SPORTS

W. C. MAKES GOOD SHOWING IN INITIAL GAME, And IS READY TO GIVE ARMY A BATTLE TODAY—OTHER NOTES

Although defeated, 19-0, by the Marines last Saturday, Coach Kibler's 1923 football aggregation made a most excellent showing. Playing against a team that outweighed them and which was composed of stars of national reputation, Washington College demonstrated that they could give a good account of themselves under almost any condition and against almost any opponent. Carrington, the basketball star, and all around athlete, played at quarter and handled the team in a most satisfactory manner, while the powerful Crowe hit the line hard for big gains. The ends, Carroll and Reiger, showed up well, while the line withstood the attack of the heavier team well. Altogether, the team gave a good account of itself Saturday.

Washington College will make its first appearance in the big Stadium in Baltimore today, Saturday, and a big crowd from Chestertown and Kent will be on hand to root for the local collegians as they battle against a far bigger aggregation. We look for the home team to lose again by about the same as they did last week. They will be playing against a team composed of some of the best players who have played the game for the past ten years. But we expect the Washington boys to demonstrate one thing and do that clearly, and that is to show that other state teams, with about the same number from which to draw a team, will have a dangerous opponent this year, an opponent capable of checking their rushes, and one able to make touchdowns.

The appearance of Bobby Cavanaugh in town this week added another man to Coach Kibler's reserve strength in the back field. Cavanaugh was quarter back last year and proved one of the stars of the team. His appearance in the line will add strength both on the offensive and the defensive.

The lightweight championship of the world originated at Perryville, Md., in December, 1868, when Abe Hickins, of Philadelphia, knocked out Peter McGuire, in five rounds for a purse of one thousand dollars.

William Duffy, last year athletic instructor at the Wicomico High School and formerly of Washington College, will report to Newark Club, of the International League for spring training next year. He had a satisfactory trial with that team this fall.

The Yanks and the Giants will begin their annual battle for the World's Baseball Championship Oct. 10. We pick the Yanks to win.

Easton is working hard for a place in the Eastern Shore League next year.

There will be no off-days in the baseball series between the Yanks and the Giants this year. This will necessitate the best of judgment on the part of McGraw and Huggins in the handling of their pitchers and the selection of the initial moundmen will be watched with a great deal of interest. An analysis of the team shows as follows:

Infield, even.
Outfield, Yanks.
Base running, Giants.
Catching, Yanks.
Hitting, Yanks.
Managers, Giants.
Pitching, Yanks.
Winner of series, Yanks.

A number of players who starred in the Eastern Shore League this year will go up in higher classes nevt season. Frank Hummer, of the Crisfield Club, goes to Reading, in the International League. Flowers, of Cambridge, has been sold to St. Louis, in the National League. Dover has disposed of King to the Portland, Oregon, club, of the Pacific Coats League. Hewell, shortstop for Parksley, goes to the Norfolk, Va., team, of the Virginia League. Staylor, catcher for the Laurel team, goes to Newark, in the International League, as has also Schroll, of Cambridge. Quinn goes to Syracuse, of the International League. Ryan, Johnson and several others have been watched by big league scouts.

The consistent victories that have marked the career of Jack Dempsey have raised the question repeatedly as to whether or not Dempsey is not the greatest pugilist of all time, and a brief comparison of the champion with other champions will not be uninteresting.

Sullivan was the first champion to make the sport take on national or international importance. He was a hard hitter and had a big string of victories to his credit. But, strange to say, he never could be induced to meet Peter Jackson, colored, who was believed by many to be Sullivan superior in the ring, because of his science. This view was substantiated somewhat by the fact that Jackson fought a 65-round draw with Corbett, while Sullivan lasted but 20 odd rounds with him. A fight between Sullivan and Dempsey would have been a corker, with Sullivan lasting about five rounds.

Corbett took the championship from Sullivan because he was too scientific for him, and gradually wore him out, finally knocking him out. Corbett was the most scientific heavyweight that ever wore the crown. It would have been a most interesting fight between Corbett and Dempsey. Corbett would never have attempted to stand up and fight Dempsey, but would have preferred to have used all his science. The result would have been Corbett's defeat in something like ten or twelve rounds, perhaps sooner if Dempsey were abel to corner him.

Fitsimmons won the championship from Corbett. Corbett hated Fitsimmons and matched his strength and size against Fitsimmons' punch and ability to stand the blows and lost. A match between Fitsimmons and Dempsey, to our mind, would have been a pitiful spectacle. With his 158 pounds of weight, a terrific punch and the heart of a lion, Fitsimmons would have been unable to hold off the man-killing Dempsey but three or four rounds at the best.

Jeffers won from Fitsimmons twice. He was too big, too strong and too rugged. A fight between Dempsey and Jeffers would have been the real test of all time. Dempsey as he is now and Jeffers in his prime, after he had defeated them all, would furnish the real test. In that battle we hesitate to attempt to pick the winner, but believe Dempsey's quicker foot work and his speedier blows would bring him the verdict after a gruelling battle.

After age had taken its deadly toll, Johnson won from Jeffers, and for a few years stood in a class by himself. Johnson in his prime would have given Dempsey the hardest battle he has ever had. He was scientific and powerful and dangerous to any man. It would have taken Dempsey at least 20 rounds to have whipped him.

Willard won a shady fight from the negro, and we all know how easy he was for Dempsey. The others who have contended for the championship have been completely outclassed.

Looking at the question above from every angle—as a fighter, ability to stand and give punishment, footwork, speed, and, above all, ability to use a fighting head, we believe Dempsey to be the premier fighter of all time.

Kansas Farmers Pay Big Sum

Kansas Farmers pay $18,000,000 a Year interest On Mortagages.

Mortgages on farms of Kansas represent an aggregate indebtedness of more than $300,000,000, according to an investigation sent to the State by the New York Evening Post. This vast indebtedness averages $1,800 each on the 166,000 farms in the Sunflower State, and the drains from the pockets of the farmers something like $18,000-000 a year in interest.

Under ordinary circumstances the farmers of Kansas could carry this indebtedness without hardship if not wholly without inconvenience. But with one of the principal crops of the State—wheat—now selling at less than cost of production, these farmers are in many instances facing insolvency.

At the very time that they are getting less for their wheat than tne cost of growing it, these Kansas farmers are obliged to pay higher prices for what they have to buy than they paid when their last crop was planted. And their dollar is only worth 69 cents.

Kent Republicans Name Ticket

The Republicans of Kent county held a convention in the Court House here Monday and nominated candidates for all local offices except the three Judges of the Orphans Court and State's Attorney, which were left open for the State Centrol Committee to fill, if they decided to do so. For the first time in the history of the county, a lady was nominated for one of the county offices, that of county treasurer. The following ticket was nominated by acclamation:

State Senator, former Senator Henry Brown, of Pomona; House of Delegates, Lemuel Barks, of Galena, and James A. Nickerson, of Kennedyville; sheriff, William A. Burk, of Chestertown; treasurer, Mrs. Minnie Falls, of Chestertown; County Commissioners, James D. Davis, of Galena, and Harry Willis, of Betterton.

LAUGH IT OFF

From Kansas City Star

If the weather looks like rain,
Laugh it off.
When you feel you must complain,
Laugh it off.
Do not sit and nurse your fears,
Waste no time in useless tears,
Put your faith in smiles and cheers,
Laugh it off.

If men say you're looking ill,
Laugh it off.
Should they recommend a pill,
Laugh it off.
Doctors, druggists and disease
Want to do just as they please,
Often you can save the fees,
Laugh it off.

If life seems to go dead wrong,
Laugh it off.
Drown your sorrow with a song,
Laugh it off.
Do your work with smiling face,
Look ahead and keep the pace,
Be a winner in the race,
Laugh it off.

Subscription to the Transcript $1.50 per annum.

Merchants and Farmers Build and Own Railroads

The Hall Mark of Service

Samuel Harden Church, President of the Carnegie Institution, in a recent statement, says:

"The railroads were not built by railroad men, and they are not owned by railroad men. They were built by the merchants and farmers, of the United States, and they are now owned indirectly by all the people of the United States.

"The whole splendid system of railroads as it exists today was built with capital energy and brains furnished by American business men and American farmers with the high purpose of developing the commercial and agricultural interest of the country.

"Every one knows that as soon as the iron horse drew his shadow across the land the farms which the Government could scarcely give away suddenly jumped in value to fity or a hundred dollars an acre, because the railroad had supplied them with the means of development, production and distribution.

"When the railroads are making plenty of money every shop is humming a song of happiness and every farm is growing rich."

THE RAILROADS OWNED BY ALL THE PEOPLE merit the support, friendship and cooperative interest of the people—Hostility to your own property, either by legislation or individual act, does not accord with self-interest or the good judgment and common sense, so characteristic of American citizenship.

CHIROPRACTIC

THE GREAT DRUGLESS METHOD OF HEALING

A Talk to Farming Folks by Leonard M. Dill, D. C. Ph. C.

Now that the busy season is about over, it would be wise to give some attention to your health, and the health of the family.

Farmers as a class have more sickness than any other class of people. You probably have heard this before, and wondered why it was. Here's the reason. Farmers work harder, they lift and strain and bend their bodies more or less all the time. This constant lifting, bending etc., causes a great deal of strain on the SPINE, the mainshaft of man.

This constant strain upon the SPINE eventually forces the movable bones of the spine out of normal position.

If you have ever seen a spine or skeleton you will know that all the nerves of the body leave between the spine bones. It is logical therefore that a great deal of nerve pressure occurs between the bones of the spine.

The Health Science of Chiropractic claims, and has proven by chemical demonstration and experience that 95% of all human ailments are CAUSED by pressure upon the great nerves due to misplaced or twisted spine bones (vertebral).

Everybody knows that the nerves control every function of the body. Even the HEART is controlled by nerve energy, otherwise it would not have power to pump the blood thru the body. (Which is all the heart does).

For instance, if the nerves supplying the stomach, liver, lungs or kidneys were pressed upon by a misplaced spine bone, due to a fall, twist, strain, jar, you might have any kind of stomach trouble, from indegestion to cancer of the stomach, any kind of liver trouble such as an inactive liver (making you feel tired and dopey' to jaundice, lung trouble, including tuberculosis, or any of the many human ailments that can be traced to faulty action of the kidneys.

Here are some of the ailments that have been and are daily being permanently relieved by Chiropractic.

Asthma, Anemia, Apoplexy, Appendicitis, Boils, bed-wetting, bronclis, pains in back, lame back, catarrh, chorea, constipation, convulsions, coughs, cross eyes, Diabetes, dizziness, dropsy,diseases of the eye, fainting spells, gall stones,gastritis, intestenal obstruction, kidney trouble, laryngitis, neuralgia, neuritis, Rheumatism Lumbago, Sciatica, Shell shock, spasms, Paralysis and many others.

If you suffer any of these or any other ailments, quit taking pills and medicines that only tend to make the condition chronic and investigate Chiropractic, the safest surest and most economical way to get well. Consultation and literature free.
