is the time of the year that tells on a low vitality, or a ru
co .

With the change of weather, a large percentage of people whose ance has been lowered to the minimum by constant use of drugs and cines find themselves unable to adapt their bodies to any sudden c of weather conditions.

The human body at this time of the year might be compared story told about the horse trying to pull a heavy load up a steep hill, the load got half way up, the horse came to a full stop. Soon a crow ered and the wise ones gave advice as to how to get the horse to pull t to the top. A wise old gentleman told the driver to beat the ho wise fellow began to unload the cargo to another truck, but still fused to budge. Finally a learned college professor told the dr some grease in the axles, and still the horse refused to budge.

At last a telegraph boy passing by the scene, jumped off his bic **released the breakes,** and Old Dobbin had no trouble in getting up the

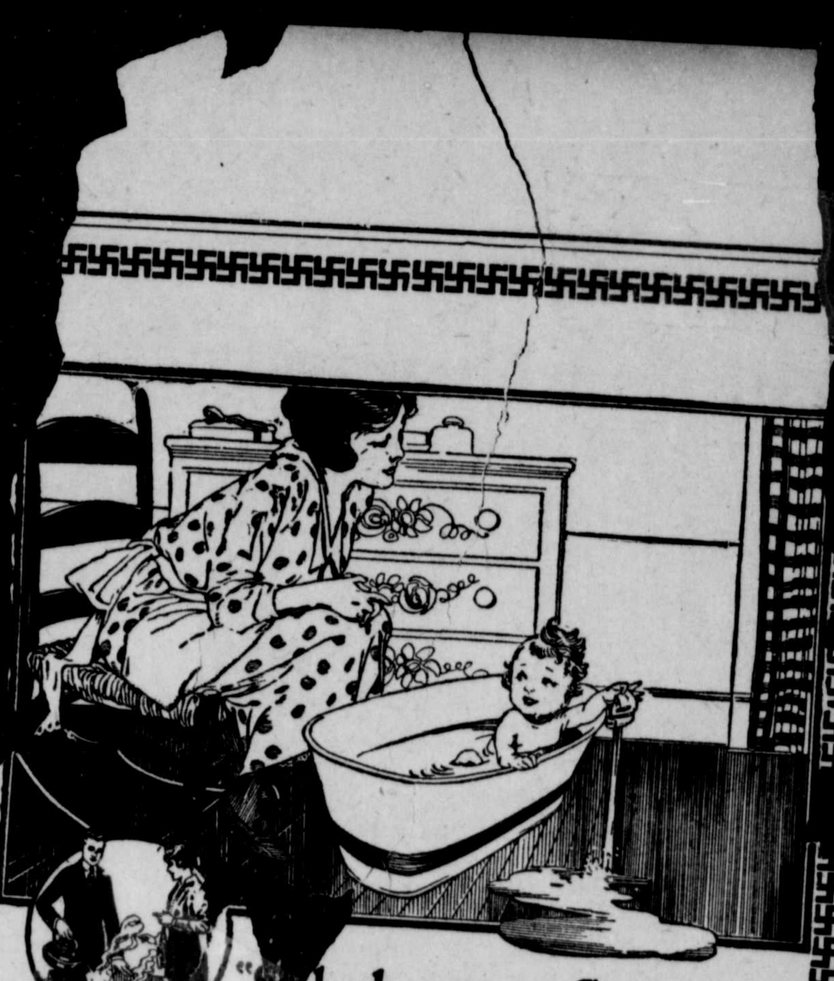

Some of us have been listening too much to fool's advice. When appear to be going along nicely all is well, but when we come to a fu half up the hill, which indicates that our bodily resistance is less tha less than par, the wise thing to do instead of pouring grease in your a to visit the Chiropractor, and have him, "Release the Brakes.
