DEATHS

On Saturday evening, May 26, Margaretta Harrison Newnam, beloved daughter of Mr. and Mrs. John H. Newnam, at the age of 18 years, passed into her reward. Her life was short and fragrant, like the flowers that surrounded her in such profusion, but she stands as an inspiration to all in conscientiousness in duty, her love for her church, her unselfishness and her heroism in suffering.

She leaves behind her parents Mr. and Mrs. John H. Newnam, a brother, Samuel Harrison Newnam, of Texas, and one sister, Mrs. Austin F. Shure, of Chestertown.

The funeral services were held in Emmanuel P. E. Church on Tuesday afternoon at 12.30 o'clock by Rev. Chas. Atwater and the interment was in the cemetery of Church Hill. The pall bearers were Joseph St. Martin, Robert Darney, A. F. Shure, Richard Collins, James Brown, Page Comegys.

Fold the hands that ne'er 'till now
Lay idle in their whiteness;
Close the eyes that soon shall beam
In more than mortal brightness.

One more weary, heavy laden,
Loose the bonds that bind her;
Radiant spirits bear her upward,
Heaven opens 'round her.

The cross has lain upon her breast;
Raise the crown above it;
She has sought and found her rest,
More we may not covet.

In Memoriam

In loving rermembrance of Mrs. Catherine Potts, who departed this life May 28, 1922.

Oh! A mother, what is like her?
Who on earth can take her place?
Self-denying, self-forgetting,
Self-ignoring for her children.
Do we know her? Can we prize her?
Till by death she's taken from us?
Till she's gone and left us weeping,
Weeping for a mother's love?

Pernament Enamel ---Baked on Steel

The wearing qualities of Dodge Brothers Baked Ename Finish have always been a source of wonder and delight to Dodge Brothers owners.

The secret of this durability, which accounts for the car's fresh, glossy appearance after years of wear, lies in the enameling process developed by Dodge Brothers when they originated the practice of enameling steel bodies, eight years ago.

After each coat of enamel the body passes into a system of electrically controlled ovens. There, under an intense heat, the enamel virtually becomes a part of the steel.

So minute is the regulation of these ovens, that baking automatically ceases the instant the proper degree of hardness is attained. Thus, the enamel is neither too soft nor too brittle, and has virtually the same expanding and contracting qualities as the steel body itself.

It is this scientific combination of hardness and elasticity which makes Dodge Brothers Baked Enamel practically impervious to climatic conditions and prolonged usage. It wears and glistens as long as the car owner gives it reasonable care.
