SHARPLES

Dairy Tubular Cream Separator.

Here are five separators—the largest Sharples Dairy Tubular in the middle and two "back breakers" on each side. The machines are all set so the crank axles are level. Which kind for you? The girl is 5 feet 4 inches tall. We handle Tubulars exclusively. Tubulars have waist-low supply cans and other advantages over all other separators. Call and examine Tubular.

IN HANDS OF RECEIVERS.

American Strawboard Company of Which the Chestertown Mill is a Part Financially Embarrassed.

Messrs. Sidney Mitchell and W. O. Johnson have been named as receivers of the American Strawboard Company's property at Chestertown. Formal announcement of the fact was made this week. The mill here has not been in operation since May 23rd, and quite a number of employers have been forced to seek work elsewhere. Several months ago the American Box Board Company went into the hands of the receivers, but at that time it was not thought that the Strawboard Company was involved. Just what disposition will be made of the property is not known yet. It is hoped that the mill may be placed in operation before long, for aside from furnishing the farmers the means for disposing of their surplus straw, it paid out thousands of dollars annually in wages to our people.
