Paint?

There are two good reasons for painting often-enough or even too-often. One, to look prosperous; two, to be so.

Nothing does one more credit or gives one more credit than paint, supplemented of course by which goes with it; and paint costs nothing.

True, the first cost is $5 or $6 a gallon put-on; but it saves more than that in the property; saves it from slow going-down—not always slow—it drops with a jump when water gets in on wood and iron.

Dry wood and iron costs nothing, kept dry by paint.

Better paint when it needs it. Paint never goes-down in the sense of being more profitable next year.
