisfaction of seeing it disappear under the arm of an architect who is a prominent member of my church and generally regarded as a very moral man. Since then he has had pressing business whenever I hove into sight, and I infer that he is suffering a duplicate of the pangs recently experienced by myself and my neighbor. The fellow who originally left it hasn't turned up, so I suppose that he, too, is a member of the robber band."—New Orleans Times-Democrat.

Sick-poison is a poison which makes you sick. It comes from the stomach. The stomach makes it out of undigested food.
The blood gets it and taints the whole body with it. That's the way of it.
The way to be rid of it is to look after your digestion.
If your food is all properly digested, there will be none left in the stomach to make sick-poison out of.
If your stomach is too weak to see to this properly by itself, help it along with a few doses of Shaker Digestive Cordial.
That's the *cure* of it.
Shaker Digestive Cordial is a delicious, healthful, tonic cordial, made of pure medicinal plants, herbs and wine.
It positively cures indigestion and prevents the formation of sick-poison.
At druggists. Trial bottles 10 cents.
