H. SACHS & SON

Fall Season 1918-19 is very much in evidence at our store

New and up-to-date merchandise is coming in every day, and when complete we will have one of the best selections of LADIES', MEN'S and CHILDREN'S goods, than ever before, consisting of the following lines, namely:

Ladies' Department.

SUITS, COATS, DRESSES, FURS, MILLINERY, SWEATERS, SKIRTS, WAISTS, ETC.

Men's Department.

SUITS, OVERCOATS, PANTS, HATS, SWEATERS, FURNISHINGS, ETC.

Children's Department

WE CAN CLOTHE YOUR SCHOOL BOY OR GIRL COMPLETE.

DRESSES, HATS, SWEATERS, FURNISHINGS, BOYS' SUITS, MACKINAWS, PANTS, CAPS, BLOUSES and SHIRTS.

No doubt you have heard everywhere of the tremendous advance in prices of all classes of merchandise; you will find it quite different here.

We are selling our goods this season at the same low prices as heretofore, and if any advance, it is so little as not to be noticeable to any extent. This is due to the fact that we made all our purchases early in the season before the goods advanced. As most of our goods are in, we invite you to come in now and make an early selection, we have just what you are looking for.

H. SACHS & SON,

Leaders in Ladies' and Men's Wear

Toulson Building Chestertown, Md.

Don't raise potatoes for the Bugs and Blight to destroy.

If you have never used PYRO before get a can this season. RAIN WON'T WASH IT OFF.

1, 5, 10, 25 and 50 lb. cans in stock.

"PYROX is the best spray I have ever used on potatoes and tomatoes."—F. B. HARPER, Still Pond, Md.

PYROX disposes of the bug question on all kinds of vegetables and fruits. If you believe in growing good products, free from disease and insect damage,

SPRAY WITH PYROX

7-GAL. CREAMERY CANS, "WHIZ" FLY SPRAY, GARDEN WHEELBARROWS AND CULTIVATORS, BARREL LIME.

We are nearly sold out of our stock of New Taylor Oil Stoves. If you haven't secured yours, get it quick.

Modern Methods.

CANNOT MATCH THE BIBLE

Great Men Can Find No Other Book That Combines Its Literary or Historical Merits.

The bulk of the people—business men, lawyers, doctors and others—don't read the Bible, but writers universally recognize it as the greatest book, Prof. William Lyon Phelps of Yale university said in a recent address.

"Being a serious book, it is weak in humor," Professor Phelps said. "But I think Job intended a grim joke when he said, 'Would that mine adversary had written a book.'

"No narrative writers can match the style of the Bible's Old Testament stories—Hume, Gibbon, Rose—they are all inferior. This is the day of the short story writer, Kipling, De Maupassant, O. Henry, but their best efforts fall short of the stories of the Bible. So it is with its poetry in the Psalms. Its wisdom of the Proverbs is just as up to date as the morning paper, and there is no political economy equal to the Book of Gospels.

"It is possible to overestimate the Bible's influence on English literature. Bunyan wrote a great book because he was saturated with the Bible, and it trickled out when he wrote.

"Lincoln knew only two books—the Bible and Shakespeare—and yet he was a splendidly educated man. To know the Bible is to be educated. One of the finest metaphors in Keat's 'Ode to a Nightingale' is taken directly from the Bible; 'Nearer My God to Thee' is simply a paraphrase of the Bible."—Detroit News.

WARM WELCOME FOR TWINS

Their Arrival in an English Home Meant Two Extra Sugar Rations for Family.

Capt. Norman Thwaites of the British intelligence department said the other day:

"The sugar shortage is felt keenly over the water. It's odd how you miss your sugar over there. You long for it as you'd long for tobacco.

"A Bayswater special constable hurried home from his beat at the Marble Arch the other evening to be present on a very interesting occasion, and, as he sat in his library in the small hours, the nurse came to him and said:

"'It's all right, sir.'

"The Bayswater man swallowed; he moistened his dry lips; then he asked: 'Is it a boy?'

"The nurse smiled soothingly.

"'One of 'em's a boy, sir,' she said.

"And the Bayswater man, instead of turning pale or smothering an oath, as he'd probably done in peace time, uttered a glad cry of joy.

"'Thank heaven!' he exclaimed, 'that gives us two extra sugar rations.'"

Water Brooks.

There was a pool by which we stopped one day to look at a great dragon fly in golden mail lighting on a lily pad. I suppose that he did not live the season through, but his race has not lost a scintilla of his radiance, and there is a curious comfort in thinking that even in days like these, when mankind seems to have gone mad, and "when but to think is to be full of sorrow," I have only to go to the same pool to see a creature as beautiful, lighting on a lily pad as green, floating on water as pure. Nor is this mere sentimentality. To become aware of the fleeting permanency of all these bright short-lived things, their incessant change with essential changelessness, their passing beauties but persistent, beauty, brings health to the spirit of man. After his wars and revolutions he always returns to the brooks, and is surprised but happy to find them still dancing and singing.—Robert M. Gay in the Atlantic Monthly.

Origin Claimed by Turks.

According to the Osmanli historians, the original Turk was a grandson of Noah. Though there were only eight people in the ark when it was first floated, there were nine, it is asserted, when it landed at Mount Arrat. The additional one was the eldest son of Japhet, born during the flood. His name was Turk. A descendant in the fourth generation, one Alindje Khan, had two sons (twins) who were named Tartar-Khan and Mogul-Khan. Tartar was the father of the Turks; Mogul was the father of the Mongols. Turks and Mongols were thus closely related by birth, and the wars which at once broke out between them, and the reconciliations that speedily ensued, had much of the nature of family quarrels. The Turks were the more frequently triumphant, one Mongol throne after another yielding to their arms. Not till the Christian era was well advanced did the ethnological name of these children of Japhet appear in history.

From Old Tins, $900,000.

A conference, representative of municipal and other local authorities in the Midlands, was held at Birmingham recently by arrangement with the national war salvage council to consider the question of the utilization of waste.

The lord mayor of Birmingham, who presided, stated that in Birmingham 600 tons of old tins were collected annually by the refuse disposal department, and that the recovered tin was sold at $1,500 a ton. The sum of $35,000 was obtained from the sale of recovered waste paper. Food for poultry and pigs was made from material from the corporation slaughter houses; condemned fish and meat were converted into valuable manures; fat was utilized for soapmaking.

We have the best possible facilities for handling shipments of Grain, Fruit, Asparagus, Poultry and Produce of all kinds.

References:—Merchants'-Mechanics' National Bank of Baltimore and all Commercial Agencies

A HUNDRED AND TWENTY MILLION ALLIES MUST EAT.

Industry is falling into two classes—essentials and less essentials. And by essentials we mean essential to the prosecution of the war.

In foods there are also the vitally essential foods and the less essential. Staples—meat, wheat, sugar and fats—are essential. Fresh vegetables, perishables of many kinds, bulky, unshippable foods, are—in a military sense—the less essential.

The second year of our participation in the war brings us a broader plan for food conservation. Not so much emphasis on this particular item and that, but a steady pressure in all directions. The most careful and thrifty conservation, the elimination of every type of waste, these are our principles which must be observed, our standard which we must measure up to.

We cannot ship seventeen million tons of food out of the country and not continue to conserve food. We cannot increase our last year's food exports to the Allies by 50 per cent and not continue to cut down our own consumption.

The need is very great, our obligation plain. To supply the essential foods to the 120 million people in Europe now arraigned against Germany is our present task. "This is a duty of necessity, humanity and honor."

We will fill it.

Says Hoover: "We must secure a reduction in consumption and waste in the two great groups of; first, breadstuffs, and second, meats and fats—that is, in all bread and cereals, beef, pork, poultry, dairy and vegetable oil products.

SAVE THE RIGHT SHELLS.

The pits from peaches, apricots, prunes, olives, dates, cherries and plums and the shells of Brazil nuts, walnuts and butternuts are the materials which the government chemists wish to use for gas masks. Do not try to substitute other material which you think would be just as good.

The Red Cross is the only agency which will ship your collection to headquarters. Take your gleanings to them.

NUTTING IS PATRIOTIC DUTY.

Country boys and girls and city youths who visit country cousins are being urged to pass more times than usual in the woods this fall hunting for hickory nuts, walnuts and butternuts. Uncle Sam needs the shells of these nuts for conversion into carbon for gas masks for his soldiers. Shells of no other nuts will do excepting Brazil nuts.

The nut gatherers are asked, in the interests of food conservation, to keep the meat. It takes seven pounds of nut shells to produce carbon enough for one gas mask. Red Cross chapters will accept and deliver the shells.

Use your baskets when marketing, and do not ask to have your cabbages, carrots, turnips and celery wrapped. Refuse paper bags except when absolutely necessary to protect the food. A paper bag saved is a paper bag made.

NO PASTRY IN FRANCE.

French pastries are served only outside of France now. Need for bread closed the pastry bakeries in France long ago. They will not reopen, according to the food minister, until the bread ration has increased for workmen, old people and children.

When corn is too old for usual boiling it may be cut from the cob or shelled for parching in a skillet, or it may be used whole as roasting ears.

BELGIUM'S BILL OF FARE.

The following program for the next twelve months has been arranged for the relief of the 10,000,000 Belgians and French people now within territory occupied by the Germans.

Wheat, barley, rye and corn for bread	42,500,000 bu.
Beans	2,200,000 bu.
Rice	3,300,000 bu.
Corned beef	26,400,000 lbs.
Pork products	277,200,000 lbs.
Soap	66,000,000 lbs.
Coffee	26,000,000 lbs.
Cocoa	18,000,000 lbs.
Condensed milk	55,000,000 lbs.
Sugar	40,000,000 lbs.

This amount of food, together with the native produce, gives an average ration amounting to about 2,000 calories—about one-half the consumption of the American people.

The security of both imported and native food production from German requisition is guaranteed by the Dutch and Spanish Governments, who maintain agents in the occupied area to see that the production and distribution are not interferred with by the German army.

BEEF TIMBLE.

(Official Recipe.)

Chop fine one pound of left-over tough bits of lean beef, cook together for a moment a gill of standard tomatoes and one cup of bread crumbs; add to the meat, rub to a smooth paste, season with a quarter of a teaspoonful of celery seed, a half teaspoonful of salt and a dash of pepper; mix then stir in carefully the well beaten whites of eggs, fill into custard cups, stand in a pan of boiling water and cook in a moderate oven twenty minutes. Serve with tomato sauce.

COOKING WEIGHTS.

One pint of butter equals a pound.
One quart of sifted flour equals a pound.
One large pint of sugar equals a pound.
Nine large eggs equal a pound.
A pint of cornmeal, 10 1-4 ounces.
A pint of rice, 15 ounces.
A pint of tapioca, 12 ounces.
A pint of bread crumbs, 8 8-4 ounces.
A pint of raisins, 9 ounces (lightly measured).
A pint of currants, 10 ounces.
A pint of brown sugar, 13 ounces.
A pint of maple sugar broken into crumbly pieces equals 1 1-4 pounds.
An ounce of butter, two level teaspoonfuls.

ART VS. BRICKS IN SYDNEY

A Peculiar Controversy in Australia That Is Agitating Labor Circles.

Here is a curious point of law or logic presented in the Sydney (N. S. W.) Bulletin. The musicians' union of Sydney charges the Melbourne eight hours' procession with something like scabbing because it decided that unionists, even if they don't belong to the musicians' organization, may play in its own ranks on the annual gala day.

There are arguments on both sides. It seems hard that a union bricklayer shouldn't be allowed to blow his own cornet in his own demonstration on a holiday, yet if he found a professional cornet-player laying bricks on a Good Friday he might object. Of course the man in the procession isn't playing for hire, but then it wouldn't improve things much if the cornet-player laid bricks gratis.

The bricklayer might argue that there are a certain number of bricks that must be laid, so the cornet-player would be doing another man out of a job, while there isn't any fixed amount of music that must be blown, so an amateur might blow a sample or two without depriving any other man of a crust. And the bricklayer probably says that the cornet-player couldn't lay bricks decently if he tried, to which the cornet-player possibly replies that the bricklayer can't make music.

To some extent it is a struggle between art and materialism. Music properly played is capable of arousing the highest and noblest emotions of which the soul is capable; a brick, even if properly laid, isn't. And soul isn't a thing to be lightly despised. But here the tangible bumps against the intangible. Nobody has seen a soul, while almost everybody has seen a brick.

TO RECLAIM DISABLED MEN

War Is Teaching a Great Lesson as to Possibilities in This Important Field.

The reclamation of the energies of all the disabled of the nation may be taught by the exigencies of war, according to Maj. Harry E. Mock, M. R. C., who in addressing the National League of American Pen Women, said:

"There are in the United States 600,000 persons who have been disabled in industries—probably more than the total number of soldiers who will be disabled through this war—yet neither government nor industry has hitherto made thorough effort to reclaim their energy. That is a great lesson this war has taught us, and when we have won it we shall find that, through deaths, a cessation of immigration, and other causes, we shall face a great shortage in the labor market. We shall then turn our attention to the reclamation of all the disabled and thus our country will profit by the labor of all her sons and daughters."

Pigeons Broke Up a Monopoly.

One of the queer things about the nutmeg is the romantic way in which nature thwarted the Dutch attempt to establish a complete monopoly of the spice. They own the Banda islands, where most of the nutmeg trees grow, and at one time they wanted to prevent everyone else from raising the spice. So to keep up prices and to induce other planters on other islands to cut down their plantations the Dutch at one time burned three piles of nutmegs, each of them said to have been as big as an average church. They induced other planters to join with them and it soon seemed as though they were killing all competition.

Then nature took a hand in the game. A large pigeon of the islands, which was extremely fond of mace, carried the seeds to all the surrounding lands, even to the mainland of Asia. Nutmeg trees began to grow wild in numerous places and all danger of a monopoly was removed.—Boston Post.

Two Mistranslations.

To the Spectator thanks are due for two enterprising mistranslations, one belonging to the genus schoolboy howler, and the other resulting from an attempt at French on the part of a mess sergeant.

The menu one day announced "imbecile roti" as the piece de resistance, the riddle being solved by the appearance of roast goose. It is just possible that the sergeant nourished some resentment against that particular goose, but it was generally thought that the imbecile roti had resulted from a half hour or so spent with a French-English dictionary.

The schoolboy added to the hilarity of nations by rendering the Horatian line: "Post equitem sedet atra Cura" as: "After horse exercise the black lady sits down with care."—Christian Science Monitor.

Abhorred Red Tape.

"A swollen organization always means inefficient administration," says the air minister, as he surveys the staff which he has taken over. How did Napoleon manage his clerical staff one wonders. According to Wellington there were 12,000 clerks in the French war office. Normally we had 60 clerks with the war secretary, 40 in the ordnance, and about 50 at the horse guards. "These 150 do the work of the French, yet the French clerks begin to write at six in the morning, and ours go down at ten or eleven." Of course the size of the armies differed also.—London Chronicle.
