

Cletrac way-take less power

The Cletrac Fleet Plows Fast and Deep

When the ground's just right, the Cletrac farmer turns loose his flood of sure, speedy power and makes short work of the plowing rush. His fleet of fast-working Cletracs travels easily over any ground in any weather, throwing the soil over in well-pulverized furrow slices that hold the moisture and save seed bed work later.

Work stops when the large tractor breaks down-but if one Cletrac is "off," it means only a little more work for the others. Short seasons don't worry the owner of a Cletrac fleet. His battery of dependable power units is ready for any emergency. He's in complete control all season long-from plowing to threshing. One Cletrac replaces four to eight horses—can be run by a boy,

burns "gas," kerosene or distillate perfectly. Come in and look this tractor over. See for yourself its sturdy construction. Let us show you what it will do for you on your own farm or ranch.
