Kent Canneries Begin Work

With the opening of the tomato and corn packing season throughout Maryalnd this week, labor conditions, which were considered acute a month ago, will be considerably improved. This seems is the opinion of several canned goods packers on the Eastern Shore, who state that while there will not be an overabundance of help, there will be sufficient to meet all needs.

Both white and colored help in the agricultural sections make up the laboring forces employed in the factories. There will not be as many negroes as heretofore, it is believed, as many of them have left Maryland to work in the northern mills and factories, persuaded to go there, it is said, by industrial agents who scoured the state for labor early in the year.

Wages will not be high, it is said. The scale which prevailed several years ago again will be in effect, and in most of the factories, 30 and 40 cents an hour will be the maximum wages for the adult laborers, while the women who are employed skinning tomatoes and husking corn will be paid per bucket of tomatoes and crate of corn.

The outlook for the year, according to many packers, is that this year will mark the beginning of a return to normal times and the heavy losses of the past years will be partly made up.

Immediately after the close of the World War the United States Government put many thousands of cases of canned goods on the market at prices much below the prevailing scale.

—The beautiful country home of Eugene M. Lucas, of Philadelphia, formerly of Chestertown, on the North East River, opposite Charlestown, Md., and its contents, together valued at $75,000, was destroyed by fire, believed to be of incendiary origin, early Monday morning. The blaze was discovered about midnight and is thought to have been started by persons who first robbed the house.

Why Ship Is "She"

Here are some answers to the question: "Why do they call a ship she"

If you ever tried to steer one you wouldn't ask.

Because it takes so long to get them ready to go anywhere.

They need almost as much doling up and painting as any woman you ever saw.

A ship ahs to have it own way or it won't go.

Ships always come off the ways backwards like the members of a certain sex alighting from street cars.

It costs so much to keep one in operation.

Because they are held together with steel.
