MADE FROM NATIVE ROOTS.

SAFE AND RELIABLE.

That the roots of many native plants, growing wild in our American forests, possess remarkable properties for the cure of human maladies is well proven. Even the untutored Indian had learned the curative value of some of these and taught the early settlers their uses. The Indian never liked work so he wanted his squaw to get well as soon as possible that she might do the work and let him hunt. Therefore, he dug "papoose root" for her, for that was their great remedy for female weaknesses. Dr. Pierce uses the same root—called Blue Cohosh—in his "Favorite Prescription," skillfully combined with other agents that make it more effective than any other medicine in curing all the various weaknesses and painful derangements peculiar to women.

Many afflicted women have been saved from the operating table and the surgeon's knife by the timely use of Doctor Pierce's Favorite Prescription. Tenderness over the lower pelvic region, with backache, spells of dizziness, faintness, bearing down pains or distress should not go unheeded. A course of "Favorite Prescription" will work marvelous benefit in all such cases, and generally effect a permanent cure if persisted in for a reasonable length of time. The "Favorite Prescription" is a harmless agent, being wholly prepared from native medicinal roots, without a drop of alcohol in its make up, whereas all other medicines, put up for sale through druggists for woman's peculiar ailments, contain large quantities of spirituous liquors, which are very harmful, especially to delicate women. "Favorite Prescription" contains neither alcohol nor harmful habit-forming drugs. All its ingredients are printed on each bottle wrapper. It is a powerful invigorating tonic, imparting health and strength in particular to the organs distinctly feminine. For weak and sickly women, who are "worn-out," or debilitated, especially for women who work in store, office, or school-room, who sit at the typewriter or sewing machine, or bear heavy household burdens, and for nursing mothers, Dr. Pierce's Favorite Prescription will prove a priceless benefit because of its health-restoring and strength-giving power.

For constipation, the true, scientific cure is Dr. Pierce's Pleasant Pellets. Mild, harmless, yet sure.

—THE—

Mutual Fire Insurance Co.

OF KENT COUNTY,

during the past nine years has returned to the holders of its policies, where the policies have been cancelled, $39,000.00.

The accounts of its policy holders show that for the same period the actual cost of insurance has not been more than 66 per cent. of the premium paid, and that policies only nine year old have now standing to their credit 33 per cent. of the amonts paid it.

If you wish to diminish the estimate cost of your insurance, insure your property in the

DEAD WATER.

Effect of This Queer Marine Phenomenon Upon a Ship's Speed.

One of the most curious marine phenomena known to seamen is that called by Norwegian sailors "dead water," which, without any visible cause, makes a vessel lose her speed and refuse to answer her helm. The sailor's only definite knowledge of its origin is that it exists solely where there is a surface layer of fresh water resting upon the salt waters of the sea. Several explanations have been advanced by the captains of ships of the effect of dead water, the commonest of which is that the two water layers move in different directions. The true explanation, however, recently offered by Swedish navigators and verified by mathematical calculation and direct experiment, is that in addition to the "resistance waves" at the surface the vessel creates a second line of subaqueous waves between the two strata of water.

The experiment carried out to demonstrate the truth of this theory was an exceedingly pretty one. A large plate glass tank was first mounted on a wooden frame. The tank was then filled to a certain depth with salt water, and a layer of fresh water was carefully poured on to the surface, so that two separate water layers were obtained.

The salt water was blackened with liquid Chinese ink before the water layers were prepared, and in this way the different layers were made clearly visible. A boat model was then towed along the tank and a silhouette of the waves produced was obtained by placing a white screen at a short distance behind the tank. The waves were also photographed by flashlight, and the results showed conclusively that waves actually were set up at the boundary line between the two liquids.

Further experiments were made to verify the sudden loss of speed due to dead water. The boat model was drawn across the tank and the towing string suddenly slackened when the boat was about halfway across. In cases where the tank contained salt water only the boat stopped gradually, moving some boat lengths after the towing string had been slackened. When the tank contained a layer of fresh water resting on salt water, on the other hand, the boat slackened speed quite suddenly and moved only a very short distance.

These experiments, carried out on a small scale, prove conclusively that the difficulties encountered within a dead water zone are really due to the resistance experienced by the vessel in generating invisible waves at the fresh water salt water boundary, although in some particular cases the influence of undercurrents must also doubtless be taken into account.—New York Herald.

POINTED PARAGRAPHS.

The most acceptable form of politeness is cleanliness.

Because you say you intend to do a thing it isn't done.

About all some men are good for is to "second the motion."

You may think you are entertaining, but there are people dodging you all the time.

Don't send ten dollar flowers to the funeral of a man whose family is left without any income.

The man in a dangerous location never thinks he is in a dangerous location or he wouldn't be there.

The owner of a horse and buggy tries to be modest, but he can't help showing that he feels a little superior.

The first insurance against trouble that children learn about is to get a promise from mother that she will not tell father.—Atchison Globe.

On Their Way.

During a newspaper men's convention, a number of journalists were one afternoon talking of the tricks of "the faithless types," when Henry Watterson said:

"While I've heard of a great many funny typographical breaks in my time, about the oddest and most humorous transposition of the types that ever came within my observation was that in a New York paper some years ago. That sheet used to print its shipping news on the same page with the obituaries. Imagine the glee with which its readers found the captions exchanged one morning, whereby a long list of respectable names were set forth under the marine head, 'Passed Through Hell Gate Yesterday.'"—Harper's Weekly.

Men Have Not Degenerated.

It is common to hear of the giant people who lived in the old days, yet it is decidedly uncommon to find proof that the average ancient was any larger or more powerfully built than the average person of the present day. The Egyptian mummies show these people to have been of medium size. The remains taken from the catacombs do not differ in size from the people of the present, while the armor which was worn by the warriors of the long ago fit as readily the forms of people who are not at all gigantic or at least extraordinarily above the average either in girth or stature. There were great men in the old days, but as great still obtain in this twentieth century.

Those Tourists.

M. Perrichon (visiting Switzerland)—Well, Mary, we'll take another view of this lake and then we can return to Paris. Mme. P.—Why not see some of the others? M. P.—Well, I don't see the necessity. It seems to me that one lake must be very much like another.—Bon Vivant.

He is not only idle who does nothing, but he is idle who might be better employed.—Socrates.

For Your Protection

we place this label on every package of Scott's Emulsion. The man with a fish on his back is our trade-mark, and it is a guarantee that Scott's Emulsion will do all that is claimed for it. Nothing better for lung, throat or bronchial troubles in infant or adult. Scott's Emulsion is one of the greatest flesh-builders known to the medical world.

SCOTT & BOWNE, 409 Pearl Street New York

INSURANCE.

The Beginnings of This Now Common Mode of Protection.

The practice of insurance was known to the ancients, being in vogue at the beginning of the Christian era.

The insurance of ships was undoubtedly part of the business of the Hanseatic league, which was formed about 1140 by the port towns of Germany to protect themselves against the pirates of Sweden and Denmark.

The custom of drawing out insurance policies originated in Florence in 1523, although a regular chamber of insurance was formed at Bruges early in the fourteenth century, and the practice was in general use in Italy in 1194 and in England in 1560.

Fire and life insurance is of much more recent origin. Some of the ancient guilds provided compensation for any of their members who suffered loss from fire, but the insurance of goods and houses as a distinct branch of business cannot be traced farther back than 1667, the year after the great fire of London.

The first regular company, the Hand-In-Hand, was founded in 1696, and five other companies still existing were started in the quarter of a century which followed. Life insurance was first undertaken by the Amicable in 1706.—London Standard.

Animals That Do Not Grow Thirsty.

There are many different kinds of animals in the world that never in all their lives sip so much as a drop of water. Among these are the llamas of Patagonia and the gazelles of the far east. A parrot lived for fifty-two years in the zoo at London without drinking a drop of water, and many naturalists believe the only moisture imbibed by wild rabbits is derived from green herbage laden with dew. Many reptiles—serpents, lizards and certain batrachians—live and thrive in places entirely devoid of water, and sloths are also said never to drink. An arid district in France has produced a race of nondrinking cows and sheep, and from the milk of the former Roquefort cheese is made. There is a species of mouse which has established itself on the waterless plains of western America and which flourishes notwithstanding the absence of moisture.

A Startling Motto.

A traveling salesman died very suddenly in Pittsburg. His relatives telegraphed the undertaker to make a wreath; the ribbon should be extra wide, with the inscription, "Rest in peace," on both sides, and if there is room, "We shall meet in heaven." The undertaker was out of town and his new assistant handled the job. It was a startling floral piece which turned up at the funeral. The ribbon was extra wide and bore the inscription, "Rest in peace on both sides, and if there is room we shall meet in heaven."

Ten Good Things.

There are ten things for which no one has ever yet been sorry. These are: For doing good to all; for speaking evil to none; for hearing before judging; for thinking before speaking; for holding an angry tongue; for being kind to the distressed; for asking pardons for all wrongs; for being patient toward everybody; for stopping the ears to a talebearer; for disbelieving most of the ill reports.

Too Valuable to Lose.

Mrs. Clinton Streeter—John, wake up! The cook is screaming "Burglars!" Mr. Clinton Streeter—Great Scott! I'll go right down. Mrs. C. S.—No, don't; they might shoot you. Mr. C. S.—That's a small risk to take. My goodness, woman, suppose they should steal the cook!—Kansas City Independent.

Paradoxical.

Suburban Patient—Doctor, I am sorry you have had to come so far from your regular practice. Doctor—Oh, it's all right. I have another patient in the neighborhood, so I can kill two birds with one stone.—Judge.

Some Reduction.

"Then the doctor didn't succeed in reducing your weight?"

"Why, not very much, but he left me with quite an attenuated pocketbook."

A. LEVINE,

THE BEST OF EVERYTHING

For Ev rybody!

We have the right things for every person, the right price for every purse.
A Beautiful Assortment of Pleasing Gifts, perfectly adapted to the wants and requirements of our friends and patrons.
Everything fresh and sparkling with the brightest new goods of the season.
We are waiting to please you with presents that are appropriate, popular, practical in every-way desirable in the line of

Watches
for Ladies, Gents, Boys and Children in SOLID GOLD, GOLD FILLED, SILVER, ETC.

Novelties
of all kinds. If you want satisfaction in selection and economy in price our Holiday stock will fill your needs.
Remember our Holiday stock gives you new ideas and supplies your want.
Hoping to see every reader at our store at an early date, and extending to one and all the compliments and good wishes of the season, we remain,
Very truly yours,

A. Levine,

Opposite Voshell House.

Washington College,

Chestertown, Md.

One Hundred and Twenty-Fifth Session Begins September 19, 1906.

The college offers four courses of study—Classical, Latin-Scientific, Scientific, each leading to the degree of Bachelor of Arts; and Normal, leading to the Normal diploma which entitles the holder to teach in any county of the State without examination.

Sub-Freshman and Sub-Normal classes are maintained for the benefit of those who desire a thorough preparation.

In the Collegiate Department

the elective system enables each student to select the studies suited to his particular needs.

Students are provided with good board and comfortable, well furnished quarters. The buildings are equipped with every modern convenience—steam heat, electric lights, baths. Here students may pursue their studies in a highly moral community amid beautiful and healthful surroundings, under careful supervision of health and habits, at very low rates.

STILL POND, MD.

Some of the Best Crops of Wheat

Grown in the State were from

Wilbur W. Hubbard's Standard Bone Fertilizers

Last year we made for Dr. Isaac Barber, the ex-Congressman and Mr. G. M. Wingard, the machinist of Easton, a lot of fertilizer that contained 1400 lbs. of Dissolved Animal Bone, 400 lbs. of Bone Tankings, 200 lbs. of Muriate of Potash. Total, 2000 lbs. Dr. Barber we have not heard from, but the following is what Mr. Wingard has to say:

Easton, Md., Aug. 1st, 1906.

WILBUR W. HUBBARD, Esq., Chestertown, Md.—Dear Sir—That goods you made for me last fall certainly gave satisfaction. In the spring our wheat looked like other people's. We feared that we would only have half a crop, although as I told you when I got you to make this goods for us, I believed in a good goods and use less per acre and only used 200 lbs. on 100 acres, and threshed a few days ago from 66 acres 27 bushels per acre, from 30 acres 29¼ bus.; from four acres 40 bus. per acre, and it was nice wheat, and I therefore believe it paid me better to use 10 tons of that goods than it would 20 tons of a cheap fertilizer, and my clover is splendid and about a foot high.

Respectfully,
G. M. WINGARD,
Machinist, Easton, Md.

Mr. Vincent Lee says: I used Wilbur Hubbard's fertilizer last year alongside a goods costing $3.50 more per ton and marked the place, and when the wheat was examined by people who came to see it, Hubbards was generally acknowledged to be as good or better.

Mr. Wm. Clark, on H. H. Barroll's farm, near St. Paul's Church, says that Hubbard's fertilizer certainly did splendidly for him this time, and that part of it threshed out 24 bushels per acre.

Mr. E. D. Reed, who owns a threshing rig, under date of July 29th, certifies that Wilbur Hubbard's fertilizers for the last three years have yielded 3 to 5 bushels more per acre than others used in competition, and that the farmers are appreciating their value.

Mr. H. H. Klinefelter says: I have used 90 to 100 tons of Hubbard's goods per year for ten years, and I expect to continue to use them.

Mr. Jno. T. Jones, of Barclay, Md., says: I sold and used 40 tons of Hubbard's in 1903, 60 tons in 1904, 165 tons in 1905, and will need over 200 tons to supply my trade this fall.

Mr. Cad L. Phillips, of Laurel, Del., says: I have sold and used Hubbard's fertilizers for 20 consecutive years, and this year it will take me 150 to 200 tons.

Mr. John H. Evans, of Queen Anne's, uses 75 to 100 tons of our goods per annum, and says this year by actual test Hubbard's was the best, and expects to use it again.

Mr. J. B. Hossenger says Hubbard's fertilizers give him satisfaction, and that is why he places his order for 28 tons this year.
