# DRILLS

SUPERIOR Grain Fertilizer Drills have been made for 50 yrs, and for nearly 20 years of that time this firm has been representing them here. If you need a repair for a Superior Drill you get it here promptly, though this cannot be said of several makes of Drills that have been sold here in the last 20 years. Several times this season we have had requests for Repairs for drills that were sold here but are not now represented. Don't buy any kind of a drill just because it is a few dollars less than some Standard make that is represented near you—it is more expensive in the long run.

# SUPERIOR DRILLS

are one of the standard makes. They have some special features that other drills do not have. It is one of the lightest draft drills on the market, has long life, quick change of quantities of both grain and fertilizer. If you want to put your wheat in right this year, don't waste time, money and grain by trying to use that old, worn-out drill. Come in and look over carefully and buy a new Superior. The best thing we have to say is they are about

less than they were last year.
