A DOCTOR'S RECOMMENDATION.

J. Horton Kelley, M. D., of Still Pond, Kent county, a practicing physician of highest reputation, writes:

Still Pond, Md., Nov. 22nd, 1904.

GENTLEMEN:

It gives me pleasure to recommend the new preparation for indigestion, "Pepsimint," which has but lately been put upon the market. Knowing the formula from which it is prepared, I pronounce it perfectly safe and harmless, but an efficient remedy for ills resulting from imperfect indigestion. As a preventative of that feeling of fullness after eating and the accumulation of gas and wind arising from improperly digested food, it is the remedy *par excellence*. Its method of preparation (in granular, effervescent form) makes it very pleasant to take. I have both prescribed the medicine and used it personally.

Hope H. Barroll, Esq., one o[illegible] ling members of the bar in Maryland, says

Chestertown, Md., Nov. 18th, 1904.

GENTLEMEN:

I have used "Pepsimint" prepared by The Pepsimint Chemical Company. It is a pleasant and efficacious remedy for headaches, resulting from overwork or deranged stomach conditions. I have used it frequently and believe it to be harmless and the same time pleasant and its effervercent properties particularly beneficial and agreeable. I have heard many people speak of it in terms of the highest possible praise.

Very truly yours,

HOPE H. BARROLL.

Townsend, Del. July 27th, 1905.

GENTLEMEN:

I have found your Pepsimint to be a pleasant and effective remedy for indigestion and sick headache. Its use is followed by no deleterious effects.

Respectfully,

RICHES IN CORNSTALKS.

Enough Power Now Wasted to Run All the Nation's Machinery.

Professor Wiley, one of the Department of Agriculture, says that inasmuch as every 100 pounds of cornstalks will yeild six and a half pounds of absolute alcohol it is obvious that the ignorant agriculturist has been allowing an enormous amount of wealth to go to waste.

Say that one acre will yield from 10 to 12 tons of grain, or about 20,000 pounds, and you have a quantity of raw material which will produce 1,300 pounds of absolute alcohol, or 216 gallons. Alcohol at the present time is worth 40 cents a gallon.

Ground in a wet condition and dried, cornstalks may be kept indefinitely, and are ready at any time for conversion into alcohol. Professor Wiley says that the alchol derivable from the cornstalks that now go to waste in our country would not only drive all the machinery in our factories, but would furnish the requisite power for all our railroads and steamboats, run all our automobiles, heat and illuminate all our houses and light the streets of every city in the Union.

Letter to Edgar P. Beck,

Chestertown, Md.

Dear Sir: They won't fool him any more with paste paint; they'll try something-else.

Editor Saulsbury, Dover, Delaware, having used 35 gallons paste paint on his house, bought 35 gallons Devoe for it. He had enough left for a new stable 20 by 20 and fence, and returned four gallons.

Paste paint has as many tricks as a bunco-steer.

Yours truly

MASSEY NOTES.

Owing to the winter weather our farmers can do but little. Some have finished their clover seeding, others are hauling manure while still others are content to sit in our village stores and calculate how they are going to raise 30 bushels of wheat per acre at $1.00 a bu., and 100 bu. of corn per acre at 50c per bushel.

Mr. A. F. Huey, the proprietor of our large implement and carriage emporium, has sold nearly a carload of manure [illegible]eaders the past week.

Mr. C[illegible] Hurlock, our hustling canner, has [illegible]en out contracting for tomatoes the past week. Eight dollars per ton is the price offered.

Mrs. F. J. Devenish has opened a millinery and dressmaking establishment in our town.

The creamery here is beginning to receive quite a large increase in milk, and will soon necessitate the operation of the plant daily.

Mr. J. S. Merritt, our veteinary, was in town last Wednesday, and gave us a few points on how to keep our stock in a thriving condition during the winter months.

Politics are or seem to be at low ebb in our town. We scarcely hear them mentioned.

Fish so far have not made their [illegible]pearance in our town, but we hope ere long to hear the toot of the fish-horn and to hear that longed-for cry of Fresh Fish!

Mr. and Mrs. Sam'l S. Hurlock, of our town, spent a few days guests of Mrs. D. T. Hurlock, Church Hill.

What's the matter with our poet? Has he tired of the good work? He gave us a pretty good puff but slighted a few.

Wilmington Conference Notes.

The pastoral appointments will be one of the most interesting features of the approaching session of the Wilmington Annual Conference of the M. E. Church, which will be held in Smyrna, beginning next Tuesday, March. 19th. The assignments will be made by Bishop Berry assisted by the presiding elders, Drs. Mowbray, Morgan, Koons and Stengle. Many pastors have asked for a change of pastroate, and if the bishop and his cabinet grant these requests the work of making a satisfactory adjustment will be difficult.

Six churches have asked for new pastors: Epworth Church, Wilmington, for John M. Arters, now at Madeley Church, Dover, for A. W. Lightbourne, now at Middletown, Bridgeville, for J. W. Colona, now at Princess Anne; Lewes, for W. R. Mowbray, now at Bridgeville; Still Pond, for E. H. Collins, now at Marydel, and Asbury Church, Lawsonia, for Wilbur F. Corkran, now at Newark, Del.

One hundred and two churches, 13 in the city of Wilmington, 18 on the Wilmington district outside of the city of Wilmington, 28 on the Dover district, 22 on the Easton district and 21 on the Salisbury district, have invited their pastors to return.

Nine young men will be recommended for admission on trial:

Wm. H. Biggs, E. A. Gillespie, Cyrus P. Keen, J. Richard Bicking, O. E. James, Tilghman Smith, J. Thomas Price, H. D. Stewart and Leonard White.

Four pastors, Revs. J. A. Arters, at Port Penn; G. W. Burke, at Hockessin; T. S. Holt, at Still Pond; and H. S. Dulany, at Lawsonia, will retire foom active work.

Forty-six pastors, three in the city of Wilmington, 11 on the Wilmington District, outside of the city, 11 on the Dover District, 8 on the Easton District, and 13 on the Salisbury district, have asked for a change in pastorate.

The conference sessions will continue one week.

To Our Orchardists.

DEAR EDITORS:—Much depends upon the activity of the general fruit grower at this time of the year as to the life of his trees in the future and quality of his fruit this season. The San Jose Scale is generally disseminated throughout the state. Even if you are sure your trees have not this pest among them, it would be money well spent to spray them as a preventative as well as to add vigor to the trees.

Trees infested with the above scale must be treated at least once a year and should be sprayed while the trees are dormant. We find that, with our experiments, the late application in the spring just before the buds open, seems to be the most satisfactory time.

We, therefore, urge every orchardist or person who has a few trees to give them attention and spray them this spring with the lime-sulphur wash, which we find to be the best insecticide for the control of this pest.

The Department stands ready to aid all persons in the state as to giving further instructions in making and applying the spray mixture, both by personal as well as public demonstrations. It also stands ready to enforce the law indirefully neglected cases and we will give our prompt attention to complaints in any vicinity where such cases exist. Get your materials and apparatus ready to commence work at a favorable time. The most convenient method of making the lime-sulphur wash and a discussion of the other insecticides on the market in this state, are given in bulletin 112 published by the Maryland Experiment Station, a copy of which can be had for the asking.

Any further information will be gladly given.

I am very truly yours,

THOS. B. SYMONS,

State Entomologist.

ABOUT 20,000 PEACH TREES

TO BE DISPOSED OF.

The buds were selected from the best strains of each variety, which were sent out from the Nicholson nurseries 25 to 30 years ago, and many of these orchards were more healthy and vigorous the past season than quite a few orchards 5 and 6 years old. These trees have been inspected by authority from the State Entomologist, Prof. Symons, and found entirely free from any root disease, San Jose Scale, or other insects. Orders will be promptly attended to.
