The Modesty of Women

Naturally makes them shrink from the indelicate questions, the obnoxious examinations, and unpleasant local treatments, which some physicians consider essential in the treatment of diseases of women. Yet, if help can be had, it is better to submit to this ordeal than let the disease grow and spread. The trouble is that so often the woman undergoes all the annoyance and shame for nothing. Thousands of women who have been cured by Dr. Pierce's Favorite Prescription write in appreciation of the cure which dispenses with the examinations and local treatments. There is no other medicine so sure and safe for delicate women as "Favorite Prescription." It cures debilitating drains, irregularity and female weakness. It always helps. It almost always cures. It is strictly non-alcoholic, non-secret, all its ingredients being printed on its bottle-wrapper; contains no deleterious or habit-forming drugs, and every native medicinal root entering into its composition has the full endorsement of those most eminent in the several schools of medical practice. Some of these numerous and strongest of professional endorsements of its ingredients, will be found in a pamphlet wrapped around the bottle, also in a booklet mailed *free* on request, by Dr. R. V. Pierce, of Buffalo, N. Y. These professional endorsements should have far more weight than any amount of the ordinary lay, or non-professional testimonials.

The most intelligent women now-a-days *insist* on knowing what they take as medicine instead of opening their mouths like a lot of young birds and gulping down whatever is offered them. "Favorite Prescription" is of KNOWN COMPOSITION. It makes weak women strong and sick women well.

Dr. Pierce's Medical Adviser is sent *free* on receipt of stamps to pay expense of mailing *only*. Send to Dr. R. V. Pierce, Buffalo, N. Y., 21 one-cent stamps for paper-covered, or 31 stamps for cloth-bound.

If sick consult the Doctor, free of charge by letter. All such communications are held sacredly confidential.

Dr. Pierce's Pleasant Pellets invigorate and regulate stomach, liver and bowels.

BIRDS AS THEY SLEEP.

Quail Form a Dense Circle With All Heads Facing Out.

The nightcap preparations of the chubby little quail are very interesting. Each evening the covey forms in a new place, and this selection of the spot entails serious efforts. Bobwhite never quite loses remembrance of the many dangers which make his life in a wild state one great fear. A white throated male with soft clucks calls together a dozen of his comrades, and for a few minutes they all huddle together, but soon from the farther end of the aviary a clear "Whew-bobwhite!" rings out, and off scurry the whole band, this time perhaps to settle for the night in the new place—a dense circle of little forms, heads all facing out, just as in their native stubble they rest facing in every direction, so that at the first hint of danger from any point of the compass the covey may explode and go booming off in safety. Poor little fellows, their wild life is strenuous indeed! Well for their race that every nest holds from ten to eighteen eggs instead of three or four!

The woodpeckers sleep resting upon their tails, even the flickers invariably following this custom, although during the day the flickers spend much of their time perching in passerine manner, crosswise upon a twig. Small birds, such as thrushes and warblers, sleep usually upon some small twig, with heads tucked behind wings in orthodox bird fashion, but they occasionally vary this in a remarkable way by clinging all night to the vertical wires of their cages, sleeping apparently as soundly in this as in the usual position of rest. A bluebird in a small cage slept thus about one or two nights out of each week. Any explanation of this voluntary and widespread habit among perching birds would be difficult to suggest.

The little hanging parrakeets derive their name from their custom of sleeping always in a reversed position, and when distributed over their roosting tree they resemble some strange, pendant, green fruit rather than sleeping birds.—Outing Magazine.

THE BLUE JAY.

Why Should He Be Selected as Sand Bearer to Satan?

It is said and believed by many that all the blue jays disappear every Friday, and not one can be seen until the next day, and this disappearance is accounted for by the statement that the birds are under a compact with Satan and that they devote each Friday to delivering him a supply of sand to heat his caldron at the point of torture.

But why should the blue jay be selected as sand bearer to Satan when there are so many birds of stronger and fleeter wing? There are many superstitions that have a reasoning basis, but this particular one has nothing whatever to go on.

The origin of it lies in the fact that the blue jay is a most particular home builder. He knows how to build his house, and he takes a great pride in it. He doesn't hang his nest to a limb nor glue it to a tree.

Instead he selects a substantial fork or crotch of a limb, lays down a few twigs of goodly size and strength, and on these he superimposes a strong foundation of clay, with layers of papers between, and when his nest is finished it is as substantial in proportion as one of our modern steel structures.

Thus fitted and finished, it is admirably adapted to the rearing of a strong and healthy brood, and the blue jay goes about his business with the earnest energy that characterizes all his movements.

He raises his young and leads them about from tree to tree and from bush to bush until they have tried and found their wings, and then, his responsibilities being over, he proceeds with his career of gayety, a veritable practitioner of rough fun and stage humor.—Uncle Remus' Magazine.

Pounds and Weights.

Here is a question that will tax the arithmetical powers of a youth. Suppose that for some reason or another a shopkeeper who sold goods by pounds and half pounds, but never in quantities exceeding twenty pounds at a time, was told that he must transact all this business with four weights only, what must these four weights be? The answer is half pound, one and a half pound, four and a half pound and thirteen and a half pound. With these it will be readily seen that any weight from half a pound to twenty pounds may be determined in pounds and half pounds.—Gateway Magazine.
