THE CENTAUR COMPANY, NEW YORK CITY.

Telephone Expansion

We Americans take telephones as a matter of course. They are everywhere.

Month after month, year after year, the telephone companies are constantly building new lines and installing telephones.

As a result of years of this policy of expansion, the United States is the best telephoned country in the world. In the State of Maryland there are nearly 150,000 telephones—one for every 10 persons. Indeed, there are many more telephones in Maryland than in all of Spain, Portugal, Greece and Bulgaria.

The Company is now making plans for Maryland's telephone system 20 years hence, not forgetting that every new telephone added to the system increases our responsibility to give satisfactory telephone service.

The Chesapeake and Potomac Telephone Company of Baltimore City

FERTILIZERS

(For all crops)

Large stock in our warehouses at Betterton, for immediate use. No delay. Wagons loaded as soon as they arrive.

LUMBER AND BUILDING MATERIALS

Just received a carload of Southern Cypress, which includes Fencing, Gate Slats, Siding, Rab. Boards, Dressed Lumber, etc. If you want Cypress we have it.

Our store opens at 7 a. m. and closes at 8 p. m.

ORDER NISI

W. Bradford Copper, Assignee,
versus
Milton P. Crew, Hettie H. Crew.

In the Circuit Court for Kent County.
In Equity No. 2198.

Ordered, this 15th day of November, 1922, by the Circuit Court for Kent County in Equity, that the sale of the mortgaged real estate mentioned in these proceedings made and reported by W. Bradford Copper, assignee, under and by virtue of the power of sale contained in a mortgage from Milton P. Crew and wife to Ida V. Crow, dated April 10, 1920, and duly assigned to W. Bradford Copper, be ratified and confirmed, unless cause to the contrary thereof be shown on or before the 20th day of January next;—Provided, a copy of this Order be inserted in some newspaper printed and published in Kent county, once in each of four successive weeks before the 18th day of December next.

The Report states the amount of Sales to be $1150.00.

AND AFTER THAT, FRIGIDITY

Arctic Cold Followed on Somewhat Pointed Comment Made by Mrs. Watson.

Mrs. Watson was what many people might describe as a "bridge fiend." A day was a failure for her if she did not play at least two or three rubbers of her favorite game—and usually it was a half-dozen or more rubbers. Not long ago Mrs. Watson visited in a small city where the game had just "arrived." On her second day in town her hostess gave a bridge party and all the town's elite were present. After the games were over and refreshemnts were being served, one of the guests engaged Mrs. Watson in conversation.

"Oh, Mrs. Watson! I have been told that you are almost an authority on the game of bridge, and I am so anxious to have your opinion on our playing here this afternoon. Just what do you think of our game?"

Mrs. Watson really shouldn't have done it! But, remember, she was a "bridge fiend!" And it really was approaching tragedy, the things that had been done there that afternoon!

"What do I think of your game?" Mrs. Watson repeated slowly. "Well, really, you play a very interesting game, but I believe I like bridge better!"—Kansas City Star.

RESTING PLACE FOR THE ARK

Tradition That Has for Centuries Pointed Out Mount Ararat Is Not Recognized Locally.

The identification of Mount Ararat, with the mountain upon which the Ark rested, is at least as early as the adoption of Christianity by the Armenians. But there does not appear to have existed in the neighborhood of Ararat an independent local tradition of the flood, and the mountain is still locally known not as Ararat, but as Masis to the Armenians, and as Aghri Dagh to the Tartars. It is, however, called Ararat in Armenian literature as early as Faustus of Byzantium.

As late as the month of May the colossal mountain is covered with snow to a level of 9,000 feet below the summit. But by the month of September the snow canopy is confined to the Great Ararat, and the limit of perpetual snow on the side facing the plain on the north is not less elevated than from 13,500 to 14,000 feet above the sea. The extensive depression through which the Araxes flows, collects the heats of summer, and the warm air from this reservoir which ascends the northern slopes of the mountain melts the snow.

Kitchener's Choice of Title.

When Sir Herbert Kitchener was elevated to the peerage, the new peer had the greatest difficulty in selecting his title. He hated the name Kitchener, and kicked strongly against the pricks in eternalizing it in his title. Finally Lord Salisbury had actually to telegraph him to hurry up about his decision. When the telegram arrived Kitchener and some friends were seated together, and one of them, turning to the baron-designate, said: "Don't you think 'Kitchener of Khartoum' sounds very well? The "Khartoum' sort of tones down the 'Kitchener.'"

"I don't think it's a bad idea," was all that Kitchener said. He evidently thought well of it, for those are the names by which his baronetcy was patented.

Pilot-Fish Sometimes Betrays Shark.

In olden times people believed that the pilot-fish used to guide and protect ships. The fish would swim before the ship when all was well, but would disappear, they said, if rocks or land were near, so as to warn sailors. It is a fact that the pilot-fish swims with ships and sharks, but it is not with any intent to guide or protect.

When swimming with a shark the pilot-fish keeps just ahead, and if he finds food, dashes about and flops his tail on top of the water to attract the shark's attention. Then, when the great fish comes up, he shares the meal with it. But often when sailors throw a baited hook over the side of their ship the pilot-fish betrays the shark and leads it to the baited hook.

Oxford.

Passing through the long, small, oblique streets in which the long, gray, battered public face of the colleges seems to watch jealously for sounds that may break upon the stillness of study, you feel it the most dignified and studious of cities. . . . My friend and I wandered forth in the luminous early dusk. We reached the bridge that underspans the walls of Magdalen and saw the eight-spired tower, delicately fluted and embossed rise in temperate beauty—the perfect prose of Gothic—wooing the eyes to the sky that was slowly drained of day.—Henry James.

Bluefish Ocean Glutton.

The bluefish is a rough and ready fighter, but he is a rapacious rascal, as well, and probably more destructive to other fishes than any creature which inhabits the sea.

A school of bluefish will cut through a shoal of henhaden or weakfish with chopping jaws, leaving the water thickly strewn with the remains of their quarry, and then turn round and do it all over again. It is said that he will, following the custom in vogue among ancient Romans, disgorge the contents of his stomach to make room for more.

AUCTIONEER

This is to notify the public that I have removed to Chestertown and am prepared to cry isaes in Kent and Queen Annes counties on reasonable terms.

WILL BE LARGEST TELESCOPE

Canada Soon to Have Record Instrument for the Investigation of the Heavens.

Canada is to possess the largest of all telescopes. It will have a mirror 120 inches in diameter. It has already been cast, and is now being ground and polished. The latter task is expected to occupy at least five or six years.

The largest existing telescope is the 100-inch instrument at Mount Wilson, in California. It took four years to grind and polish the mirror, and in doing so over a ton of glass was removed.

It is the wonderful success of the 100-inch telescope that has led Canadian astronomers to make the plunge and sink £60,000 in a 10-foot mirror. The new telescope will be set up in an observatory on the Pacific coast of British Columbia.

It will make a star appear 300,000 times as bright as the eye sees it. The number of stars seen throughout the entire sphere of the heavens by the naked eye is about 5,000. The 120-inch instrument is expected to reveal at least 400 millions, or a million more than can be seen by any other existing telescope.

APPEALS TO LUST FOR GOLD

Term "El Dorado" Lures Today as It Did When Spaniards Sought Fabulous Wealth.

The name El Dorado is Spanish for "the gilded." The term applied first to a South American king said to cover his body annually with gold dust and bathe in a sacred lake, then to a fabled golden city, and finally to a fabled country abounding to an almost inconcelvable degree in gold and precious stones.

The legend, the origin of which has never been satisfactorily explained, took many variant forms, while the mythical king and his equally mythical dominions were shifted with the utmost facility from one part of the continent to another. The story fired the imagination of the gold-hunting Spaniards, who expended vast sums in sending out exploring parties, most of which returned decimated by privations, fatigue and disease. The name has since been applied to any place abounding in gold or in opportunities for acquiring sudden wealth, and more to a county in California and a city in Colorado.

Old Women as Brides.

A private expedition recently penetrated into the northwestern part of Australia and made some valuable discoveries in regard to the natives and the natural resources of the country between Broome and Wyndham. The trip was made by a man and wife who had been warned of the risk which they were running in entering the country which was infested by unfriendly natives. The latter were found to be suspicious but not hostile, and the strangers soon became on intimate terms with them. They found some very strange domestic conditions existing. For instance, the old tribesmen monopolized all the young women and some old warriors had several young wives and the young men were compelled to be contented with old women for brides.

Was President for One Day.

Senator David Rice Atchison of Clay county, Missouri, claimed the unique distinction of holding the office of President for one day. Being president pro tempore of the senate from 1846 to 1849 and again from 1852 to 1854, Senator Atchison was for one day legal President of the United States, since Gen. Zachary Taylor, successor to James K. Polk, was not sworn in until Monday, March 5, 1849, and the terms of President Polk and Vice President George M. Dallas had terminated by limitation at midnight Saturday. Senator Atchison was very fond of humorously urging his claim to having been President for one day. He said he slept most of his term. Of course, there is nothing on record to show that he drew any salary as President.

Price of Success.

Success worth naming is eternal vigilance, and if our aim be a selfish one it will still leave us bankrupt in the end. The man whose wish to grow rich is so strong that everything else goes down before it, will find himself a pauper in the things that matter most, when he has time to look round. The friends he ignored have formed other ties; the love that might have crowned him he had no use for, and now his home is empty of all save strangers, who care little whether he lives or dies. There is no loneliness so complete, so bitter, as that which we fashion for ourselves; gratified ambition is a poor thing to keep one warm when winter comes and old age is creeping on apace!—Exchange.

British Guiana.

The physical geography of the three Gulanas is much the same. Along the coasts are flat, swampy tracts, with fertile soil. Beyond this the land rises to undulating savannas, behind which are mountainous regions covered with almost impenetrable forests. Vegetation is remarkably rich and luxuriant. Sugar, coffee, rice, cocoa, and fruits are cultivated. The forests yield fine timber of several kinds, also rubber, oil, balsams, gums, tonka beans, and nuts. The plumage of the birds is particularly brilliant. Gold and diamonds are produced.

Farmers, List Your Repair Needs

It would be hard to find a farmer who at some time or another had not lost valuable time waiting for necessary repair parts. Take this territory and total up the time lost in this way and it will astonish you. And all because repairs are not odered as early s they should be.

There is no better time than right now—just before the busiest season on the farm—to go over your machines carefully, make a list of repairs you are likely to need and send it to us. With this list in our hands, we can order our stock so as to be prepared to meet every call promptly.

Repair part service is a necessary part of our business. We realize what it means to you in time and money to get what you need at once. Help us to help you by making up your list now and sending it in to us.
