# Meet the Harvest Rush

Be ready for the harvest rush with a fleet of Cletracs—the power-battery that makes the wheat farmer independent of weather conditions and labor shortage.

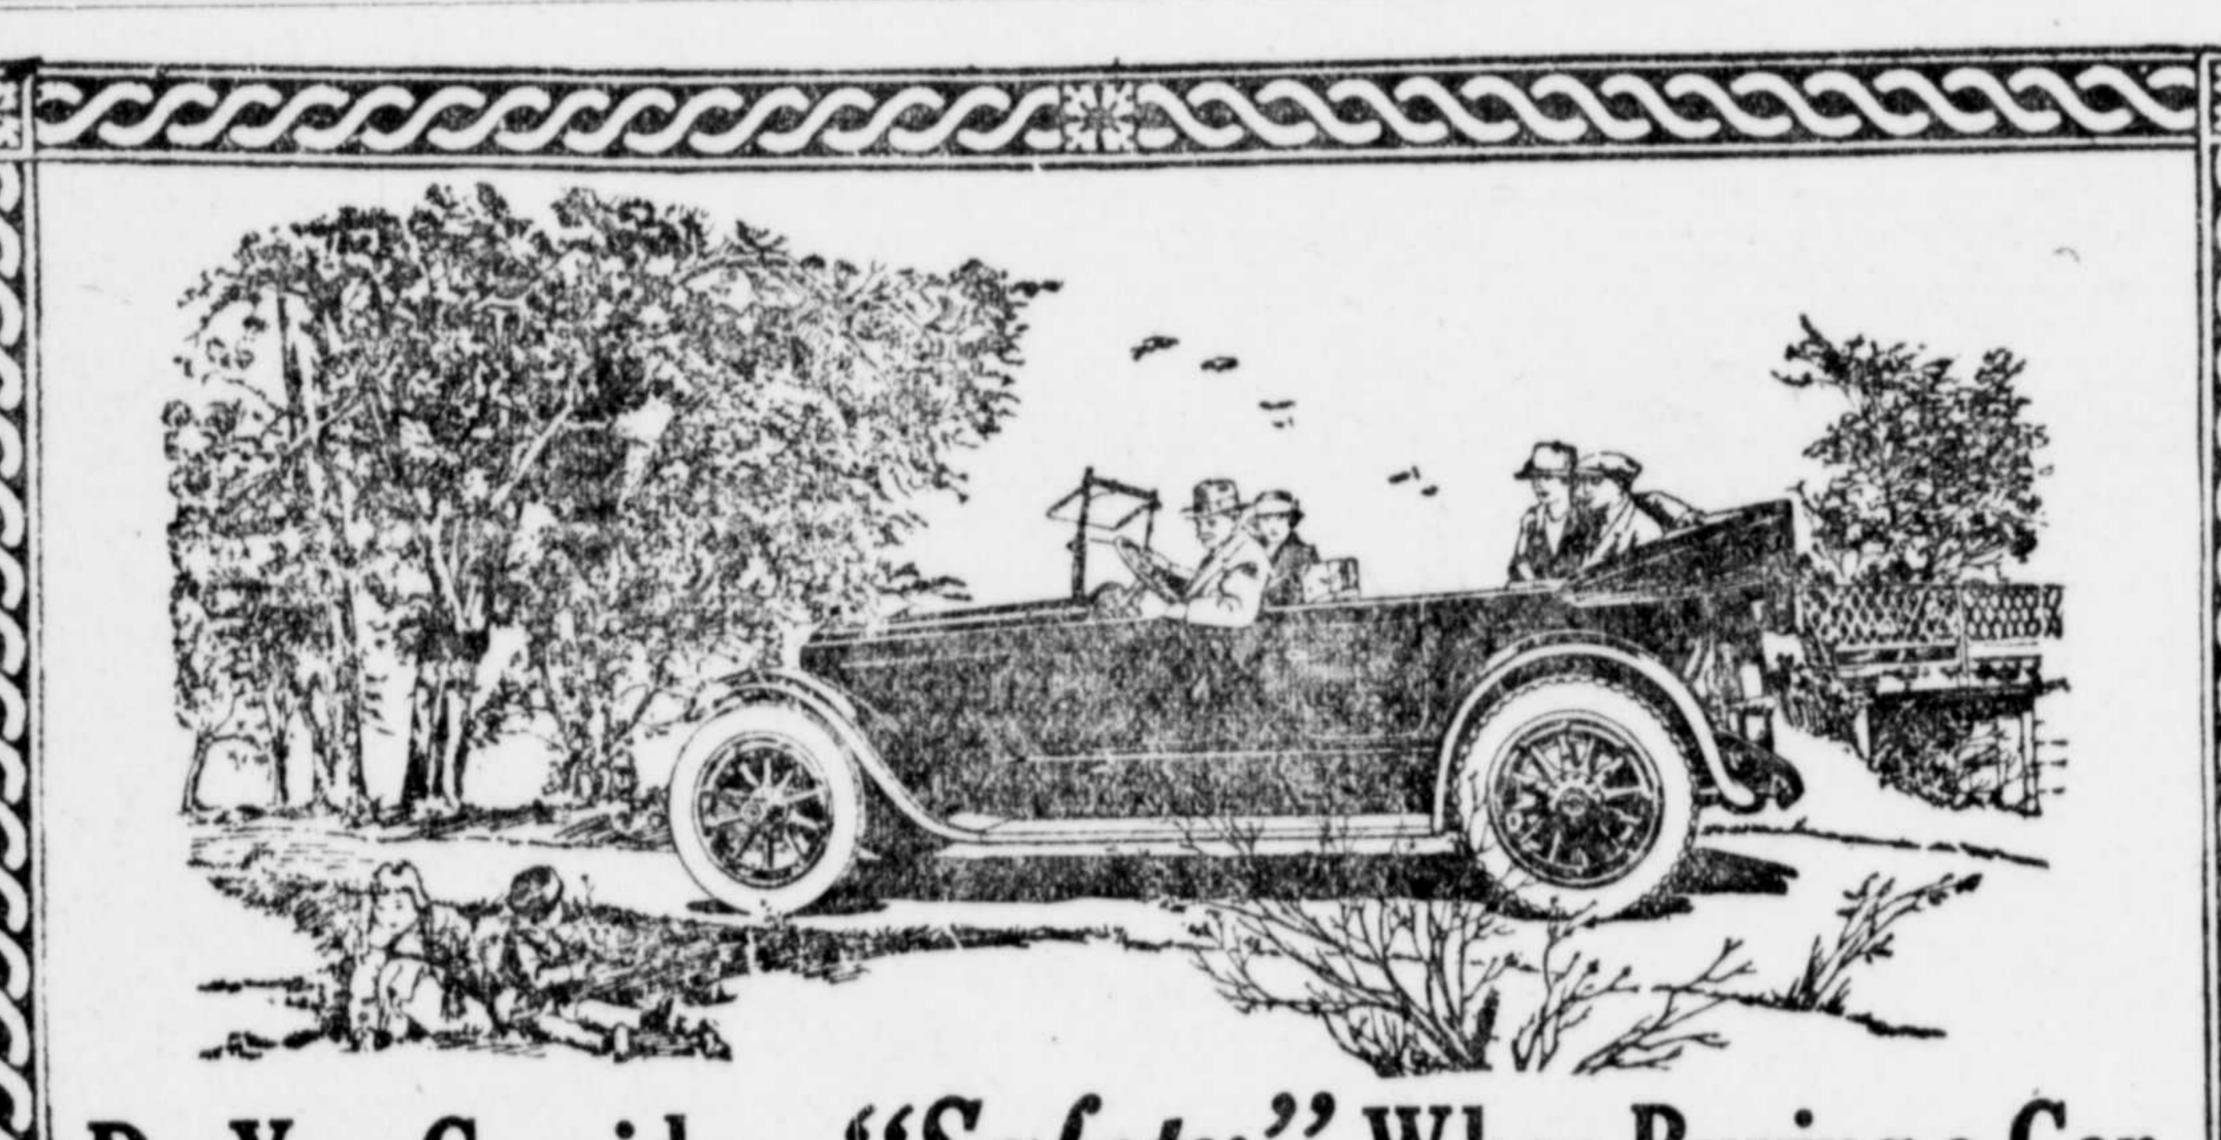

Each Cletrac easily hauls two binders—replacing six or reight horses and does twice the work. It keeps going more thours and longer days—is ready when the grain is just right.

The breakdown of a large tractor means a costly harvest hold-up, but if one of a fleet of Cletracs should be stopped it only means a little added work for the others. Cletracs work fast on the straightaway-turn short and get the corners clean—are economical and easy to operate.

Come in and look this tractor over. See for yourself its sturdy construction. Let us show you what it will do for, you on your own farm.
