1916-17	259,900,000 bu.
1917-18	340,800,000 bu.

In spite of a subnormal food supply in this country the American people have been able to ship to the Allies as well as our own forces overseas 141,000,000 bushels of wheat, besides 844,600,000 pounds of meat, during the year ending June 30 last. This has been made possible by the wholesouled co-operation of the people, who, besides practicing self-denial, have speeded up production and responded nobly to the appeal from abroad.

Food Administrator Hoover, in a letter to President Wilson, gives a brief summary of the results of food conservation in the United States and of the activities of the Food Administration to this end. The conservation measures have been put through practically on a voluntary basis which is regarded as a splendid tribute to the patriotism of the American people.

Meat shipments were increased 844,000,000 pounds during the first fiscal year, as compared with our meat exports during the year before America entered the war.

"The total value of these food shipments," Mr. Hoover wrote President Wilson, "which were in the main purchased through or with collaboration of the Food Administration, amount to, roundly, $1,400,000,000 during the fiscal year."

In 1916-17 the United States sent the Allies 2,166,500,000 pounds of meat. In 1917-18, with voluntary conservation practiced in America, and aided by extra weight of animals, we sent the Allies 2,011,100,000 pounds of meat, an increase of 844,600,000 pounds.

Wheat Saving Enormous.

When the Food Administration began operations in the summer of 1917, this country was facing a large deficit in wheat. Counting in all carry-over wheat from the 1916 crop, we had at the beginning of the 1917 harvest year just enough wheat to take care of America's normal consumption,—not a bushel of surplus.

At the close of the 1917-18 harvest year the Food Administration's official reports showed that our total wheat shipments to the other side had been 141,000,000 bushels. Every bushel shipped was wheat saved by the American people from their normal consumption.

In cereals and cereal products reduced to terms of cereal bushels our shipments to Allied destinations were 340,800,000 bushels, 80,900,000 bushels more than the amount sent in 1916-17.

Included in these figures are 13,900,000 bushels of rye and the 141,000,000 bushels of saved wheat. In addition we sent the neutrals dependent on us 10,000,000 bushels of prime breadstuffs.

"These figures do not fully convey the volume of the effort and sacrifice made during the past year by the whole American people," the Food Administrator wrote. "I am sure that all the millions of our people, agricultural as well as urban, who have contributed to these results should feel a very definite satisfaction that in a year of universal food shortages in the Northern Hemisphere, all of those people joined together against Germany came through to the new harvest, not only with health and strength fully maintained, but with only temporary periods of hardship.

"It is difficult to distinguish between various sections of our people—the homes, public eating places, food trade, urban or agricultural populations—in assessing credit for these results, but no one will deny the dominant part of the American women.

SUGAR SHORTAGE HITS SPAIN AND PORTUGAL

In Spain and Portugal sugar prices are soaring. Both countries have been seriously affected by the short beet sugar crop in Europe and the lack of ocean tonnage to move stocks of cane sugar isolated in far away ports.

Granulated sugar, home grown, was being sold in Barcelona, Spain, during the early summer at 19 cents a pound. The price of brown sugar in Lisbon, Portugal, fixed by governmental order, was $1.04 to $1.12 a pound.

By comparison the price of beet sugar in Sweden is 14 cents a pound.
