Hubbard's Fertilizers!

The leading farmers and canners through Pennsylvania, New Jersey, Delaware and Maryland speak in their praise, declaring them to be positively the cheapest, the safest, the best to use. Once a trial, always a patron. Wouldn't it be a good idea for you to try them?

For Hay—

Top dress your grass this month. We have a goods that works wonders for this purpose. Try it and the cost per acre will cost less than you imagine.

Asparagus—

Are you going to do anything to it this spring? If so, we have the goods. It has Nitrate of Soda and Fish as the source of ammonia, and runs high in Potash and Phosphoric Acid. Some o the finest Asparagus grown in the country is with this goods.

For Corn—

You fertilize your wheat, why not your Corn? It will pay. We have many cus omers wh use it year after year. We have one man in Delaware already ordered 70 tons. We have two more in Maryland who have their orders booked now for 20 tons each, and so on we could give them to you by the score.

Peach Trees—

Many orchards have been taken up the last few years, and peaches brought a good price last year, and don't you think it would be a good idea for you to feed your trees with our FRUIT GROWER, as it has given universal satisfaction. One patron last year claims to have gotten 30 cents per basket more for the same variety where it had been used. We have scores of testimonials concerning it.

Potatoes—

Well, you should use our High Grade Potato Fertilizer if you are going to plant, for this goods has been used for years in four States with the greatest success. It costs $30 per ton, but Mapes and some of the other goods costs $10 more, but we have never come in competition with other high grade Potato goods that ours has not been equal to any and superior to many. There is hardly a day in the last few weeks that some one from Kent or Queen Anne's has not dropped in our office and said: "That Potato goods of yours is the best ever used, and will want more this spring."

For Tomatoes—

Well, you have heard about our Peerless. Mr. Jacob Shriley says it is the best goods h ever saw for tomatoes. Mr. Stewart Graham writes where Peerless went alongside another goods one looked like manured and the other as if it had none and that Peerless yielded over one third more tomatoes.

Mr. B. H. Moore writes: "I used Peerless on 2 acres, sold 27½ tons at 12 cents per basket; netted me $198 40." D. F. Loose says one ton netted him $95.00 more than another ton of $18.00 goods alongside. C. R. Dashiel says he would have it if it cost $50.00 per ton. Smith, Rouse & Webster, the great canners, say they never heard of goods spoken of more highly. We can furnish hundreds of testimonials. Many have told us their yield from it was four and five tons more per acre.

☞ Now, if you want to sow OATS or top dress your STRAWBERRIES, plant SWEET POTATOES or need a goods for TRUCK, or want anything in the FERTILIZER line, please call on or correspond with us before making your purchases.

Very truly yours,

WILBUR W. HUBBARD,

FREAKS OF SEA QUAKES.

One That Stranded Big Vessels Half a Mile Inland.

Sea quakes are mighty disturbances of the waters of the ocean, their cause or causes being identical with the causes of earthquakes. In Major C. E. Dutton's book, "Earthquakes," the author has some interesting facts regarding the ocean variety of quake. From the entries in the logs of many ships he concludes that in rare cases the power of the sea quake shocks may be great enough to render standing on deck as difficult as it sometimes is on land. It may even be great enough to cause the fear that the vessel is being shaken to pieces. Gigantic waves in the ocean are, of course, a frequent accompaniment of the sea quake. On the west coast of South America, where these waves are frequent, they sometimes follow a quake having its center below the sea level that is also felt on land. But more often they come without warning. The most memorable sea quake of this locality occurred Aug. 3, 1868.

Major Dutton describes it as follows: "The coast of South America was shaken all the way from Guayaquil, in Ecuador, to Valdivia, in Chile, the highest intensity being manifested in the neighborhood of Arica. The force of the quake in this town was very great, throwing down most of the structures and producing land slips. A few minutes later—precisely how many minutes is not known—the sea was observed to retire slowly from the shore, so that ships anchored in seven fathoms of water were left high and dry.

"A few minutes later still it was seen returning in a great wall, or 'bore,' which caught up the ships in the roadstead and swept them inland as if they were mere chips of wood. Among them was the United States steamer Wateree, one of the improvised war vessels of the blockading fleet in the civil war, which was carried inland nearly half a mile and left with little injury on shore by the recession of the wave."

KEEP THESE IN MIND.

The power of kindness. It wins when all coercive measures fail.

The dignity of simplicity. When the "frills" are off the man is "on."

The wisdom of economy. The man who saves makes more than he saves.

The pleasure of working. The only really unhappy, rich or poor, are the idle.

The influence of example. Practice does more than precept in showing the way.

The worth of character. In the last analysis the only real value is a clear conscience.

The success of perseverance. "Keeping everlastingly at it" brings the hoped for result.

The value of time. Lost capital may be restored by diligent use of experience. Time lost is lost forever.

The obligation of duty. Your concern should not so much be what you get as what you do for what you get.—New York Commercial.

Temperament and Food.

For bilious persons a chart of life published by Professor Boyd Laynard gives emphatic warning of dangerous rocks in the shape of sausages, pork, turtle and other commodities. Eels must not be eaten by brain workers, chilly persons should cultivate a taste for sardines, while irritable people are warned away from ginger, and the melancholy man must not touch bacon. Whitebait, it is suggested, is inadvisable for persons who are of an amorous nature, asparagus is forbidden to those who suffer from excitement, and languid persons are told to be careful when they indulge in peas, potatoes, arrowroot and macaroni. Duck for some mysterious reason is described as unsuitable for the bashful, the irate, the pale, the drowsy and the inebriate. —St. James' Gazette.

Only One Way to Save Him.

"While the religion of some men is intellectual," said a well known New York clergyman, "the religion of many is a thing of emotions.

"Back in my boyhood days I remember a man in the country who used to go to camp meeting. After singing a few inspiring hymns he would become to outward appearances the happiest and most pious man in the camp. But his emotion would always die out and his religion wouldn't tide him over to the next meeting.

"A cynical neighbor of this man once remarked that the only way to save his soul was to get him happy and pious in one of the meetings and then kill him."—New York Press.

Too Much Name.

A Maryland congressman tells of a baptism in a village in the black belt of that state. "What is the name?" asked the minister of the child's father. "John James George Washington Fitz-Hugh Lee Blaine Harrison Smith," answered the father. The old minister jotted down the names, and then, walking to the baptismal font, a crockery wash basin, said to the janitor: "Mose, get some more water. There ain't half enough to baptize this child if we have to take in all his names."

Trying to Be Charitable.

"Mr. Bliggins means well, but he doesn't stop to think."

"Perhaps," answered Miss Cayenne, "he feels that time is too valuable to be trifled away in hopeless undertakings."—Washington Star.

The Making of It.

"If they're both deaf and dumb, I don't see how they could make love."

"No? I should say it was the best kind—all handmade, you know."—Philadelphia Ledger.

THE above picture of the man and fish is the trade mark of Scott's Emulsion, and is the synonym for strength and purity. It is sold in almost all the civilized countries of the globe.

If the cod fish became extinct it would be a world-wide calamity, because the oil that comes from its liver surpasses all other fats in nourishing and life-giving properties. Thirty years ago the proprietors of Scott's Emulsion found a way of preparing cod liver oil so that everyone can take it and get the full value of the oil without the objectionable taste. Scott's Emulsion is the best thing in the world for weak, backward children, thin, delicate people, and all conditions of wasting and lost strength.

A QUEER FISH.

The Now Scarce Dugong Is the Mermaid of Fabled Lore.

The strangest of all strange fish must surely be the manatee and the dugong. The latter is the mermaid of fabled lore. The dugong live in flocks along the shores of the Indian ocean, the Red sea and the gulf of Manaar, where they browse on seaweed and river vegetation. They are very affectionate in disposition, and especially is this shown in the love of the mother for her offspring, which is much stronger than the instinct of self preservation. Neither will the male leave the female if she be attacked, and instances are on record where the companions of the manatee gathered round and made an effort to withdraw the deadly harpoon. It is supposed that the rude approach to the human outline observed in the shape of the head of the dugong, the attitude of the mother in clasping her young to her breast with one flipper while swimming with the other, holding both above water, and suddenly diving and showing her fishlike tail when alarmed, gave rise to the mermaid myth, first told by the Arab seamen. Jules Verne gives a thrilling description of the capture of a dugong in the Red sea, when its flesh was desired as food. Naturalists tell us that the flesh of the manatee and the dugong much resembles well fatted pork, of pleasant flavor, and is highly esteemed as food. For this reason they were much hunted and are fast becoming extinct.—Field and Stream.

TRICKY BRAIN CELL.

What Happens When We Know a Name Which Escapes Us.

The anatomy of the nervous system and consequently its physiology was regarded in the past as very simple. Cayal showed that the specific brain cell is an independent unit provided with multiple processes, by means of which it is capable of acting not through one nerve alone, but several. This independent brain unit or cell is called a neuron.

A simple illustration of how the neuron works is furnished by our not infrequent hunt for a name or an idea which we know we possess. We feel that the name is there, but we cannot recall it. We get various names near it, beginning even with the same letter or the same vowel sound, yet only after minutes or even hours does it actually occur to us.

What is supposed to happen is that the particular cell of intellection which we are using throws out its process among the cells of memory for names, and, though this process is brought in connection with cells containing similar names, it is only after a more or less prolonged search that it hits on the right one. It is as if the telephone operator in the central office felt around blindly for the connection wanted and only after putting the plug into various holes eventually struck the proper one.—Dr. Joseph Walsh in Book-lovers Magazine.
