JUST A DOMESTIC DRAMA

Tooth, Bread Board, Mother and Son, All Mixed Up in This Little Everyday Story.

A tooth, a limousine, a bread board, some Wyckoff noodles, a mother and her son enter into this drama.

Mother is loyally doing her own work, and on returning from market she drove her limousine to the kitchen door. Lacking room to place her marketing, she temporarily put the bread board, covered with noodles, on the back of the convenient limousine. Just then her son had a fall in such a manner that a front tooth was cleanly removed from its socket. In great excitement she picked up the boy and the tooth and hastened in the limousine to the dentist. On one of the principal streets, during the trip downtown, she heard a sound as though the limousine had run over a loose board, but gave it no thought. The dentist replaced the tooth and mother and son returned home. Her husband, who is very fond of noodles, said: "Marguerette, what did you do with the bread board and the noodles?" Then she knew. Did she go back after the bread board and noodles? She did not.

Is the boy's tooth still in? It is.

Will you find the bread board and noodles advertised in the lost column? No.—Indianapolis News.

PARADISE OF THE PACIFIC

Palm-Clothed Islands That Have All of the Riches Man Has Any Need to Covet.

The little-known Trobriand group of islands is a cluster of palm-clothed gems that stud the emerald Pacific a hundred-odd miles northeast of Samarai (Papua). They are the real thing in coral romance. The natives are of the Melanesian type, happy people with a fondness (especially on the part of the star-eyed maidens) for Europeans, who have exploited the rich pearl fishery. They are advanced in arts and crafts, and produce a tremendous quantity of carved weapons and ornaments, which are eagerly bought by tourists from curio-dealers in Sydney and Melbourne.

Before competition set in the islanders did not get much for their pearls. Gems worth $50 and $75 were freely bought for as many pence. The group is flat, but is richly clothed in jungle, and produces vast quantities of excellent yams, which are traded. Good climate, gorgeous scenery, blue seas like billowing silk, diamond-dusted beaches and splendid fishing and shooting!

Bluff That Failed.

General Plumer, who has recently been recalled to France from Italy, can be very ironical when he chooses, as the following story proves:

Shortly before the war, when he held the Irish command, a regiment was being maneuvered before him on a field day, and the colonel in charge succeeded in getting his men mixed up pretty thoroughly.

However, he went grimly on, and at last, calling a halt, rode up to Plumer with an air of importance.

"I flatter myself that was extremely well done, sir," he said, evidently with the idea of trying to bluff that nothing had gone wrong.

"Oh, excellent," was General Plumer's suave reply. "But may I ask what on earth you were trying to do?"—Pearson's Weekly.

Insects That Have Food Value.

Among insects which have been and are considered of gastronomic value are caterpillars, moths, a favorite in some parts of Africa; the pupae of the silkworm in China; ants, alive and roasted, are appreciated in Burmah, as well as by the Indians of North and South America, while it is said the lumbermen of Maine enjoy an occasional meal of large wood ants. The beetle is eaten in the Nile valley, in Turkey, Lombardy, Java, Peru, and is said to be nutritious and fattening. In Central America the eggs of three aquatic bugs are made into little cakes and eaten. Mexicans make a strong drink by infusing a tiger beetle in alcohol.

Possibilities of North Africa.

North Africa—Tunis, Algeria and Morocco—contains around a half million square miles. Some of it is desert, but much of it is highly productive, and it has special advantages for producing some forms of live stock. The climate and pasture make it almost as ideal a country as Australia for sheep raising, and it has peculiar advantages for what might be called extensive pig raising; its acorns and other tree crops taking the place of corn. Yet down to the beginning of the war very little had been done to make this potential wealth actual and available.

Worsted.

"I noticed that you engaged in earnest conversation with that conductorette."

"We were just having a little argument about the proper pronunciation of the street I live on" said Professor Diggs. "She insisted that it should be called 'Wellungton,' but having some knowledge of the man who defeated Napoleon at Waterloo, I contended it should be 'Wellington.'"

"Well which is it to be henceforth—'Wellungton' or 'Wellington?'"

"Ahem! 'Wellungton'"—Birmingham Age-Herald.

Gets the Money.

"I'd like to write a story I'd get paid for."

"Oh, I write home once a month."—Chapparal.

IMPORTANT NOTICE

The Chestertown Ice Plant is working hard to accommodate the public, but owing to conditions of labor we will be obliged to adopt some regulations for all. We will be forced to close the doors for delivery at six o'clock p. m., except Saturday when we will keep the plant open until 8 o'clock. On Sundays for those who need ice for sickness or other necessary purposes, it will be delivered at the plant until 10 o'clock a. m.

We request all families where ice is delivered in quantities less than 25 pounds to please place same in their refrigerators themselves, and where ice over 25 pounds is to be placed by the ice man, please have your refrigerators cleared and let them put the ice in place wanted, and not keep the men to replace the articles. When one patron keeps the ice man waiting you make it that much later for your neighbor and friend to get his ice, which means considerable delay at the end of the route. Trusting these requests will be willingly observed, I am a2-tf. R. G. NICHOLSON.
