HEALTHIER COWS, MORE MILK—AT LESS COST!

Proper stock feeding is a matter that deserves the serious attention of every progressive farmer. The right feed results in healthier, happier stock—more milk production—increased earnings. A proper balanced ration is important. Experiments show that seven cows fed GROUND feed produce as much as ten cows fed whole grain.

GRINDING DEMONSTRATION

We will have public demonstrations of this combination grinder at our store, when we will grind hay, fodder, corn, etc. Don't forget the dates below and come in and see this mill in operation.

In doing so his foot caught and his knee was badly crushed. Despite the pain he kept his hold until the train stopped and he was released. At Union Hospital it was found necessary to amputate the toes of his foot. The physicians fear that his leg may also require amputation. Mr. Brown is married.

Spens, Federal Fuel Distributor, assures the country of an adequate coal supply during the remainder of the winter, he insists that the anthracite shortage cannot be overcome, and that climatic conditions may make it impossible for public utilities and other large consumers to store any great amount of tonnage. Sixty per cent of the normal supply of hard coal is the best that consumers can be promised, he says, and that substitutes must be resorted to in order to make up the other 40 per cent.

—Chestertown, about twenty-five years ago, was one of the foremost bicycle centers in the country, for its size and almost everyone owned a bicycle. But the sport has gradually waned with the coming of the auto into prominence. In comparison with its population, there are probably more bicycles in Japan than elsewhere in the world.
