Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over thirty years, has borne the signature of Chas. H. Fletcher on the wrapper all these years just to protect the coming generations. Do not be deceived. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

Never attempt to relieve your baby with a remedy that you would use for yourself.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

The Kind You Have Always Bought

THE CENTAUR COMPANY, NEW YORK CITY.

Our Obligation

Telephone employees in Maryland realize what service means. They know that good telephone service—from the viewpoint of the patron—consists in being able to reach promptly and without confusion any person desired and to talk satisfactorily and without interruption.

Telephone employees also know good telephone service is not merely the handling of calls, but is made up of all of the Company's many and varied activities.

Good telephone service includes, in addition, the installation of telephones, the moving of telephones to new locations, correct directory listings and proper maintenance of the telephone equipment both in the central office and on the subscriber's premises, and many other things.

Telephone employees realize that to give the public of Maryland good telephone service, the Telephone Company must not fail in any of these things.

New Cooperative Law In Bulletin Form

The Cooperative Association Law, which was enacted by the last State legislature and became effective July 1, 1922, has been made the subject of the most recently published bulletin of the University of Maryland Extension Service.

The text of the law is given in full with comments on its application by Dr. F. B. Bomberger, assistant director of the University of Maryland Extension Service and specialist in rural organization and marketing. The new law clears the way for organization of all kinds of co-operative associations and its terms should be familiar to every farmer in the state who is interested in this phase of agricultural activity. The law is not burdened with any great amount of legal phraseology, is not particularly lengthly, and a brief study of it will give the farmers of Maryland a good idea of the possibilities which it offers for a more extended use of the principals of cooperative enterprize.

The law is regarded as one of the best which has thus far been devised and is based upon what experience has shown to be the most desirable features of co-operative organizations. Some of the essential principals or cooperative marketing have been compiled by Dr. Bomberger and are printed in the bulletin in connection with the text of the law as a guide to the formation of new associations.

Copies of the bulletin may be obtained free of charge from their extension Service, University of Maryland, College park, Md. Ask for Bulletin No. 26.

Maryland Takes 22 Prizes on Corn

Twenty-two prizes, with a money value of $220, one of them the $45 first premium for yellow corn, made up the total awards on Maryland grown corn at the International Grain and Hay Show at Chicago early in December, constituted the biggest prizes which farmers of the state have ever won in the keen competition of the International, according to officials of the University of Maryland who attended the show.

The acievement of the Maryland growers is regarded as an unpreceded victory for a state the size of Maryland especially as region 4, in which Maryland growers must compete, is composed of some of the more noted corn producing states of the famous corn belt, such as Kansas, Missouri and the southern sections of Ohio, Illinois and Indiana. In the number of prizes won, Maryland was second, ranking next to Indiana. Last year growers in the state won seventeen prizes, five below the figure of this year. The outstanding achievement, however, was the capturing of first prize in the yellow corn class which included nearly 800 exhibits.

"Maryland growers were up against real competion," said J. E. Metzger, agronomist for the University of Maryland Experiment Station, who acted as one of the five judges at the show this year, in commenting on the showing made by the State. "Not only did Region 4 supply nearly half of the 2300 corn exhibits at the show, but it is a recognized fact that the finest quality is invariably produced in the territory included in this region. Corn produced by Maryland was the best displayed at the show in recent years, intensified the competion."

Out of a total of fifty posible prizes offered for ten-ear exhibit of yellow corn, Maryland growers won eight with a total value of $120. First in this clas was the ten-ear sample of G. D. Raadebaugh, of Bynum, Harford county, who was awarded the first prize of $45.

Confucius Had Shadow Shows in 500 B. C.

The public in general has been led to believe that motion pictures,our greatest "infant industry," are more or less a recent invention and that the new popular amusement came into being only a few years ago.

It is true that the development of the motion pictures is a matter of recent years, but the interesting information has just come to light via London that Confucius, the Chinese sage, was familiar with the general principal of motion pictures as far back as 500 B.C. In ancient China he experimented with what was known as "shadow shows."

The indications are quite clear that these shadow shows were the forerunners of motion pictures as we know them today. Therefore it might not be amiss to call Confucius the first motion-picture producer.

"Shadows," the new preferred picture, has as its principal character Yen Sin, a Chinese laundryman, whome Lon Chaney portrays.

B. P. Schulberg, the producer, did not realize that in selecting the title "Shadows," he was inadvertently digging back into bygone ages when the famous Chinese philosopher in his lighter moments turned to "shadow shows" for amusement.

Methodists Make Big Gain In 1922

A net gain of 119,007 members during the year 1922, by the Methodist Episcopal Church, bringing the total membership up to 4,593,540 with 209,685 non-resident members not included, is announced in the Methodist Year Book for 1923, now ready for distribution. The non-resident members, according to Dr. Oliver S. Baketel, editor of the Year Book, are those who have been lost sight of by their pastors and are carried on the rolls for three years before being dropped.

There are 20,517 preachers in the M. E. Church, serving 29,420 churches, and 36,597 Sunday Schools with 408,998 officers and teachers and 4,848,091 pupils in all departments. There are 16,493 local preachers, who are not members of conferences. Parsonages number 5,886 and the combined estimated valuation of these and the churches is $346,125,104. The Epworth League membership is 762,884.

The East Calvary Church, Philadelphia, a negro congregation with Dr. C. A. Tindley, pastor, is the largest church of the Methodist Episcopal Group, which has a total membership of 6,9 5, and they attend in three relays each Sunday, the roll being divided up for the three services.

The M. E. Church maintains fifty-six homes for working girls in industrial centers, 17 homes for young men, 37 homes for aged, 42 homes for orphans, 80 hospitals with many more in the foreign field under the Board of Foreign Missions.

Women To Help Colonize Australia

The first contingent of fifty young Englishwomen will sail for Australia in February under the auspices of a new organization called "Home Companions," which is inaugurating a scheme for the adustment of the ratio of the sexes in the empire. The avowed purpose of the organization is to find wives for the 200,000 surplus of the male population in the rural districts of Australia and husbands for the 2,000,000 surplus female population in the British Isles.

In order to qualify as a member of this unique expedition a woman must have 100 pounds, 50 pounds for fare to Australia and 50 pounds to be held in reserve for her return fare if life in Australia is found to be undesirable or she fails to find a husband. The women must be between 20 and 30 years of age, but preferably under 25.

"We want girls who are prepared to rough it," declared Miss Ettie Rout, secretary of the organization. "We don't want flighty or irresponsible girls who are out for a good time. Patriotic, serious-minded girls who are willing to go to the corners of the empire for the sake of the empire—that's the type we want. We wish to accustom them to the customs of colonial life. They will find employment as companions or helpers in typical Australian country homes. It won't be a bed of roses for them. They may have to work hard, but they will have an opportunity to make careers for themselves. It is more than likely that a majority of those who go will marry."

Save Hard Coal By Efficient Use

Efficiency in the use of anthracite will go a long way toward making up for the shortage of that commodity, Federal Fuel Distributor Wadleigh stated in issuing a list of instructions to hard coal users, on ways and means of conserving fuel.

Haphazard operation of hard coal furnices and boilers rob the consumer and acts as an added drain on the depleted supply, he stated.

His instructions follow.

Attend to the fire regularly—do not wait until it has burned low and heat is needed throughout the house.

Let the size of the coal be as uniform as possible. Using coal of uneven size prevents an even flow of air through the fuel bed and increases the tendency of the fire to burn through in spots.

Try to keep the fuel bed free from air holes, as they cause waste of fuel and may prevent the heater from maintaning the desired tempeture.

Avoid excessive shaking of the grates and thus reduce the amount of coal lost by falling through the grates.

When the demand for heat is urgent or the fire must be built up guickly keep the fuel bed uniformly thick but not too thick using the coarser part of the coal and all the draft available Air will then flow freely through the fuel bed and burn the coal at a maximum rate. Under such conditions the firing should be made at frequent intervals and small charges used so that the fresh fuel will only for a short time chill the tempeture of the fire pot.

In mild weather it is well to leave on the grates a layer of ashes under the active fuel bed.

Clinkers should be kept worked out of the fuel bed, for they obstruct the flow of air through it, clog the grates and may break the parts for shaking the grates.

The area of first class land in the United States has passed, according to the United States Department of Agriculture. Nearly half of the area of continental United States is not in farmes. Of this area 40,000,000 acres are absolute desert, too rugged to cultivate, 270,000,000 acres are occupied by forests and cut over land, and 600,000,000 acres are in the semiarid west suitable only for grazing.

Farmers, List Your Repair Needs

It would be hard to find a farmer who at some time or another had not lost valuable time waiting for necessary repair parts. Take this territory and total up the time lost in this way and it will astonish you. And all because repairs are not odered as early s they should be.

There is no better time than right now—just before the busiest season on the farm—to go over your machines carefully, make a list of repairs you are likely to need and send it to us With this list in our hands, we can order our stock so as to be prepared to meet every call promptly.

Repair part service is a necessary part of our business. We realize what it means to you in time and money to get what you need at once. Help us to help you by making up your list now and sending it in to us.
