THE TRANSCRIPT

Published Every Saturday Morning at Chestertown, Md.

Saturday, Aug. 17, 1918.

Entered at the Postoffice at Chestertown, Md., as Second Class Matter.

THE Allied armies are still advancing on the entire French front. The German armies are making a stubborn resistance, but are being slowly pushed back. The American army is in the thick of the fight and is proving too much for their Hun opponents. The Crown Prince is reported to have said that the American soldiers are good fighters. We believe the Germans will be more and more convinced of this fact as the war progresses. When America gets good and ready for the fight, with her full man power in the field the Huns will realize what their challenge to America to enter this war fully means. The people of America are behind their soldier boys to the finish with their money and every other available means that they possess.

PUBLIC SALE
—OF—
SCHOOL HOUSE
AT FAIRLEE.

The old Frame School Building at Fairlee will be sold by the Board of Education at Public Sale, on

Saturday, Aug. 24th,

AT TWO P. M.

TERMS CASH.

J. P. AHERN, President,
a17-2t E. J. CLARKE, Secretary.

SALE OF
Fancy Registered and Grade Cattle

Will be held at my Stables in Cecilton, Md., on

Thursday, Aug. 22, 1918

at 10.30 a. m., rain or shine.

STOCK WILL CONSIST AS FOLLOWS:

25 head of Registered Holsteins, Cows, Heifers and Stock Bulls, tuberculin tested and tabulated pedigree for each animal. Special mention of a few below.

Beauty Ruble Countess Dekol Paul, No. 169340, a cow with an A. R. O. record of 494 lbs. of milk in seven days. Dated August 31st, 1917; nicely marked and due to calve September 25th, 1918.

2nd Laura Pauline Ruble Dekol Paul, No. 254,636, a 3-year-old cow with an A. R. O. record of 337 lbs. of milk in seven days, dated January 15, 1918, and due to calve September 24, 1918.

3d Cow and Calf, Locus Ebo Netherland, No. 286,286. This 3-year-old heifer has a heifer calf by her side, and both heifer and calf are as fine as money will buy.

4th Ruble Abbekirk Dekol No. 421,-400, a fine large white heifer, as nice as you ever looked at and due to calve February 19th, 1919.

This lot of 25 Registered Holsteins are the best I could find and the price did not stop me from buying them, when I found any with quality and breeding. Most of my heifers are out of A. R. O. sires. I Will have a pedigree for each one on day of sale, and you can see what you are getting before you bid. I have five nice Registered Stock Bulls in this lot.

25 head of large Fancy Grade Holstein and Guernsey Fresh Cows and Springers. These are young and extra large. The kind I always buy.

25 Grade Heifers, Holstein and Guernsey stock, nicely marked and with good breeding. Some Grade Stock Bulls. 10 Red Durham Sters, averaging about 900 lbs. and fit to kill.

25 Head of Horses,

Some good ones, and some good for nothing; but every one will be represented on day of sale, and must be as represented or no sale.

75 HEAD HOGS, SHOATS & PIGS.

Special metion of Registered Duroc Stock Hog; nice size and ready for service, and some Red Sow Shoats; do not know at this time but expect some sows and pigs, and sows heavy with pig, but I always have plenty of pigs and shoats at my sales.

One Ford 1918 Touring Car, in best of condition; 1 Indian Motor Cycle, ready to run; 1 new 8-foot Deering Binder, 1918 make; 1 new 5-foot Deering Mower, 1918 make; lot of Binder Twine, Automobile Shoes and Tubes, 50 Sacks of Federal Stock Food, these powders are guaranteed; lot of Brooms 1 Smith Form, a Truck that will carry two tons, in best of order; 4 two-wheel Scoops, lot of second-hand Carriages, Wagons and Harness.

Sale will be held Rain or Shine, and will start at 10.30 a. m., sharp, as I will have plenty to sell. Come early and get a fish dinner.

TERMS OF SALE POSITIVELY CASH.

JOHN ANDERSON, Owner,
Cecilton, Maryland.

P. S.—Will sell anything for ... commission at this sale.

TYPHOID FEVER

HOW TO PREVENT ITS SPREAD
ISSUED BY THE
STATE BOARD OF HEALTH OF MARYLAND

When TYPHOID FEVER appears in a family the source of the infection must be looked for in drinking water or food taken within the preceding 20 days. The patient may not have been infected at home, but if a second case occurs this second infection will in all probability be traceable to the first patient. In a majority of instances the drinking water has become infected. Your first business, therefore, is to find out the quality of your drinking water.

You can do this by asking your local health officer for instructions about shipping us samples of your drinking water. **The daily supply of drinking water should be boiled.**

The infectious material of typhoid fever is produced in but one way. It grows always in the bowels and sometimes in the bladder. It, therefore, escapes from the sick person in the stools and urine. If we kill the germs in the stools and urine as soon as they are passed, there can be no spread of typhoid fever. These discharges should, therefore, be disinfected as soon as possible. You will need a large quantity of a good disinfecting solution.

Receipt For A Good Disinfectant

To four gallons of water add enough salt to make a strong brine. Put this in a five gallon demijohn or jug and add a quart of crude carbolic acid. Shake it up well and you have a good disinfectant for stools and urine.

The crude carbolic acid, known as U. S. P. 90 per cent, is very good, and a quart will cost about 50 cents. There is a cheaper grade, known as a 36 per cent acid, which is nearly as effective.

About a pint of this solution should be put in the chamber or bed pan before it is used, so that the discharges will begin to be disinfected as soon as they leave the body. There must always be at least as much of the disinfecting solution as there is of the discharge so that more of the disinfecting solution may need to be added after the discharges are passed. If the stools are thin and watery their disinfection will be accomplished in half an hour or so, but if the stools are thick or formed very much more time will be required. On that account it is best to have a covered jar or bucket into which the bed pan can be emptied, and to empty this jar only once in 24 hours. If the discharges cannot be finally thrown into a sewer they should be buried in the soil at a convenient spot where there is no chance of their fouling a water supply. The discharge should never be thrown on the surface of the ground, for you will hardly be successful in killing all the typhoid bacilli, and you must not place them where those not killed by the acid may be blown about in the dust or carried away by flies to infect other people.

In spite of every precaution, those who wait on the sick person will get their hands infected, and it is, therefore, necessary to wash the hands every time one does any service about the patient's bed or body. Whoever waits on the patient must not prepare food or drink for other persons in the house, or if it is impossible to mind this rule one must most carefully and thoroughly cleanse the hands before performing any household duty outside the sick room. Good scrubbing with soap, water and a brush, and then rinsing well in fresh water will suffice for cleansing the hands.

If anyone else in the house falls sick within two weeks after the first patient, the probability is that the infection was lodged before the precautions were taken in regard to drinking water and the disposal of the discharges. But if the second case occurs more than 20 days after the first case that will signify that we have made a mistake somewhere in our precautions.

DR. GEO. R. JONES,
Secretary Local Board of Health of Kent County.
