Great Work Of The Red Cross

America still feeds the starving multitudes, and will keep the good work going for some time to come. The relief operations of the American Red Cross for the fiscal year furnish an interesting illustration of generously offered and wisely administered philanthropy. In Austria food, clothing and medical supplies were distributed to 500,000 persons, most of them children. In South Russia and Constantinople 150,000 refugees had to be taken care of at once when Wrangel's army was driven from the Crimea—and it took a lot of money and supplies with it. In Poland 40,000 refugees, fleeing from Russia, were sheltered, clothed and fed, and in addition a half million of children were kept from starving. In Hungary 1,500,000 articles of clothing were distributed, as well as food and medical supplies. Fleeing from the Turk and the Bolshevists in the Caucasus, 50,000 Greeks received help from the American Red Cross, while Czecho-Slovakia, Serbia, Albania, Montenegro, Latvia, Lithuania and the entire area of Central Europe and the Balkans came under the ministering care of this noble American organization during the last year, and the work in France and Belgium was not abandoned, although the needs in these countries are not as urgent as they were, and the service of the American Red Cross is almost wholly restricted to the more devastated regions where aid is urgently required.
