Report of Bell Telephone Co.

The growth of the Bell System, its broader usefulness and resulting prosperity, are shown in the annual report of the American Telephone and Telegraph Company for 1911, by the financial statement and other comparative statistics.

In addition to this usual information, President Vail has made a very comprehensive statement of the policy of the company both in the management of its business and in its relations to the public.

The growth of the system is indicated by an increase of 749,906 in the number of stations, making a total at the end of the year of 6,632,625, of which 2,158,454 are operated by connecting companies.

The Bell toll lines now reach 70,000 places, which is 5,000 more than the number of post offices and 10,000 more than the number of railroad stations in the United States. The total wire mileage has been increased to nearly 13,000,000 miles, of which over half is underground, and the new 450-mile subway between Boston and Washington has been completed except for the drawing in of some of the cable.

The traffic over the Bell lines shows a daily average of 24,129,000, or at the rate of 7,770,000,000 connections a year.

Comparison of the total telephone, telegraph and first-class mail traffic of the United States and of Europe, shows that telephone conversations are 58 per cent, of the whole in the United States and only 23 per cent in Europe.

There was spent in plant additions $55,660,738, as against $53,582,800 the year before. Estimates for the current year are $56,000,000. There was applied to maintenance and reconstruction during the year $58,840,000, making a total provision for the last nine years of $342,300,000.

The gross revenue collected from the public in 1911 for telephone service by the Bell System—not including the connected independent companies—was $179,500,000; an increase of nearly $14,000,000 over last year. Of this, operation consumed $60,000,000; taxes; $9,000,000 or 1½ per cent, on the outstanding capital; current maintenance, $30,200,000, and provision for depreciation, $28,700,000.

The surplus available for charges, etc., was $51,600,000, of which $13,600,000 was paid in interest and nearly $26,000,000 was paid in dividends.

He Coughed up Money.—An emetic administered hypodermically to Fred Tupper last Friday netted $15 dollars in bills which Tupper is charged with having stolen from J. Hall, a lumber man, of Nashua, N. H. After the two men had hired a room in a lodging house Hall accused Tupper of taking his money. At the police station Tupper was seen to swallow something. A physician injected a drug under the skin of Tupper's arm, and the prisoner soon began to cough up money, the police say. First came a $5 bank note and then a $10 yellow back. The police will use the bills as evidence against him.

DE LAVAL CREAM SEPARATOR

The World's Standard

Used Exclusively by 98% of World's Creameries

Ten years ago there were a dozen different makes creamery or factory separators in use. To-day over 98 per cent of the world's creameries use De Laval separators exclusively.

When it comes to buying a separator why not profit by the experience of the creameryman, which qualifies him to advise you correctly.

He knows which separator will give you the best service and be the most economical for you to buy. That's why 98 per cent of the world's creameries use the De Laval exclusively.

There can be no better recommendation for the De Laval than the fact that the men who make the separation of milk a *business* use the De Laval to the practical exclusion of all other makes. They *know* from experience.

Easiest to turn, easiest to wash, skims the cleanest, lasts the longest.
