HEARN GASOLINE

Is Uniform and Dependable because it is tested before it is sold

All Hearn Gasoline is subjected to the Sulphonation Test before it is sold. The method of making this test is simple, but it requires care and accuracy.

One-fiftieth of a pint of Hearn gasoline and twice that quantity of sulphuric acid are measured off in a special graduate. The mixture is shaken up and then allowed to settle and separate into two layers. The gasoline layer is next measured very carefully, to ascertain that there has been no loss in volume. The slightest reduction in the quantity of gasoline would indicate the presence of certain foreign matter, absorbed by the sulphuric acid.

This test is important to every Gasoline user; for it assures him of a product that is free from these foreign substances, most of which injure the motor, either by helping to form carbon or by causing corrosion.

The Hearn Oil Co. does not depend upon this one test. Its gasoline is subjected to a series of tests, which are your protection and which make the gasoline you buy at one Hearn filling station the same that you buy at any other station. It is uniform and reliable—Because it is Tested.

ANOTHER SPECIFICATION, EQUALLY IMPORTANT, TO WHICH ALL HEARN GASOLINE IS SUBJECTED, WILL BE EXPLAINED IN THE NEXT ADVERTISEMENT.

Hearnoleum Products

The Hearn Oil Company manufactures lubricating and fuel oils for all purposes.

Have you tried HEARN "Y" MOTOR OIL?

It is unexcelled as an all-the-year-around and all-around lubricant for your automobile.

Hearnoleum Products are sold throughout the entire state of Delaware and the Eastern Shore of Maryland. There is a Hearn filling station convenient to you. The man at that station knows and he will see that you get the right kind of oil for your car.
