MAZOLA
The Perfect Oil for Cooking and Salads

THE general use of Mazola is remarkable:
Your can of Mazola gives you a fat for shortening, cake-making, deep fat frying, sauteing. And for salad dressings, either mayonnaise, cooked mayonnaise, or French dressing Mazola is matchless.
No buying butter for cake-making, fat for shortening and olive oil for dressings.
Mazola is an extraordinary convenience to the busy housewife.

MR. FARMER TAKE NOTICE—All Feeds guaranteed to produce.

Have you tried the Cow, Horse or Hog Feeds that we sell? Well, if you have not, try them the next time you buy and see if it does not give you better results than you have ever had. For reference to these feeds, ask R. C. Williams, George Dickerson, G. Thos. Dewberry, Louis Parsons, Robert McWhorter, Morgan Bennett. This is only a few of the users of our cow feed. See what they say.

Also look out for your coal bins, as all shippers claim coal is going to be scarce.

Strange Teeth Found on Kent Island.—Frank Benton, of Kent Island, recently found several enormous teeth which he found in an old cemetery on Kent Point. The teeth are about three inches long and are curved like the teeth of a shark or walrus. The cemetery was formerly located some distance from the water, but the bay has made such inroads that the cemetery is now at the water's edge. The teeth have been sent to Smithsonian Institution in Washington.

—Willard was easy for Dempsey at Toledo on July 4, and failed to respond to the bell in the fourth round. The first blow from Dempsey rendered Willard almost defenseless in the first round and it was only a question of how many blows a man could stand without being killed. The fight should have been stopped in the first round.

"Meats in Storage"

Every working day of the year 75,000,000 pounds of meat are required to supply home and export needs—and only 10 per cent of this is exported.

These facts must be kept in mind when considering the U. S. Bureau of Markets report that on June 1, 1919, there were 1,348,000,000 pounds of meats in cold storage. If the meat in storage was placed on the market it would only be 20 days' supply.

This meat is not artificially withheld from trade channels to maintain or advance prices.

Meats in storage consist of—

65 per cent (approximate) hams, bacon, etc., in process of curing. It takes 30 to 90 days in pickle or salt to complete the process.

10 per cent is frozen pork that is to be cured later in the year.

6 per cent is lard. This is only four-fifths of a pound per capita, and much of it will have to go to supply European needs.

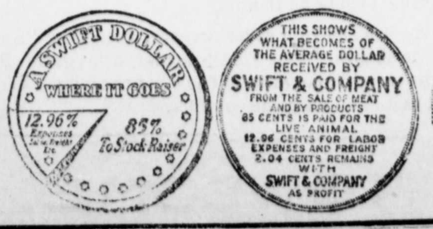

19 per cent is frozen beef and lamb, part of which is owned by the Government and was intended chiefly for over-seas shipment. If this were all diverted to domestic trade channels, it would be only 1½ lbs. per capita—a 3 days' supply.

100%

From this it will be seen that "meats in storage" represent merely unfinished goods in process of curing and the working supply necessary to assure the consumer a steady flow of finished product.

Knocked Rot Sky-High

"We used Pyrox on tomatoes and apples and it has proven entirely satisfactory. It certainly does knock the rot sky-high when used on tomatoes, and our apples this year are the best we have ever had."—CRUMPLER MERCHANDISE CO., Crumpler, W. Va. You can prevent tomato rot and at the same time protect the crop against bugs, worms and disease if you spray with

Pyrox
REG. U.S. PAT. OFF.
TRADE MARK REGISTERED

Pyrox is a smooth, creamy paste which only needs to be mixed with water. It sticks like paint and protects the crop during all the growing season. It is just as good for potatoes, apples, cucumbers, etc., as it is for tomatoes.

Get this Pyrox Crop Book. It tells how to protect your crops against bugs, worms and diseases. Send for a copy today. A postal card will bring it.
