H. SACHS & SON

Fall Season 1918-19 is very much in evidence at our store

New and up-to-date merchandise is coming in every day, and when complete we will have one of the best selections of LADIES', MEN'S and CHILDREN'S goods, than ever before, consisting of the following lines, namely:

Ladies' Department.

SUITS, COATS, DRESSES, FURS, MILLINERY, SWEATERS, SKIRTS, WAISTS, ETC.

Men's Department.

SUITS, OVERCOATS, PANTS, HATS, SWEATERS, FURNISHINGS, ETC.

Children's Department

WE CAN CLOTHE YOUR SCHOOL BOY OR GIRL COMPLETE.

DRESSES, HATS, SWEATERS, FURNISHINGS, BOYS' SUITS, MACKINAWS, PANTS, CAPS, BLOUSES and SHIRTS.

No doubt you have heard everywhere of the tremendous advance in prices of all classes of merchandise; you will find it quite different here.

We are selling our goods this season at the same low prices as heretofore, and if any advance, it is so little as not to be noticeable to any extent. This is due to the fact that we made all our purchases early in the season before the goods advanced. As most of our goods are in, we invite you to come in now and make an early selection, we have just what you are looking for.

H. SACHS & SON,

Leaders in Ladies' and Men's Wear

Toulson Building Chestertown, Md.

Don't raise potatoes for the Bugs and Blight to destroy.

If you have never used PYRO before get a can this season. RAIN WON'T WASH IT OFF.

1, 5, 10, 25 and 50 lb. cans in stock.

"PYROX is the best spray I have ever used on potatoes and tomatoes."—F. B. HARPER, Still Pond, Md.

PYROX disposes of the bug question on all kinds of vegetables and fruits. If you believe in growing good products, free from disease and insect damage,

SPRAY WITH PYROX

7-GAL. CREAMERY CANS, "WHIZ" FLY SPRAY, GARDEN WHEELBARROWS AND CULTIVATORS, BARREL LIME.

We are nearly sold out of our stock of New Taylor Oil Stoves. If you haven't secured yours, get it quick.

R. D. MOORE & CO.,

RED CROSS SAVES SOLDIERS

Organization Acts on Theory That It Is Better to Heal Wounded Fighter Than to Pension His Family.

Long ago some one remarked that an ounce of taffy is worth a ton of epitaphy. A 10-cent bunch of violets to the living outweighs a $50 funeral wreath for the dead.

That's the motto of the Red Cross, says a writer in the Philadelphia Ledger. It is much cheaper to soothe and heal a wounded soldier than to pension his family.

Erecting monuments at Gettysburg and Valley Forge is well enough fifty or a hundred years after the events, but a dollar for the stricken soldier equals a hundred dollars in marble over his body.

Red Cross money is an insurance policy. What does it insure against?

Philadelphia's $3,000,000 will surely preserve scores of lives. So it insures against death itself, which is something an ordinary insurance policy does not do.

Wipe out Philadelphia's hospitals and how many more persons will die every year? Doctors tell me the number would be many hundred.

Deprive the battle front of hospital facilities and the death rate will jump enormously. So your Red Cross dollar is out upon a practical errand—not a sentimental, sissy journey.

It is certain to be invested in the life of a liberty soldier, which is a good enough investment for me.

HOW TO MEASURE HUMIDITY

Device That Is Satisfactory Consists of Combination of Two Thermometers and Vessel of Water.

You do not have to invest in a barometer, or expend your personal moisture by hurrying to the nearest "observatory," whether at a drug store or at a weather bureau, to ascertain the degree of humidity. From Power one gets this hint:

"The instrument in the weather bureau kiosk marked 'relative humidity' is supposed to show the percentage by weight of water vapor in the air, 100 per cent being when the atmosphere can hold no more in the form of steam. The maximum weight of steam that the atmosphere is capable of holding is dependent on and increases with an increase of the temperature. The action of this hydrometer depends on the expansion and contraction in length of a hair or fiber as it increases or decreases in moisture content.

"Another device for measuring the relative humidity is a combination consisting of two ordinary thermometers, one having the bulb covered with a wet cloth or a wick extending into a vessel of water. In the use of this instrument the wet-bulb and the dry-bulb temperatures are taken. If they are the same, the humidity is 100 per cent, but when there is a difference it is necessary to consult tables in order to obtain the relative humidity."

The True Socialism.

Once in khaki it matters extremely little what you were in civilian life. Among the group of thirty-odd ruffians who compose the population of my hut are an author, a journalist, two actors, a land agent, a schoolmaster, an agricultural gentleman, diversified business men, and striplings fresh from school and university.

Each of us preserves his own individuality—off parade, and in civilian life such a variegated group would infallibly split up into little cliques and cabals. As it is, we are informed with an amiability and a spirit of mutual helpfulness which is, I imagine, the true socialism, although so ideal a brotherhood has never yet been achieved by the political socialists who have had opportunity to put their theories into practice.—London Globe.

Cork Home for Silent Monks.

A striking curiosity near Cintra, Portugal, says a writer in the Wide World, is an ancient convent built partially in the interior of an immense rock. The convent is situated in a very isolated spot and was formerly surrounded by a dense wood of cork trees. The convent is known as the Convento da Cortica, or "Cork Convent," for the reason that the monks' cells, chapel, kitchen and refectory are all lined with cork to keep out the damp. From 1560 to 1834 the convent was inhabited by an order of monks known as the Capuchins, a remarkable feature of their religion being that, except on certain occasions, silence was obligatory.

India's Wheat Crop.

Advices from India indicate that there are 33,040,000 acres under wheat cultivation in that country, compared with 30,143,000 acres last year, or an increase of about 10 per cent. The total yield is estimated at 10,160,000 tons for this year, as against 8,518,000 tons reported at this time for last year, a gain of practically 19 per cent. These figures are based on the final reports on the wheat crop received from local authorities and relate to 98.5 per cent of the total wheat area in India. The figures covering both area and yield are the highest on record.

Unreasonable.

Divorce Lawyer—Your husband refuses you the common necessities of life?

Fair Client—He even kicked about your retaining fee.

Joys of Travel.

"I like to travel."

"You occasionally meet some nice people."

"And you may never see 'em again. That's another good point."

QUICK AID GIVEN WOUNDED

Rapid Treatment After Battle and New Cleansing Methods Save Lives of Many Soldiers.

Lieut. Col. Gilbert Barling, C. B., a famous English surgeon who is consulting surgeon to the great base hospitals at Rouen, which accommodate 15,000 patients, says that since the war began immense strides have been made in the surgery of the battlefield. Two improvements that may be noticed as having taken place since the outbreak of hostilities, writes a correspondent of the New York Times, are in connection with the rapid treatment of the wounded after a big battle and the cleansing of wounds.

Five or ten miles behind the fighting sufficient casualty clearing stations—each holding about 1,000 men—have been organized to deal with all the casualties that may reasonably be expected, so that once a man is picked up by the stretcher bearers he receives adequate treatment within a very short time. Here also is a special hospital, perhaps of 50 beds, for abdominal cases, which are the most urgent.

In the old days such wounds, because of the delay before they could be treated and cleaned, were generally considered to be fatal; but under the new conditions, by which a man so hit is placed in an ambulance and sent off immediately, if necessary, without waiting for other wounded to be placed in with him, the dangerous delay is overcome, and the wound kept aseptic and more amenable to treatment.

OIL TO BE KING IN FUTURE

Necessity for Petroleum Products Shown in War as Well as in Industrial and Domestic Life.

The European war is without a doubt doing more to direct general attention to the claims of oil and its multitudiness products than any amount of advertising in normal times could have accomplished, says a writer in the Petroleum Review.

The great clash of arms on the continent has from its commencement shown that the necessity for the products of petroleum in up-to-date warfare is no less than in either the industrial circles or in domestic life. We are today as much dependent upon the refined products of crude oil as we are upon wheat and other necessities of life, and as time goes on, and the uses which are constantly being found for petroleum multiply, our dependency upon oil becomes the greater.

It is no surprise, therefore, to find that not only are petroleum products generally commanding greater attention than they ever before did, but that a particularly healthy atmosphere permeates those enterprises which have laid themselves out—and successfully so—to engage in the production, the refining, the transport or the distribution of petroleum products. There is, in short, no mistaking the fact that in the future oil will be king.

"Lallah Rookh" Centenary.

Is the war holding back any poem comparable with "Lallah Rookh," the publication of which was delayed by the Waterloo campaign, and took place just a century ago?

Perhaps few read the famous Oriental romance nowadays, but Moore's reputation when he wrote it was such that he was able to sell it when he had scarce put pen to paper. Murray offered 2,000 guineas for it, but the poet's friends thought this too little, and approached Longman, stipulating that the price should be "not less than the largest amount ever paid for a poem." "That," said Longman, "was the £3,000 paid for 'Rokeby,'" and on that basis a bargain was struck, the publisher's only stipulation being that Moore's poem should be equal to Scott's in length. Even so, Longman had the best of the bargain. Seven large editions were sold within a year, and a quarter of a century later Longmans still regarded "Lallah Rookh" as "the cream of copyrights."—Manchester Guardian.

Camphor Groves.

Camphor groves may some day be as familiar to us as peach orchards and orange groves. Agents of the department of agriculture have found that when planted in hedges 15 feet apart camphor trees will yield each year about eight tons of trimmings to the acre, from which about 200 pounds of gum camphor can be distilled. At present prices that means a profit of about $160 an acre. The camphor trees are hardier than many of our fruit trees, but are suited only to the southern half of our country.—The Youth's Companion.

The Difference.

Major General (addressing the men before practicing an attack behind the lines)—I want you to understand that there is a difference between a rehearsal and the real thing. There are three essential differences. First, the absence of the enemy. Now (turning to the regimental sergeant major), what is the second difference?

Sergeant Major—The absence of the general, sir.—London Tit-Bits.

Doing His Best.

"I hope you'll keep my photograph next to your heart, Ferdy."

"I'll keep it as close as I can. I have no pocket in the garment immediately next to my heart."

Just So.

"It is said the soldiers at the front are smoking cigars made of roots, barks and cabbage leaves."

"That may account for some of these reports about noxious gases."

How You Can Shell the Huns

One of the worst of the Huns' devices was poison gas. Its first use was against French colonial troops at Langemaark, and they fled shrieking that the devil was after them. Less superstitutious Canadians patched the broken line, but as many fell victims to tuberculosis as the Hun bullets brought down. Quickly, Allied chemists got to work on an antidote and found it in nut shells.

From these and from fruit pits is manufactured the charcoal which is used in conjunction with gas masks. As long as the supply of these defensive shells keeps up the Hun is baffled.

For that reason, the Food Administration has issued a mobilization order for all the hickory, walnut and Brazil shells that America can provide. The hotels are showing the way, as in many other conservation schemes. Many are not only saving in their own kitchens, but are providing receptacles into which the general public are invited to deposit these contributions. Keep a box in your home and collect all the shells you can. Remove all the meat of the nut, see that the shell is dry and then when your box is full add its contents to the pile at the nearest "mobilization point."

Dates and figs are high in sugar value. Apricots, apples and peaches will not be so expensive, but they too are agreeably surgary.

POTATOES.

"The best part of the potato lies next to the skin, and even thin peeling wastes three to four ounces in every pound, declares the Potato Bulletin issued by the British Ministry of Food. Potatoes should therefore (except for such dishes as Irish stew) always be boiled in their skins. If baked in their jackets a layer of the best part sticks to the skin and is usually wasted."

USE LIGHT GRADE BEEF.

The beef restriction has been removed earlier than originally intended, but it is urged that housewives order the lighter grades from their butchers. The beef from cattle dressing over 475 pounds is the more suitable for shipment as an account of its thickness and fatty covering it is less subject to deterioration on a long voyage.

SCOFFING AT SUBSTITUTES IS SIGN OF IGNORANCE.

To doubt that the substitutes recommended by the U. S. Food Administration are wholesome, nourishing and palatable is a sign of stone-age ignorance. To make those substitutes meet every household need is a token of the active kind of patriotism that counts.

The substitute cereals are in every way as nourishing, as digestible, and, if properly prepared, as palatable as wheat. Lentils, dried peas and beans, eggs, whole milk, cheese—all are good substitutes for meat. Corn sirup, maple sirup, honey—these take the place of sugar. Many children were born and grew to maturity in the centuries before cane and beet were known. We are asked to decrease our use of fats. But if we use vegetable oils for cooking we may with a free conscience use butter on the table.

RESTRICTING FOOD PRICES.

When there is no restriction, an increase in the price of one commodity, whether food, labor, etc., has a tendency to raise other prices up to and beyond an equivalent level. Soon everything becomes sky-high and nothing stable. Follows discontent and unrest. In order to stabilize prices, the Food Administration publishes in every section of the community Fair Price Lists, which show what foods of usual quality should sell for. The co-operation of the public in the enforcement of these standards is a remedy against profiteering and extortion. The method is made available by the Administration. Its adoption is up to the public. It is up to you.

A lot of theorists have said that the plan is not economically feasible. The answer is that it is every day working better as both self-protecting purchasers and reasonable dealers get behind it.

Thrift does not mean stinginess. It means intelligent saving.

I often serve my friends a dish of the chicken soy bean and it has exactly the same place as your creamed chicken or chicken salad," declares Miss Yamei Kin, M. D., a Chinese food expert.

Almost three-quarters of the American sugar supply used to go directly into the households for domestic consumption. That is why the bulk of the saving must come from the same place.

COCOANUT PUDDING.

(Sugarless recipe.)

One pint milk, four teaspoons cornstarch, one-half cup cocoanut, one-half cup corn syrup (white), one-half teaspoon vanilla.

To cornstarch add one-quarter cup of milk (cold to make a smooth mixture.) Scald remainder of the milk; add the cornstarch mixture and corn syrup, stirring constantly. Add the cocoanut and cook in a double boiler for 40 minutes. The cooking mixture should be stirred until it thickens. When done, add the vanilla and pour into moulds which have been dipped into cold water. Chill.

The factories have to can for the troops. It is up to the housewives to can for the homes.

The United States is wasting millions of dollars annually by allowing garbage to be burned or destroyed. In days of peace that was reprehensible; in time of war it is unpardonable.
