Heaviest Snow Fall Of The Year

Snow began falling in Kent county and all over Maryland about noon on Tuesday and by night had approached almost the proportions of a blizzard. Its depth varied from two to three inches in depth. It is the first time this winter that the whole state has been covered and it is the deepest snow of the year on the Eastern Shore. No serious impediment has been reported from the snow except slippery state roads, and farmers, generally welcomed the snowfall as a protection to the wheat and grass.

League of Women Voters

The work of the League of Women Voters for this year is in a measure preparatory for the elections next fall. Women should become interested in the issues that they may vote intelligently and help prepare the program of legislation that will be presented to the 1924 session of the General Assembly.

The League does not believe that a State legislative program should be selected by a State Board, but that it should be the best thought and experience of the women of all sections of the state. To this end survey outlines are being sent to the county leagues. The investigations made by the local leagues in completing these surveys will furnish the information that will guide in the selection of such legislation.

The Children's Code Commission, recently appointed, is studying all laws of the state concerning children; such laws will be revised and codified and a complete code of the necessary child welfare laws submitted to the General Assembly. The passage of this Children's Code is the one biggest piece of work before the women of Maryland for 1924.
