Farmers, List Your Repair Needs

It would be hard to find a farmer who at some time or another had not lost valuable time waiting for necessary repair parts. Take this territory and total up the time lost in this way and it will astonish you. And all because repairs are not odered as early as they should be.

There is no better time than right now—just before the busiest season on the farm—to go over your machines carefully, make a list of repairs you are likely to need and send it to us. With this list in our hands, we can order our stock so as to be prepared to meet every call promptly.

Repair part service is a necessary part of our business. We realize what it means to you in time and money to get what you need at once. Help us to help you by making up your list now and sending it in to us.

THAT BAD BACK

Do you have a dull, steady ache in the small of the back—sharp, stabbing twinges when stooping or lifting—distressing urinary disorders? For bad back and weakened kidneys Chestertown residents recommend Doan's Kidney Pills. Read this Chestertown statement:

Mrs. S. Pfeffer, 102 Cannon St., says: "I gladly recommend Doan's Kidney Pills to anyone in need of a kidney remedy. I have used Doan's at different times when my kidneys were troubling me and they never failed to give relief. The least cold I took settled on my kidneys and my back became weak and and painful. Mornings I felt dull and sluggish and the action of my kidneys was irregular. Doan's Kidney Pills were the right remedy for me and soon put a stop to the backaches and other signs of kidney trouble."

CREDIT GIVEN CASTE SYSTEM

Long Freedom of India From Plague Was Indirectly Caused by Its Prevalence.

Although Europe had suffered from many visitations of plague before and during the Middle ages, it was not until the Nineteenth century that plague came to India, says J. H. Stephens in Popular Mechanics.

This was due to the prevalence in India of the ancient caste system of the Brahmins, which resulted in separation and segregation. The higher castes lived apart from the lower castes, and between each of such segregations open spaces were left, which allowed the circulation of fresh air, and provided for expansion without congestion. Thus, unwittingly, the caste system adopted one of the most effective measures for preventing the spreading of disease.

Under the British administration, caste rules were less strictly observed, and the different castes tended to converge, while congestion increased, resulting in the first appearance of plague in the city of Mangalore, capital of the native state of Mysore, South India. It broke out first in the most congested quarter, where sunlight and air were excluded or polluted.

Plants That Select Homes.

One of the chief popular distinctions between vegetable and animal life is that the animals have power of choice and of voluntary motion, while vegetables and plants grow only mechanically. But the microscope seems to show that many vegetable forms can move as easily as can animals. There is a plant called volvox globator, so minute that millions of it could be put in a drinking glass, which is seen to whirl like a top across the field of the microscope. Some plants found in ponds, which are still more minute, move habitually, as with an apparent purpose. Naturalists who have given closer study than others to climbing plants state that these seem to exercise the liberty of choice. Their tendrils, in climbing over pieces of wood with holes, will try one hole after another until they find one that pleases them. One investigator saw a tendril withdraw itself after having pushed itself in a hole for 36 hours.

Fall of the Roman Empire.

The fall of the Roman empire was in A. D. 476, when the western empire was finally extinguished by the deposition of Romulus Augustulus as emperor of the West, and the proclaiming of Odoacer as king of Italy. The later Roman or Eastern empire, with its capital at Byzantium (Constantinople), continued to exist for a thousand years longer. Its history may be divided into four periods: (1) That covering the struggle with Persia, ending in favor of the empire about 630 A. D.; (2) the struggle with the Saracens, who were practically crushed in the Eleventh century; (3) the wars with the Seljuk Turks in the Eleventh and Twelfth centuries; and (4) those with the Ottoman Turks in which the Roman power at last went down in 1453, when Mohammed captured Constantinople, and the last emperor, Constantine XI, was killed.—Literary Digest.
