Yours for Business,
W. I. FOWLER.

ABOUT 20,000 PEACH TREES

TO BE DISPOSED OF.

The buds were selected from the best strains of each variety, which were sent out from the Nicholson nurseries 25 to 30 years ago, and many of these orchards were more healthy and vigorous the past season than quite a few orchards 5 and 6 years old. These trees have been inspected by authority from the State Entomologist, Prof. Symons, and found entirely free from any root disease, San Jose Scale, or other insects. Orders will be promptly attended to.

The Best Guaranty of Merit Is Open Publicity.

Every bottle of Dr. Pierce's world-famed medicines leaving the great laboratory at Buffalo, N. Y., has printed upon its wrapper all the ingredients entering into its composition. This fact alone places Dr. Pierce's Family Medicines *in a class all by themselves.* They cannot be classed with patent or secret medicines because they are neither. This is why so many unprejudiced physicians prescribe them and recommend them to their patients. They know what they are composed of, and that the ingredients are those endorsed by the most eminent medical authorities.

The further fact that neither Dr. Pierce's Golden Medical Discovery, the great stomach tonic, liver invigorator, heart regulator and blood purifier, nor his "Favorite Prescription" for weak, overworked, broken-down, nervous women, contains any alcohol, also entitles them to a place all by themselves.

Many years ago, Dr. Pierce discovered that chemically pure glycerine, of proper strength, is a better solvent and preservative of the medicinal principles residing in our indigenous, or native, medicinal plants than is alcohol; and, furthermore, that it possesses valuable medicinal properties of its own, being demulcent, nutritive, antiseptic, and a most efficient antiferment.

Neither of the above medicines contains alcohol, or any harmful, habit-forming drug, as will be seen from a glance at the formula printed on each bottle wrapper. They are safe to use and potent to cure.

Not only do physicians prescribe the above, non-secret medicines largely, but the most intelligent people employ them—people who would not think of using the ordinary patent, or secret medicines. Every ingredient entering into the composition of Dr. Pierce's medicines has the strongest kind of an endorsement from leading medical writers of the several schools of practice. No other medicines put up for like purposes has any such *professional* endorsement.

Dr. Pierce's Pleasant Pellets cure constipation. Constipation is the cause of many diseases. Cure the cause and you cure the disease. One "Pellet" is a gentle laxative, and two a mild cathartic. Druggists sell them, and nothing is "just as good." Easy to take as candy.

NEW MEAT MARKET.

We have opened a meat and feed store on High street, opposite the Voshell House, where we will be pleased to see the general public. Orders left with us will receive prompt and careful attention.

We have on the farms owned by Mr. James T. Ireland about 40 head of fine beef cattle which will be butchered on the farms and placed on the market as desired.

We want 5,000 lbs of fine pork and all kinds of poultry, for which the highest market price will be paid.

Mr. Alfred Crew is our butcher.

JAMES T. IRELAND & SON,
d8-'06-1y. Chestertown, Md.

The Awful Carib Fish.

A traveler in Venezuela gives an interesting description of the fish of the Orinoco country. He says the party several times came in contact with the carib fish, which are the most ferocious inhabitants of the water known. The fish are not over fourteen inches long, but they travel in schools. Their teeth are three cornered. Any living object which attracts their attention is attacked with fury. Mr. Thompson tells of an Indian woman who entered the water to fill a bucket. She was attacked by the fish and reached shore only to die in fifteen minutes. The flesh was literally torn from her body. Mr. Dart, who was with Mr. Thompson, caught one of the fish and pulled it upon the bank. He held the carib under his foot while he pointed at the peculiar teeth with his finger. With a quick movement the carib flopped out from under Mr. Dart's foot and seized him by the finger, cutting that member to the bone. The fish frequently have been known to bite ordinary fishhooks in two.

Progress of Dentistry.

Though dentistry became a science under the hand of Professor Richard Owen as late as 1839, there are evidences that it was practiced in a crude way by the ancients. Herodotus refers to treatment of the teeth by the Egyptians, and evidences of attempts to supply artificial teeth have been discovered in ancient skulls and mummies. Galen was the first physician to speak of treatment of troublesome teeth, and Ambroise Pare, in his work on surgery in 1550, makes mention of the preservation of the teeth. It is only since the middle of the last century, however, that dentistry has become a branch of surgical science. Before that time bad teeth were extracted, and mere tooth drawing constituted dentistry early in the nineteenth century. The first dental school in the United States was erected at Baltimore in 1839. In 1845 Cincinnati boasted of a similar institution, and in 1856 a dental school was erected at Philadelphia.

A Gentleman of the Old School.

Lady Dorothy Nevill in her reminiscences tells a story of her father, a gentleman of the old school, "in nankeen shorts, with white stockings and a brass buttoned blue coat, with big collar, over a beautifully embroidered waistcoat." But he swore, after the manner of the age. "He was traveling at night on the continent alone in a post chaise when the postboy, while passing through a forest, began to drive like a man anything but certain of his way. My father's wrath soon rose, and the explosion of strong language which issued from the carriage so alarmed the driver that, murmuring, 'Je ne veux pas conduire le diable' (I will not drive the devil), he pulled up and, having expeditiously unfastened the traces, made off with his horses at a gallop. My father, I believe, passed the whole night alone in the woods."

Colonial Fear of Lawyers.

In the columns of the New York Gazetteer of Sept. 8, 1786, there was a paragraph lamenting the increase of lawyers as threatening to the future prosperity of the community and degrading to freemen. "An honest trade in former days," said the writer, "was all that people of common ability and education were ambitious of, but now no profession is genteel but the lawyer and the merchant. The lawyers are now creeping into every post of importance and thrusting themselves wherever there is a vacancy. Our congress, our assembly, are crowded with them, and even in our great commercial convention there are five lawyers to one merchant."

Curing the Bad Boy.

You remember the old fashioned woman who when she heard her young son swearing or using naughty words washed his mouth in soapsuds. There is an Atchison boy who could not be reformed in this way, so his father took him in hand. Every day his father called him in and said: "Now, your mother objects to those naughty words you use, but I, being a man, like them. Go over the list for me." The boy promptly complied at first, but in a few days he tired of the words and has now given up his list entirely.—Atchison Globe.

The Toad and Its Skin.

The toad sheds its skin at certain periods, the old one coming off and leaving a new one, which has been formed underneath, in its stead. It does not give its cast off coat away to any poorer toad, and there are no toads dealing in second hand raiment. Neither does it leave its cast off jacket on the ground after the fashion of the shiftless snake. It swallows its overcoat at one mouthful, converting its stomach into a portmanteau.

Noses Out of Joint.

When I was a girl, the aristocratic nose was high, beautifully modeled, rising in a delicately waving ridge and at the tip standing well out from the face and not turned up. But now the fashion has completely changed. The pretty women one sees portrayed in illustrated papers and magazines very seldom have much to speak of in the way of noses.—Dowager in London Chronicle.

The Difficulty About Our Composers.

"Who is your favorite composer?" inquired the artistic person. "I can't say just at this moment," answered Mr. Cumrox, with an appealing glance at his wife, "but it's somebody whose music I can't remember and whose name I can't pronounce."—Washington Star.

Wicked men cannot be friends either among themselves or with the good.—Socrates.

ACHED IN EVERY BONE.

Chicago Society Woman Who Was So Sick She Could Not Sleep or Eat, Cured by Doan's Kidney Pills.

When a woman's kidneys go wrong, her back gives out and every little task becomes a burden. She is tired, nervous, sleepless, run down—suffers daily from backache, headaches, dizzy spells, and bearing-down pains.

Don't worry over imagined "female troubles." Cure the kidneys and you will be well. Read how to find the cure.

Marion Knight, of 33 N. Ashland Ave., Chicago, Ill., member of the Chicago Federation of Musicians and a well-known club woman, says: "This winter when I started to use Doan's Kidney Pills I ached in every bone and had intense pains in the kidneys and pelvic organs. The urine was thick and cloudy, and I could barely eat enough to live. I felt a change for the better within a week. The second week I began eating heartily. I began to improve generally, and before seven weeks had passed I was well. I had spent hundreds of dollars for medicine that did not help me, but $6 worth of Doan's Kidney Pills restored me to perfect health."

A FREE TRIAL of this great kidney medicine which cured Miss Knight will be mailed on application to any part of the United States. Address Foster-Milburn Co., Buffalo, N. Y. Sold by all dealers; price, fifty cents per box.

DRESS OF THE ESKIMO.

Made by the Women From the Skins of Northern Animals.

The chief material of the clothing of the Eskimo is the skin of the reindeer, which is used in various stages of pelage or tanning. Fine, short haired summer skins, especially those of does and fawns, are used for making dress garments and underclothes. The heaviest winter skins furnish extra warm jackets for cold weather. The white spotted skins of the tame Siberian reindeer are especially valued for full dress jackets.

The skins of the white mountain sheep, white and blue fox, wolf, dog, ermine and lynx are sometimes made into clothing. Underjackets of elder duck skins are often pressed into service. Sealskin dressed with the hair on is used only for breeches and boots, and for those rarely. Of late years drilling and calico have been introduced into the makeup of some of the minor garments.

The dress of the men consists of a loose hooded frock without opening except at the neck and wrists. This reaches just over the hips and very rarely to midthigh, where it is cut off square and usually confined by a girdle at the waist. Under this garment is worn a similar one of lighter skin and sometimes without a hood. The thighs are clad in one or two pairs of tight fitting knee breeches, rather loose, but fitted to the shape of the leg. They are very low in front, but are much higher behind, sometimes as high as the small of the back. They are held in place by a girdle or thong around the waist and are usually fastened below the knee over the boots with a drawstring.

On the legs and feet are worn, first, a pair of long deerskin stockings, with the hair inside, then slippers of tanned sealskin, in the bottom which is spread a layer of whalebone shavings and outside a pair of close fitting boots, held in place by a string around the ankle, which reaches above the knee and ends with a rough edge covered by the breeches. Dress boots often end in an ornamental border, with drawstring just below the knee. The boots are of reindeer skin, with white sealskin soles for winter and dry weather, but in summer waterproof boots of white whaleskin are worn. Overshoes of the same material, reaching just above the ankles, are sometimes worn over the winter boots.

The women wear tight fitting deerskin pantaloons, with the hair next the skin, and outside of these a similar pair made of the skins from deer legs, with the hair out, and having soles of sealskin, but no ankle strings. The women's pantaloons, like those of the men, are fastened with a girdle just above the hips. It appears that they do not stay up very well, as the women are continually hitching them up and tightening their girdles, like some old sailor.

Until they reach manhood the boys wear pantaloons like the women, but their jackets are cut just like those of the men.

The well to do Eskimos generally own several complete suits of clothes and present a neat appearance when not engaged in dirty work. The poorer classes wear one suit for all occasions until it becomes shabby. New clothes are seldom put on till winter. The outer frock is not often worn in the iglu, or hut home, being usually taken off before entering the room.

At present there is no such thing as an Eskimo tailor, for the women of each Eskimo household usually make the garments of all the members of the family. Not only this, but the Eskimos are extremely conservative in the matter of changes in the style of their raiment and respond very slowly to the modernizing influences in this particular which have reached their neighborhood.

The Combination.
