Bigger Crops Grow on Tractor Plowed Ground

Of course you want to raise a bigger crop next year. But the main thing that is troubling you right now is your fall plowing.

It is hard to get enough help and even if you had it the dry weather makes fall plowing a hard job for horse flesh.

Why not get an Avery tractor? Tractor farming with an Avery means bigger crops. With it you can plow early and deep this fall and get your seed bed into the very best condition. Hot weather or hard ground can't stop you and if you need to you can even plow day and night.

An Averyized Farm Brings Success

Avery tractors are in successful operation in all 48 states in this country and in over 61 Foreign countries. They are the tractors with the perfected opposed motors and patented sliding frame transmissions.

Remember, they are built in sizes to fit every size farm and for every kind of work.

Come in and let us talk over the question of raising bigger crops with an Avery Tractor.
