Comptroller Refuses License.—That the State Comptroller has no authority to go behind the law, by permitting the issuance of a license for purse-net fishing for any purpose, of mesh less than the designted size, was the decision rendered by Judge Brashears, in Anne Arundel Circuit Court, on Tuesday in the action brought against Comptroller Emerson C. Harrington. The petitioner was Willis E. Overton, of Calvert county. Mr. Overton sought to obtain a license for a purse net of less than three-inch mess, stating his purpose to catch menhaden, or the fish commonly know as ailwives. KRIT $950

WITH ELECTRIC STARTER $1050 F.O.B. Detroit

Why Pay for Useless Weight?

KRIT lightness comes from correct design—not from skimping. 120 pounds in weight is saved by using aluminum for our crank case and transmission case. The sturdy, powerful KRIT motor weighs only 283 pounds, as against 400 to 550 pounds for motors in cars the same size and power of the KRIT. And so on—throughout the car.

Engineers tell us that the KRIT is two years ahead of its field, for it possesses, at $950, the quality features you find in cars at double the price. The sensational sales records made by the new KRIT is an endorsement by critical motorists that proves these experts right.

So, we ask you, what more can you get in a higher priced car? More weight, perhaps, but weight only adds to the expense of upkeep. More *rated* horsepower, but much of the extra horse power is used up in carrying around the extra weight—and the rest of the excess power you do not need. For the KRIT will take you anywhere you want to go. It will take you there speedily, safe and comfortably.

Learn more about the economical, dependable KRIT—the moderate priced car with the high priced features. A ride will demonstrate to you the rare quality of this car—value you can't get elsewhere at the price.
