LOCAL MATTERS

His Keys in Front Door.—A well-known resident of Washington avenue while on his way home one evening this week felt in his pockets for his front door keys but failed to find them. Thinking the door was locked, he got a ladder and got into the second-story window, and when he came down to see that the front door was securely locked, *he found his keys in the front door.* Well, the poor man's wife was away on a visit, and thereby hangs the tale.

Injured in Driving Accident.—Mrs. Fred S. Russell is confined to her bed as the result of an accident which happened last Friday afternoon. Mrs. Russell was driving from Church Hill to Chestertown, accompanied by her little daughter, Margaret. When near the G. W. Smith farm, the horse shied at some object in the road, the sudden swaying of the carriage throwing the little girl from the seat. In her effort to rescue the child Mrs. Russell lost control of one rein. This caused the horse to turn abruptly to one side, overturning the carriage. Mrs. Russell was thrown heavily to the ground. She was picked up by Mr. W. P. Newman, who witnessed the accident, and brought to her home in Chestertown. She has since been under the care of a physician and is suffering intense pain with the loss of the use of one limb. The little girl escaped injury.

A Fine Lighting System.—Mr. Julian M. Brown, one of our prominent young business men, is the local representative for the celebrated Nagel, Chase Manufacturing Company, of Chicago, whose system of lighting is guaranteed to give more brilliancy than electricity or city gas at one-tenth the cost. Mr. Brown has installed this system in a number of homes and business places in Kent and Queen Annes, and those who are using it are delighted with it. Every country home may have this system which will afford them as good lighting as can be found in the city. Among those who have these lights are: Wm. S. McDonell, Graham & Clements, Wm. A. Burk, Herman Blackway, E. S. Valliant, Jr., in his home, in Church Hill, and F. O. Meads, Price's Station. Mr. Brown will be very glad to confer with you in reference to the cost of installation. He understands his busin ess perfectly.

Improvements in Chestertown.

At the February meeting of the Ladies Improvement Association, in a general discussion of the town and what the members could do to help better conditions, it was generally conceded that the town last summer was more free from fever, and in a better sanitary condition than at any previous time, and while the association wishes to give all credit to the Town Commissioners for doing every thing for the sanitation of the town which their funds will justify, at the same time they do feel that the improvements around the supply of the drinking water has had much to do with the health of the community. They wish to continue the work along lines where it is most needed. It was the opinion of the society that the improvement on Main street had made it a most beautiful street when well kept. It determined to continue the work inaugurated last summer when they placed the cans at intervals along the entire street as receptacles for waste paper. To accomplish this they need money, and will give an entertainment and a thirty five cent supper just after Easter. The ladies are still collecting newspapers, magazines and rubber. They ask the co-operation of every one in all this work.

Mr. John White has accepted a position with the Centreville Electric Light Co. and has removed his family there.

Can Have Road if They Want it

The State Road Commission has prepared specifications for a *shell road*, 9 feet wide, between Betterton and Still Pond, which it is estimated will cost $4500 a mile. The first estimate by the State Roads Commission indicated a cost of $10,000 a mile for a 14 foot *stone road* and of course our County Commissioners very properly notified the State Roads Commission the people of this county would never build such roads. After repeated and continued correspondence the Commissioners have at last gotten from the State Roads Commission specifications for the shell road such as was asked by the progressive farmers in and around Still Pond and Betterton. If they carry out their purpose and pay 10 per cent. of the cost of this road, so that the county will pay 40 per cent. and the State 50 per cent., it looks very much as if Betterton, Still Pond and that progressive section of Kent county will shortly have a fine roadway from the railroad station to Betterton. Let the people out there immediately arrange to meet our County Commissioners, pay over the money and the Commissioners will then advertise for bids.

In the above statement charged to use of pump house is one item of $215.34 which was for material furnished in 1911, but no bill was presented until 1912, deducting this from the amount charged pump house and we have the sum of $1,756.57, which is the amount actually expended in 1912 for use at pump house, as all invoices for the year are in.

We have examined the books of the Superintendent and Treasurer, and find that the above is a true statement of the condition of the water department as shown by them.
