To Divide Farm Lands.—Realizing the necessity for a more intensive system of farming and the demand for small farms by industrious and intelligent settlers, a number of landowners along the river front in Queen Annes have combined and entered into an agreement to divide a portion of their farms into tracts of 50 acres each and offer these desirable tracts to prospective purchasers. Our space is so limited this week that we can only give the above intimation. The plans and developments will be published from time to time. We believe the Rich Neck Farmers' Club is behind the movement.

More Jobs Than Men.—Predicting that within a month there would be more jobs in the United States than men, Secretary of Labor Wilson last week hoped to solve the problem of getting men to fill the places. His forecast was based upon the bumper wheat crop and the revival of the iron trade, mining and the textile industry. The Secretary has received requests for more than 80,000 laborers in the wheat belts of the West and South, and he plans to arrange with the railroads special excursions from the East to get the men to the wheat fields.
