## Sound Values—Good Service—Courteous Treatment

THESE are the advantages you gain by trading with the I H C local dealer. He is a good judge of values in farm machines. He sells machines of guaranteed quality, and stands behind them to see that they make good. When he sells you an

## I H C Manure Spreader

he sets up the machine, tests it, and makes sure that everything is right before he delivers it. He shows you how to use the machine, to make it last longest. In case of accident he can furnish repair parts promptly—repairs that fit. He gives you service worth far more than it costs you.

I H C manure spreaders are made in both return and endless apron styles, but all aprons run alike on large rollers. Non-friction roller bearings are used wherever practical, making the machine easy on the horses. The feed is variable and positive. The machines pulverize the manure and distribute it evenly in a light or heavy coat, as may be needed. Because they distribute manure properly, I H C spreaders use less than half as much manure as fork spreading to cover the same amount of ground. They make one ton of manure go as far as two, and do better fertilizing with far less labor than the old-fashioned method.

The I H C local dealer has the style and size best suited to your needs. See him for catalogues and full information, or write

## COL. ROOSEVELT SHOT.

**Assailant is a Crank, Who in a Dream, Says the Spirit of McKinley Told Him to Avenge His Murder.**

Col. Theodore Roosevelt, candidate of the Progressive party for president, was shot, though not seriously wounded, by a crank in Milwaukee on Monday evening as he was stepping into an automobile in front of his hotel to go to the auditorium to deliver a speech. The Colonel did not know he had been hit until he thrust his finger under his coat and saw the blood stains on their tips when he withdrew his hand. He persisted in delivering his speech which consumed an hour in its delivery, and even when he was taken to the hospital he displayed remarkabe nerve. Six physicians were unable to tell how far the bullet had penetrated and the X-ray was used for the purpose of locating the ball, which entered his chest. A most fortunate coincidence in connection with the shooting, was that Colonel Roosevelt's life was probaby saved by the presence of his manuscript which he had in an inner pocket of his coat. The bullet passed through the manuscript thus retarding its force. The would-be assassin, whose name is Schrank, and who is said to have come from New York, gave as his reason for firing the shot that he had a dream in which the spirt of McKinley appeared to him and told him to avenge his death. The man is believed to be a demented crank. He fired the shot and was about to fire the second one when one of the Colonel's secretaries pounced upon him and bore him to the ground.

The physicians, after making an X-ray photograph of Colonel Roosevelt and comparing it with the radiograph taken at Milwaukee, announced that the bullet had entered the right breast, to the right of and one inch below the level of the right nipple.

"The wound is a simple one, but dangerous because of the possibility of blood poisoning," said Dr. Terrell. "Colonel Roosevelt has a phenomenal development of the chest. It is largely due to the fact that he is a physical marvel that he was not fatally wounded. The gun was a foul one and the bullet passed through too many substances before it entered his body for fear of blood poisoning not to be imminent."

The range of the bullet, which was of .38 calibre, was upward and inward, a distance of four inches on the chest wall. The missile entered above the upper border of the liver, less than an inch below the lower border of the lungs. The bullet lodged in the rib bone.

The wound, it was said, probably would have been fatal if the ball had penetrated either the lung or the liver.

If the bullet had entered the same point on the left side instead of the right, it would have penetrated the heart and caused instant death.

It was not deemed necessary by the physicians at Mercy Hospital, Chicago, to remove the bullet now, but a careful watch will be kept for septic conditions.

Should an operation prove necessary later it can be performed with only a local application of cocaine, according to Dr. Sayler.

## BLANKS WESTERN MARYLAND.

**Washington College Outplays Opponents and Win 13 to 0.**

Washington College defeated Western Maryland on Washington Field Saturday 13 to 0. The vicotory came through better all-around work, and there was no mistaking which was the stronger team. Washington scored a touchdown in the first quarter, but missed the goal. Another one came one second before the call of time in the last quarter, and Wilkinson shot the ball between the posts for a goal, the sphere grazing the bar as it went over. At no time during the game was Washington's goal threatened as a result of a more powerful offence. Two or three times Western Maryland had the ball in striking distance, but only the accidents of the game placed her there. Washington always succeeded in holding her safe, and then by superior work crowding her back into her own territory. The first touchdown came after Washington had succeeded by straight football in carrying the ball down to Western Maryland's 20-yard line. Captain Meekins took the ball on a criss-cross, tossed it to Lewis, who carried it across for a touchdown. Again in the last quarter the forward pass was worked to perfection, Captain Meekins receiving some beauties until Washington got close enough to send Biddle crashing through the line for the second touchdown. Time was called a second later. This game showed greatly improved form on the side of Washington College. The team looked 50 per cent. stronger than last Saturday, and if it goes on picking up it will be in line for another State championship. Branham, Wilhinson, Biddle and Meekins and Brown starred for Washington, while Bowers, Numbers, Weaver and Beale did the best work for Western Maryland Lineup.
