BRICE'S MILL

JOSEPH BRICE, Proprietor.

Bake things he likes with FLAVO FLOUR. It's healthful and tissue building. There is more nutrition and a sweeter taste in FLAVO FLOUR. It is made with a new process by the most modern mill in the world. Nature's food values and the delicious flavor of the wheat are not milled out as they are by other methods. FLAVO FLOUR is milled at home from home wheat. It is good. Buy it and patronize Home Industry.

NEWS OF KENT ROADS

Big Job Of Preparing Chestertown To Pomona Road For Cement Nearing Completion—Other Items

The average person, gliding easily over cemented roads in a rubber-tire vehicle and complaining of every little bump that they receive in transit, would fairly marvel if they knew of the almost endless amount of work required to build a few miles of hard road. The other day we made it our business to witness the tremendous job of preparing the road bed from Chestertown to Pomona for cement. Unless one sees the work in operation he can scarcely imagine it. Sweating, straining horses dragging tons of earth back and forth, men toiling beneath the summer sun, thousands of dollars being circulated and spent for materials—and for what? That people can get about easier, that farmers can be closer to markets, in fact, that life in general can be made better. The Old Line Construction Co. has this work in charge and the opinion is that they will make a mighty good job of it. In tearing away the old road bed around Radcliffe Bridge, Mr. Harry Cannan, who has charge of the work, states that there have been four different bridges in the vicinity of the present one during the past years. It is highly probably that the course of the stream has varied somewhat in recent years. It is a well-known fact that big sail boats at one time used this stream to reach the farms bordering on it. At that time it must have been both wider and deeper. Mr. Cannan states that the company will begin laying cement this week. To do this wells will have to be dug or driven, as the water from the river cannot be used. The gravel and sand for the same will come from the farm of Mr. H. P. Skipper and is being freighted across the river. It will require over two thousand tons of the same for the job. When completed, which will be in the not far distant future, the old mud hole from Chestertown to Pomona will be relegated to the past, travel from that section to Chestertown made more pleasant and that fertile section of Kent, for so many years, kept in obscurity by impassable roads, will be given a push forward that will place that region among the most desirable portions of Kent county. The Quaker Neck and Broad Neck portion of Kent are, naturally, most desirable. Being on or in close proximity to water courses, the farms make good homes and desirable locations. They need just this one thing to give them equal prominence with other Kent farms—good roads—and they will soon have at least one.

The Eliason Motors, Inc., has recently sold to Kent County a one-man road grader which is said to be giving satisfaction. It is now being used on the Kent roads.

Mr. Gilbert Taylor, roads engineer of Kent county, is busy these days trying to get the Kent roads in shape before winter. This is a man's job, and we wish Mr. Taylor success in it. Good roads are a necessary element in the life of the day. The better our roads, the better become general living conditions. The day will come, perhaps, when all roads will be good roads.

ROCK HALL

Mr. and Mrs. V. A. Hunter and sons, of Baltimore, were Sunday guests of Mr. and Mrs. Thomas E. Joyner.

Mr. William Shreck, of Seattle, Wash., is renewing acquaintances this week among friends of his youth.

PREDICT CITY'S GROWTH TWENTY YEARS FROM NOW

Telephone Engineers Forecast Future with Remarkable Degree of Accuracy

Providing America with an adequate telephone system is not today's job alone. It is the job of tomorrow, or next year, of twenty years hence. And every bit of work done in the present must, if it is efficiently and economically done, be done with relation to the future.

Not that the engineer who supervises the construction of a pole line or the installation of equipment in a large central office must be a prophet, or the son of a prophet. The man whose job it is to forecast the telephonic future is an expert, a specialist.

Name him a city and one of the telephone engineers will go to a file and not merely predict how many people will inhabit it six, twelve or twenty years hence, but will tell you in remarkably detailed terms what kind of people they will be, and how many department stores, banks, theatres, clubs and churches will be required to serve their economic, social or spiritual needs.

"Here," he will declare, pointing to his map, "the character of the neighborhood will change, the residences being replaced by commercial establishments; there a new section of moderately-priced homes will be developed, with a neighborhood business district following these two streets; a new office building will probably be erected at this point, a group of factories at that." And you will smile incredulously until your friend steps to another file and produces proof that exactly such predictions as these, made as a result of telephone commercial surveys, have been fulfilled time and time again, all over the country.

But your telephone engineer will modestly tell you that even he is not a prophet, in the sense of possessing any uncanny powers of prediction. He will declare that he is merely a student of facts.

Authority In Many Lines

He is an authority on geography and geology, on agriculture, on mining and on commerce. He knows why, a couple of hundred years ago, a band of settlers selected this particular spot as a site for a city. He is an expert on immigration and emigration and knows how the politics of the Old World will affect movements of its people to the United States during the next decade or two. He knows, moreover, in terms that are startlingly specific, what races will be attracted by the particular commercial and industrial opportunities offered in this particular locality. He has made an analysis of this city, knows how many families it has, how many of them live in apartments, how many in flats, and how many in separate residences; he has painstakingly divided them into types, based upon the amount of house rent they pay a month.

Telephone equipment and the personnel to operate it must not merely be kept abreast of demand, but must anticipate it. One of the essentials of good service is that, under normal circumstances, this service must be furnished to the public without any considerable delay after application is made for it. It will not do to wait until the demand is created and then struggle vainly to fill it. Provision must be made for cables, for conduits, for exchange offices and for switchboards which, though not needed now, will be needed at some time in the future. Hence the survey, which is simply a comprehensive outline of the direction and extent of telephone development for a period of six, twelve or twenty years from the date it is made.

ANNOUNCEMENT TO THE PUBLIC

Mr. John Wethered Barroll, Counsellor-at-Law, announces that he has opened his office in the frame law office on Court Street, adjoining the Lyceum Theatre. All kinds of legal business will receive his prompt and close attention. When not in the office, a message can be left with his father, Hope H. Barroll, Esq., whose assistance is always at his command.

Phone No. 132. 08-tf

POLITICAL ANNOUNCEMENT

Centreville, Maryland.

August 3, 1923.

TO THE DEMOCRATIC VOTERS OF THE SECOND JUDICIAL CIRCUIT OF MARYLAND:

By the Constitution of Maryland, provision is made for the election, by the people, of Judges for the several Judicial Circuits into which the state is divided and, among other things, the qualifications therein mentioned for Judges are as follows:

"They shall be selected from those who have been admitted to practice law in this state, and who are most distinguished for integrity, wisdom and sound legal knowledge."

If my reputation, after having engaged in the practice of law for practically thirty years, and my record, after having served as Associate Judge of your Judicial Circuit for nearly one year, leads you to believe that I possess the above mentioned necessary qualification, I will be very grateful should you determine to support me at the approaching Democratic Primary Election.

The duties incident to my present position preclude me from making the usual personal and political campaign.

Very truly yours,

THOMAS J. KEATING.
