SANDY BOTTOM DEPARTMENT STORE!

Kennedyville Items.

Mr. and Mrs. L. A. Pennington celebrated the 20th anniversary of their marriage on Sunday last, and entertained at dinner their mothers and Dr. and Mrs. James W. Urie.

Mrs. Lulu Dukes spent a part of last week as the guest of her parents, Mr. and Mrs. Bonwill, of Still Pond.

Mr. and Mrs. Tilghman Shafter and daughter, Miss Emma, attended the meeting of the farmers club last Thursday at the home of Mr. and Mrs. Harris, near Betterton.

Mrs. Frank S. Cain and daughter, Bessie Jett, returned home last week after spending sometime as guests of Mr. and Mrs. Abel Numbers, of Willowdale, near Clayton, Del.

Miss Bessie and Eva Jewell spent the week-end as guests of their parents, Mr. and Mrs. Wm. Jewell, of near town.

Regular meeting of Kennedyville Grange, No. 244, was held on Monday evening last, at which time four were elected to membership, and will be initiated on Monday evening next.

Master Headly Clews is wrestling with the measles.

Mrs. George M. D. Glenn spent Surday last as guest of her sister, Miss Lulu VanDyke.

The regular meeting of Kennedyville Methodist Protestant Church members was held on Sunday last when Bro. George R. Rasin was duly elected delegate and Dr. James W. Urie alternate to the annual conference, and were unanimously instructed to ask for the return of the present pastor, Rev. Frank S. Cain, for the coming year.

Quite a number of the members of Kennedyville Grange, No. 244, went to Galena on Thursday of last week and initiated about 40 members for the Galena Grange. They all report a good time, and hope they may soon have another class to initiate. The entertainment will be given in Weer's Hall on Saturday, March 20th.

Mrs. Joseph H. Weer spent a few days with her mother, Mrs. Hayes, of Galena.

The Ladies' Aid Society met at the home of Mr. and Mrs. E. L. Redmile on Friday of last week, quite a large crowd being present.

Regular services in the Methodist Protestant Church on Sunday next: Sunday school, 9.30 A. M.; preaching, 10.30 A. M. and 7.45 P. M., by the pastor, Rev. Frank S. Cain; Christian Endeavor, 7.15 P. M.

Betterton Notes.

The monthly business meeting of the Epworth League was held at the home of Mr. William Bowman Tuesday evening. Plans were made for the entertainment to be given by the Fairlee Minstrel Troupe this evening at the Chesapeake House. The proceeds will be for the gas lights that were installed in the new Church by the Epworth League.

Surveyors laid off the building lot for the new Catholic Church this week. The lot is on Bayside, adjoining the new Methodist Church, work will begin on the structure shortly.

The Embroidery Club will be entertained by Mrs. James T. Crew at her home on Thursday afternoon.

Mrs. Howard Owens and son, Howard Beauchamp, have returned to their home having spent the past ten days with her parents, at Queen Anne.

Mrs. George W. Moore and Mrs. Fountain Crew are visiting Mr. and Mrs. Walter Brice in Philadelphia.

Mrs. Bayard Crew and Mrs. Arthur Brice spent the week-end with Mrs. Elva Hurlock, of Church Hill.

Mr. Jos. Owens, of Philadelphia, was the guest of his mother several days this week.

Mrs. Mattie Tull is visiting frends in Philadelphia.

Mr. John S. Owens, of the steamer "Groves," is spending some time at his home in Betterton.

Mr. and Mrs. Carlton C. Moore are receiving congratulations upon the arrival of a baby boy, Herbert Emerson, born March 4th.

A carefully edited Agricultural Department and full and reliable Financial and Market Reports are special features.

Entered at the Postoffice at Baltimore, Md., as second-class matter, April 12, 1904.

YOUR TIMOTHY YIELD MAY BE INCREASED.

Application Of Proper Fertilizer Early In The Spring Will Bring Results.

NICKOLAS SCHMITZ.
Maryland Agricultural College Extension Service.

Everything considered, good clean stable manure is beyond a doubt the best fertilizer for grass. But this is not always available or it may be more profitable to use it somewhere else. On the other hand, when the proper commercial fertilizer materials are applied at the right time, it is seldom that profitable results do not follow.

Extensive tests at this Station show that nitrate of soda and acid rock, when used in combination, give the best results. In fact, on the average Maryland soil phosphoric acid when applied alone to timothy in the form of acid rock, basic slag, or in combination with muriate of potash will seldom pay for the cost of materials and their application. The proper amount depends, of course, upon the soil, but ordinarily nitrate of soda should be applied at the rate of 150 to 300 pounds per acre. The acid rock should be used at about the same rate. The two may be mixed together and applied with the grain drill if they are in first class condition, otherwise it may be necessary to mix in dry sifted coal ashes, dry sand, or other absorbing material.

The fertilizer should be applied in the spring as soon as the grass begins to green, which is usually the latter part of March or the first week in April. The early application of the fertilizer is absolutely necessary for the maximum returns. The fertilizer can not act upon the plant until it has been dissolved and carried down to the plant roots. Tests show that applying all the fertilizer early in the spring gives as good or better results than if the distribution is made several times in a season. Land ordinarily producing a ton of hay to the acre may be expected to yield 2½ tons per acre in a normal season when 200 to 250 pounds of nitrate of soda and the same amount of acid rock are applied early in the spring.

SENSIBLE FEEDS FOR THE BROOD SOW.

Recommended In Experiment Station Bulletin To Progressive Hog Raisers.

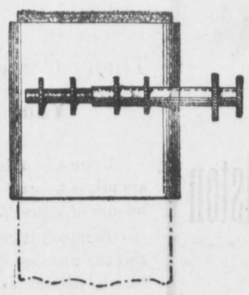

When a sow is producing two litters a year there is seldom a time when she is not doing double duty. During the period of gestation she must keep up her own bodily functions and in addition supply the nourishment for the development of the foetal litter. After farrowing the drain upon her system in providing feed for the young pigs, is even greater than during the period of gestation and we should therefore be able to appreciate the necessity of supplying her with the proper amount of suitable rations at all times.

Summer feeding during the period of gestation should consist of good pasture and a variety of concentrated grain rations. For the latter the following mixtures are recommended:

1. Four parts of milk by weight and one part of corn.
2. Five parts corn meal, five parts middlings or ground oats and one part digestor tankage.
3. Equal parts of shorts and corn.
4. Eight parts of corn and one part of digestor tankage.
5. Six parts of corn and one part of oil meal.

If the sows are to be fed entirely on grains the following mixture is recommended by the Wisconsin Station: Corn meal, 23 pounds; ground oats, 23 pounds; wheat middlings, 23 pounds; wheat bran, 23 pounds; oil meal, 6 pounds; salt, 2 pounds; total, 100 pounds. This should be fed as a slop.

The winter feeds of pregnant sows should consist largely of bulky foods such as milk, roots, clover or alfalfa hay, and enough of the above grain rations to keep them in good condition.

LAMP WICKS CAN BE RAISED EVENLY.

Simple Home Device For Saving The Busy Housewife's Time.

The Rev. Alan Pressley Wilson, a clergyman of Baltimore, has devised an arrangement for raising the wicks of an oil-stove evenly. Mr. Wilson's device consists in putting the ratchet wheels (for engaging the wicks), on a double spindle; those near the front being put on an outside, or sleeve spindle, and the rear ratchet wheels being attached on a spindle running through the "sleeve," and extending the entire width of the wick tube. With this arrangement it is possible to raise one end of the wick independently of the other, thus adjusting the wick to give an even flame.

WONDERFUL VACUUM.

Science Can Produce It Almost to the Point of Perfection.

Scientists have succeeded in getting what is practically a perfect vacuum—have succeeded in taking all the air out of a space except the one hundred and fifty millionth of it. As long as they had to deal with the old time so called suction pump very low vacuums were impossible on account of leakage. The mercury pump was relied on to give the better vacuums, but that took a long time indeed. Then the Gaede pump and before that the Geryck pump improved matters somewhat.

The device now used is as ingenious as it is swift and reliable. Suppose that we have a sealed tube containing air. If we place this in liquid hydrogen the air in a few minutes becomes a solid in the bottom of the tube. If all the air were frozen we should have a perfect vacuum left, but air contains what the chemist calls "traces" of several inert and hard to freeze gases, two of which are helium and neon. The tiny amount of these rare gases found in the air is, of course, left in the space, and so a perfect vacuum does not appear. But helium has been liquefied also. As liquefied helium is the coldest thing obtainable, it will not freeze any more of itself.

To make the vacuum more complete, however, it was decided to put some charcoal in the tube. It had long been known that hot charcoal had the power to absorb or "occlude" gases, but little was known about its power when as cold as liquid air. A great surprise was in store for the first man to try it, however, for it was found that it absorbed a great deal more when very cold than when warm, in some cases seven or eight times as much. So the charcoal placed in the space absorbed a good part of the gases remaining, and the wonderful vacuum of .0000058 of a millimeter, the normal pressure of the air being 760 millimeters, was obtained.—Chicago Herald.

HOW OLD ARE YOU?

Do You Know Your Age and the Year and Day of Your Birth?

How old are you? When were you born? See if you really know. See if your children know how old they are. Do not laugh at these simple questions until you try the test.

According to a recent issue of the United States public health service reports, it is a common occurrence to find school children, even high school pupils in the junior and senior years, who cannot tell how old they are, or who, if they know their age, cannot tell accurately in what year they were born.

You will need this information when you apply for a marriage license, or in registering for voting, or in seeking a government position, or in case you claim that you are heir to a fortune that is going to some other person. You may have to go under oath as to your age when you pay your custom duties upon return from your next European trip. So you should practice.

In some of our states there is no birth registration, so you may not be able to prove from the records that you ever were born. This might be embarrassing to you if you want to marry in Europe.

Perhaps the easiest way to remember your age is to form some jingle or rime on your birth year. For instance, "In 1897 little Johnnie came from heaven," or "In 1882 little Susie began to boo." Never mind what the rime is, just so you remember it, and if, after reaching the age of forty, you want to prove that you are only twenty-three years old, just change the rime and perhaps people will believe you when you repeat the jingle to prove your youth.

U. S., Not U. S. A.

Do you know what is the proper abbreviation of the United States? It is U. S. It is not U. S. A. There is widespread and apparently utter ignorance of this fact. The initials U. S. A. are the officially accepted abbreviation for United States army and do not under any possible conditions ever mean United States of America. At this time, when so many manufacturers in this country are branding their goods as made in the United States, this is important. The brand of U. S. A. upon anything means that it was manufactured for the United States army. "Made In U. S." is the brand which should be put upon all goods manufactured in this country.—Albany Knickerbocker Press.

Woes of an Author.

"How's your new book coming on?"

"Passably well. The demand isn't what it should be. I mean among purchasers. And, of course, if people don't buy the book there's nothing in it for me."

"I see. By the way, I'm reading it now. Binks loaned me a copy that Tompkins borrowed from Bradley. Pretty fair story."—Cleveland Plain Dealer.

Earth's Diameter.

The earth's greatest diameter is not necessarily at the equator. According to the eminent Professor Henkey, the actual greatest diameter is that taken from the summit of Mount Chimborazo. The line drawn from this point to the opposite side on a point in Sumatra gives a diameter of 7,929 miles.—New York American.

Rubbing It In.

Miss Elderly—The insulting wretch! He asked me if I remembered the dreadfully cold winter of 1879. Think of it! Miss Keen—Oh, I'm sure he didn't mean to offend you, dear. He probably didn't know what a bad memory you have.—Boston Transcript.

IMPORTANCE OF HEAITHY KIDNEYS.

Chestertown Readers Should Learn to Keep the Kidneys Well.

The kidneys have a big work to do. All the blood in the body is coursing through the kidneys constantly to be freed of poisonous matter. It is a heavy enough task when the kidneys are well, but a cold, chill, fever or some thoughtless exposure is likely to irritate, inflame and congest the kidneys and interrupt the purifying work.

Then the aching frequently begins and is often accompanied by some irregularity of the urine—too frequent passages, sediment or retention. Thousands testify to the wonderful merit of Doan's Kidney Pills, a remedy for the kidneys only, that has been used in kidney troubles 50 years. You will make no mistake in following this Chestertown citizen's advice.

Mrs. Frank Robinson, Front street, Chestertown, says: "Doan's Kidney Pills certainly live up to the claims made for them. They benefited me after doctors' medicine and all else had failed. I was often dizzy and nervous and my back and head ached. The kidney secretions also annoyed me. When I heard about Doan's Kidney Pills, I immediately began using them and they did their work well, giving me prompt relief. I am now strong and well."

Price 50c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Robinson had. Foster-Milburn Co., Props., Buffalo, N. Y.

SAVED A FOOT

January 11th, 1915.

WHITE FOOT REMEDY CO.,
Centreville, Md.

Dear Sir: Please send me by Parcels Post a large size can of White Foot Oil. I have been crippled for 15 years, had a bad running sore on my foot, and had decided, on the advice of physicians, to have it amputated. I heard so much about your oil that I thought I would try it, and it has done the work, it has saved my foot. It is the greatest healer I ever saw for a sore, whether on man or beast.
