We Will Paper Your Room for $3 and upwards,

and guarantee satisfaction or no money.

YOU WANT YO RP ICTURES FRAMED

all and see our selections of Moulding before going elsewhere. They are the finest in town. We can be found at the old stand, opposite Burk's Shoe Shop, on Cross street.

Yours for Business.

W. L. FOWLER.

BONES AND BAGS.

On account of the war many of our supplies of Bones have been cut off, and in order to get all the nice dry country bones possible, we have determined to pay about twice as much for dry bones as we used to pay, if they are delivered at our factory.

The country boys should pick up all they can and bring them to us instead of selling them to the junk dealers.

We will also pay the highest market price for good second hand Fertilizer Bags. Please communicate with us.

Very truly yours,

The Peerless Fertilizer Co.,

CHESTERTOWN, MD.

UNCLE SAM'S PARTNER

(Courtesy of Life and Charles Dana Gibson.)

Planting home gardens, producing more food, and saving food are all war-time efforts of this government in which the women of America have co-operated loyally. We are all in the home army; the home army here must help the fighting forces and home armies over there; 120 million Allies must eat.

GENERAL SUGAR CONSERVATION

Is sugar necessary in the diet?

Neither cane nor beet sugar is necessary. In the average American diet all the sugar needed may ordinarily be supplied by using honey, sirups, fresh, preserved and dried fruits.

What are the general sugar saving rules?

Use all sugar sparingly and wherever possible use other sweeteners. Be sparing of confections and sweet cakes. The American people last year spent enough money for candy to feed all Belgium for two years. Supplement sugar with honey and sirups. Cultivate a taste for fruit in its natural sweetness. Sugar is a fuel food. Get fuel from potatoes and other starchy foods rather than from sugar. Sugar excels them as an energy-food only because it produces energy more quickly. They excel sugar since they supply more than merely the fuel need.

How may the sugar ration be expressed in quantities known to everyone?

Two pounds per month means about 8 ounces per week, or a little more than 1 ounce a day. This daily ration is a trifle more than 2 tablespoons level full. It should be remembered that this is to include all sugar used for any purpose whatsoever—for table use, cooking, in ice cream and desserts, on cereals or fruit, in sugar sirups used on griddle cakes, etc.

SUGAR EXPORTS SMALL TO NEUTRAL NATIONS

Only 797 tons of refined sugar were shipped from America to neutral nations during the first five months of this year. This amounted to only 3.2 per cent. of the total exports to all countries. Mexico received more than half the amount we exported to neutrals.

SAVE SUGAR.
Sugar means Ships—
Ships mean Soldiers—
Soldiers mean Victory.

ONE SPOON, PLEASE.

Make one spoon of sugar
Do the work of two.
Keep the program going
Until the war is through.

FRANCE AND BELGIUM GET AMERICAN SUGAR

Ninety-five per cent. of all refined sugar sent from the United States to the Allied nations went to France and Belgium during the first five months of this year.

France got 72 per cent., or nearly 33,000,000 pounds, and Belgium received nearly 11,000,000 pounds, or 23 per cent.

In each country this sugar was doled out by a strict rationing organization.

The entire amount to the Allies in these five months—23,791 tons, almost half of which was shipped in May—is only about one-half of 1 per cent. of our total annual consumption.

MORE FRUIT and LESS SUGAR

How?

More	Less
Canned Fruit	Jam
Dried Fruit	Jelly
Fruit Butter	Preserves
Fresh Fruit	Sweet Pickles

WORLD SHORTAGE IN BEET SUGAR

Crops Are 40 Per Cent. Less Than Pre-War Average—Central Powers Hit Hardest.

CANE SUGAR IS ISOLATED

Allied Beet Production Falls One-third in Rigid War Economy Practiced.

The world today is producing forty per cent. less beet sugar than the pre-war average.

Counting the American, Allied and German-Austrian crops, as well as the neutrals, the U. S. Food Administration has estimated that the world shortage created by the light crop of 1917-1918 is at least three and a half million tons.

That the 1917-1918 crop of cane sugar was two million tons in excess of the previous year does not relieve the general shortage.

Cuba and Java produce one-half of the world cane crop, and the Java sugar is too far removed from America to transport when shipping is badly needed to transport and maintain the military forces in France.

In Java a large part of the old sugar crop is still awaiting shipment. Since it requires 150 to 160 days for each boat that is sent to Java, the possibilities of obtaining adequate shipments of Java sugar this season are remote.

Allies' Production Falls.

Taking the Allied nations as a group, official reports show that beet sugar production is less by one-third than the pre-war average.

French beet sugar industry has suffered most by the war. The French yield of beet sugar is now only 29.1 per cent. of the pre-war average.

For the five years preceding the outbreak of hostilities in Europe, France produced an average of 752,542 tons of sugar each year. For 1917-18 the French production was 219,416 tons.

With 61 factories operating, as compared with more than 200 that were in existence before the war and before the general campaign of destructiveness launched by the German armies, France nevertheless managed to manufacture more beet sugar in 1917-18 than in 1916-17, when the total output was 202,415 tons.

Italy in 1917-18 produced 100,800 tons of beet sugar, which was 56,000 tons less than the previous year and 110,250 less than the annual output of sugar for the five year pre-war period.

One of the great difficulties experienced in Italy's beet sugar industry was finding sufficient labor to handle the crop. Thousands of men usually employed in beet sugar production were called for military service. The yield per acre amounted to approximately half of the usual quantity of beets harvested.

Campaign Against Rats In Kent

How much is it costing you to feed the rats on your farm? Experts have placed the cost at 1-4 cent per day per rat. At the present need of conservation of food, you cannot afford to board rats.

The rapid multiplication of rats is another factor to be considered, as each rat begins to reproduce at the age of three months and produces three to five litters, averaging ten to fifteen every year.

Opportunity is now offered to farmers in Kent County to secure the aid of the State Extension Service in exterminating rats on their farms.

Mr. C. J. Pierson, of the Dept. of Economic Zoology of the College cooperating with the County Agent, will schedule a series of demonstrations of the most approved methods of rat extermination.

In order to secure the services of the County Agent and Mr. Pierson, it will be necessary for the farm owners to agree to follow the suggestions of these men in every detail. Trapping, poisoning, the use of dogs and the destruction of the hiding and breeding places of the rats, together with the rat proofing of corn cribs and granaries will be the methods followed.

The Extension Service will furnish the traps and poison. The farmer must agree to furnish the help necessary to clean up and rat-proof where necessary.

Women's Denfense Council

At a meeting of the Council of Defense, held Monday afternoon at the Eastern Shore Inn, matters connected with the interest of the organization were discussed by the various chairmen who were present.

Mrs. W. W. Hubbard, Chairman for the county, presided. She spoke of the difficulty in securing efficient chairmen for the different branches of work. Their diffidence, I will not say their indifference, to take responsibility, hitherto has retarded the progress of the work. She congratulated herself, however, that now chairmen, only another word for leaders, headed each division of work and good and great results may be looked for.

BABY WELFARE

100,000 babies to be saved this year is the slogan resounding through the United States, so the chairman told us. How is it to be done? Ask our efficient County Nurse. Cards are distributed for registration of babies, their age, weight and measurements. President Wilson desires this. Will you disappoint him by not co-operating in this so important matter. Oh, ye wilful mothers, when it is for the lasting welfare of your child? Shall we have registered stock and not registered babies? Are they not of as much value that you take so little thought for them? It is said more babies die in a year than men are killed in the war.

FOOD CONSERVATION

This important war measure was discussed with Mrs. Wm. G. Smyth, chairman of that department. Many and various methods of saving and substituting were debated. Syrups for sugar had been found by many an excellent substitute. Extracts from papers were read showing the widespread interest in the question. One from Nevada read 'Use only one level teaspoonful in your coffee. Don't be a U-boat, so stir like hell for we do not mind the noise." This from a mining district.

WOMAN IN INDUSTRY

This question also received great attention, although the chairman, Mrs. Lecates, was absent. She would have been much encouraged had she been present, at the interest manifested. Women engaged in any kind of work were requested to register and chairmen of the various districts were requested to see that they did. Let there be no slackers in this matter.

LIBERTY LOAN, THRIFT STAMPS

Mr. Allan Harris, chairman of the Men's Council of Defense, came in before the close of the meeting and talked of the Fourth Liberty Loan. Thanking the women for active interest in the last three loans he asked for a continuance of same in the fourth, not doubting but what the same results would follow from their earnest participation in the campaign.

His able and timely remarks were received with enthusiasm and plans outlined by which fewer and larger meetings might be held in the interest of the Loan, thus saving time and strength. This will be decided by the Men's Committee. Mrs. Harry Willis, chairman of the Fairlee district, and others promised their hearty co-operation.

After the wonderful things told us of our country at Chautauqua, what are a few billions of dollars for America to raise? America, home of the free! Free to spend her billions for humanity.

The Chairman said that Mrs. Walter Morris had accepted the chairmanship of the Y. W. C. A. drive, which was not under the control of the Council of Defense. Knowing the comfort this organization affords "our boys" as well as all soldiers at the front, the drive should meet with overwhelming success.

The County Chairman asked for full reports to be brought in at the October meeting after which the meeting adjourned.

No More New Public Buildings.—The War Industries Board recently passed a ruling whereby no new building should be erected for educational purposes, except for replacement, during the war. The Board held that the schools already built will care for the educational needs of the country until the war is over. This ruling will also apply to any public buildings, except those needed for war purposes.

Wheat Hoarding Impossible Next Year

Hoarding of wheat by disloyal owners will be made more difficult by a system of reports which the Food Administration is requiring thrasher men to make, it was recently announced at the headquarters of the food administration for Kansas.

The Kansas administration is supplying record books to each of the 20,000 thrasher men in its State. At the close of the season the thrasher men must return these records to the thrashing division of the United States Food Administration. Each farmer must show how much grain of each kind he thrashed.

Should an emergency arise like that of last May, when it became necessary to call for all wheat in the farmer's bins, it will be a simple matter for every township administrator to check over the farmers in his district. Elevators and mills will keep a record of the wheat sold, and by subtracting this from the wheat thrashed it will be easy to find how much grain should be in the bin.

This system will work to advantage where a farmer is charged with feeding wheat to hogs and chickens. If the amount of wheat sold and the amount in the bin does not equal the amount thrashed, it is certain the remainder was fed to live stock, after allowance has been made for shrinkage.

The thrasher men's reports also will give an accurate account of all the wheat in the country at the end of thrashing. This information will be valuable in making wheat rules for the coming year.

American Red Cross

Cable advices received at the National Red Cross headquarters announce that acknowledgements have been received of 86 per cent of food packages sent to American prisoners in Germany. It is pointed out that this does not mean that only 86 per cent of total shipments are being received, but that lack of additional acknowledgments is due to carelessness on the part of the prisoners. The situation is regarded as satisfactory.

The cable announced that reserve supplies are on hand at all camps where Americans are interned so that in case the original packages are lost, or new men arrive, they may be supplied promptly. Complaints that food packages have not been received have been investigated and found to come from Americans serving with foreign units. American authorities are not responsible for these, but the American Red Cross is making sure that food is being sent by the committees under whose flag these men enlisted before stopping the American parcels.

French and British help committees in prisons have agreed to supply Americans from their reserve stocks in the event that American supplies are not available. Arrangements are being made for storage at camps where there are no reserve supplies.
